

Tech Tips

How to Scan Files on a Flash Drive

1. Insert Flash Drive
2. Click on All Programs, Go to Symantec Client Security and Click on Symantec AntiVirus

3. Select Scan Computer

4. Select drive representing flash (thumb) drive (drive letter may be G: / H: / or I:)
5. Click the Scan button (You will see the scan progress through each file on the flash drive)
6. A notification will appear when the scan is complete. (The bottom of the window will show how many files were scanned, how many viruses were found, and how long the scan took)
7. Close the window by clicking the red "X"
8. Click the Exit button (scan is completed)

NOTE: To create a shortcut for this program, right click on Symantec AntiVirus, select Send To , Desktop create shortcut. Check Desktop for shortcut
