## What is AVID?

AVID, which stands for Advancement Via Individual Determination, is a college, careers, life readiness system, currently impacting over 6,000 schools, and close to two million students worldwide.

Through the implementation of AVID Schoolwide, the program truly impacts and transforms a school's instruction, system, leadership, and culture. Opportunities and exposure to all things related to college and careers is delivered in an environment fostering rigor, high expectations, growth mindset, and relational capacity.

AVID is a philosophy. AVID is academic excellence. AVID is perseverance. AVID is leadership. AVID is self awareness and responsibility. AVID is accountability. AVID is family. AVID is success.

Participating students commit themselves to improvement and preparation for college, careers, and life. Through AVID, they are offered a rigorous program that focuses on critical thinking, high standards, developing academic and life "survival skills", exposure to real world application, and college/career research, networking, and skills for success.

The AVID system teaches students how to manage their time, take notes, read/write to analyze/synthesize, leadership, problem solving, and study effectively.

AVID represents a systematic approach that supports Volusia County Schools' Goal: to increase achievement for each and every student.
