Alum Rock Union School District

2021/22 Demographics and Enrollment Projections

EXECUTIVE SUMMARY

Alum Rock Union School District consists of 14 elementary schools, five middle schools, and three K-8 schools. Fischer Middle and Mathson Middle both closed this year, but the Renaissance Academy is still utilizing those two sites. Alum Rock Union School District has experienced a significant and steady decline in enrollment over the past ten years from 12,075 students during the 2012/13 school year down to a current enrollment of 8,156 students.

Alum Rock Union School District is projected to decline in enrollment by 5.95% (or 485 students) for the 2022/23 school year. The expanding TK program is projected to have an impact of 5 new TK students next year. The District is projected to have a declining enrollment over the next six years, with a projected 6,243 students in the 2027/28 school year. This is a total loss of 1,913 students, which is a decrease of 23.46%. The expanding TK program is projected to have an impact of 329 new TK students over the next six years.

Future impacts from new housing development is predicated upon information provided by local municipalities on the development of 512 housing units over the next six years. If the building rates increase or decrease, then the timeline shown in this Study will need to be modified accordingly. These projected new developments in the District's boundary are expected to generate 27 students next year, or a total of 157 students in the next six years.

Based on current District loading standards and classroom space, the District has a net classroom capacity of 17,064 students, and a current enrollment of 8,156. This gives the District a current utilization factor of 47.8%. The projected utilization factor in six years will be 36.6%. This assumes loading standards remain constant and no additional facilities are built or removed.

This report includes the anticipated growth in the Transitional Kindergarten program to reflect the recent "TK for All" initiative which will allow a phased plan for all 4 year olds to attend TK over the next four years. The projections in this report assume TK will be offered at each elementary site as the numbers will justify classes for each campus.

These projections assume the transfers between schools remain consistent. If changes in facilities, schedules, programs or policies are made, then the patterns may be impacted.

Alum Rock Union School District

2021/22 Demographics and Enrollment Projections

Ten Year Enrollment History and Six Year Enrollment Projections

This graph shows a summary of the projections for the entire District. It shows the current enrollment for 2021/22, the historic enrollment for the past nine years, and the projected enrollment for the next six years. The end result is a total of 6,243 students in the District in 2027/28. The enrollment for the past years include all four year olds in the TK program which results in the enrollment numbers for the district being greater than shown in the official CBEDS counts.

The Alum Rock Union School District has declined in enrollment over the past ten years from 12,075 in 2012/13 to the current enrollment of 8,156.

This graph is color coded by grade groupings:

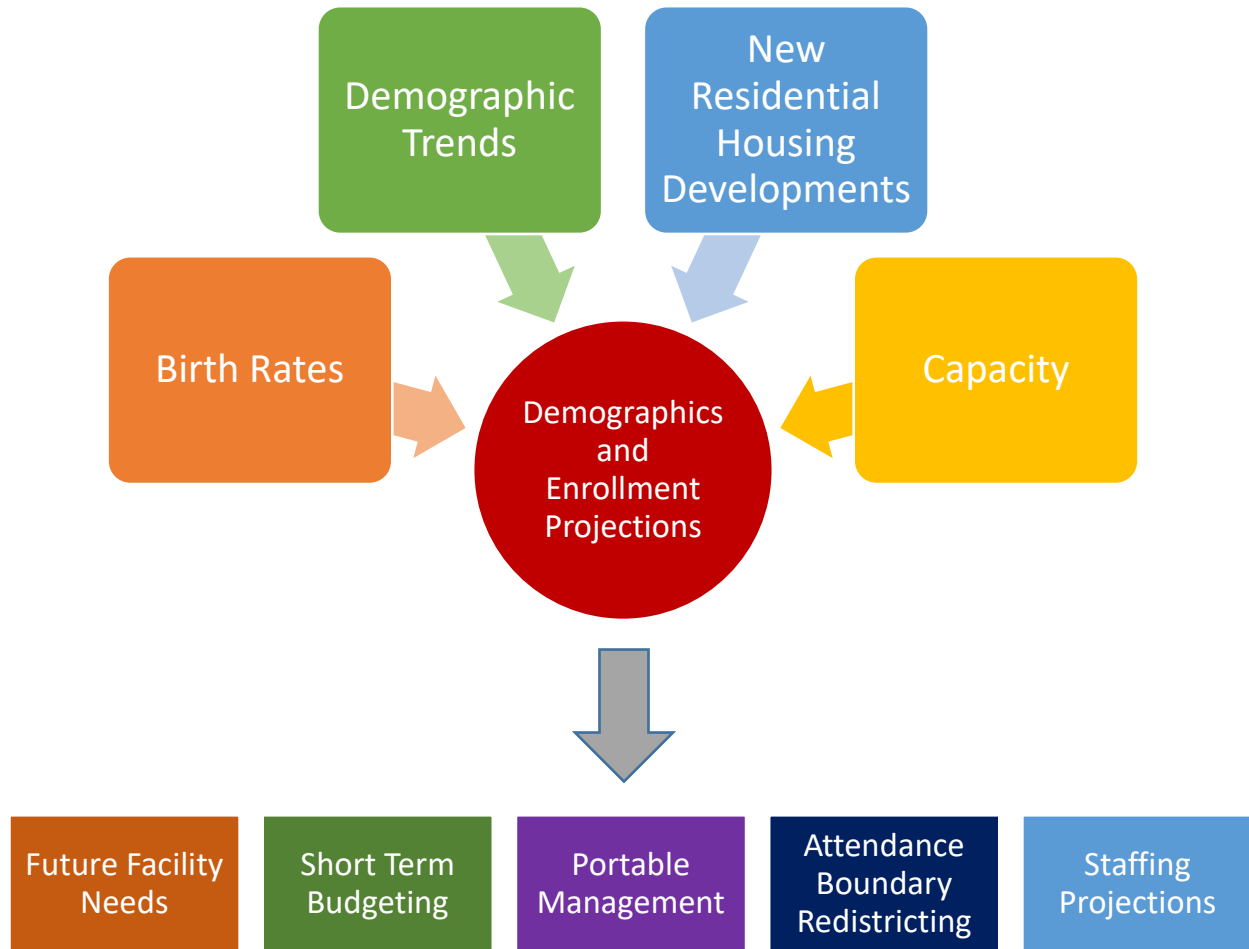

Orange represents the historic and projected enrollment for the elementary school grades TK-5.

Green represents the historic and projected enrollment for the middle school grades 6-8.

The entire District enrollment is shown at the top of each bar.

INTRODUCTION

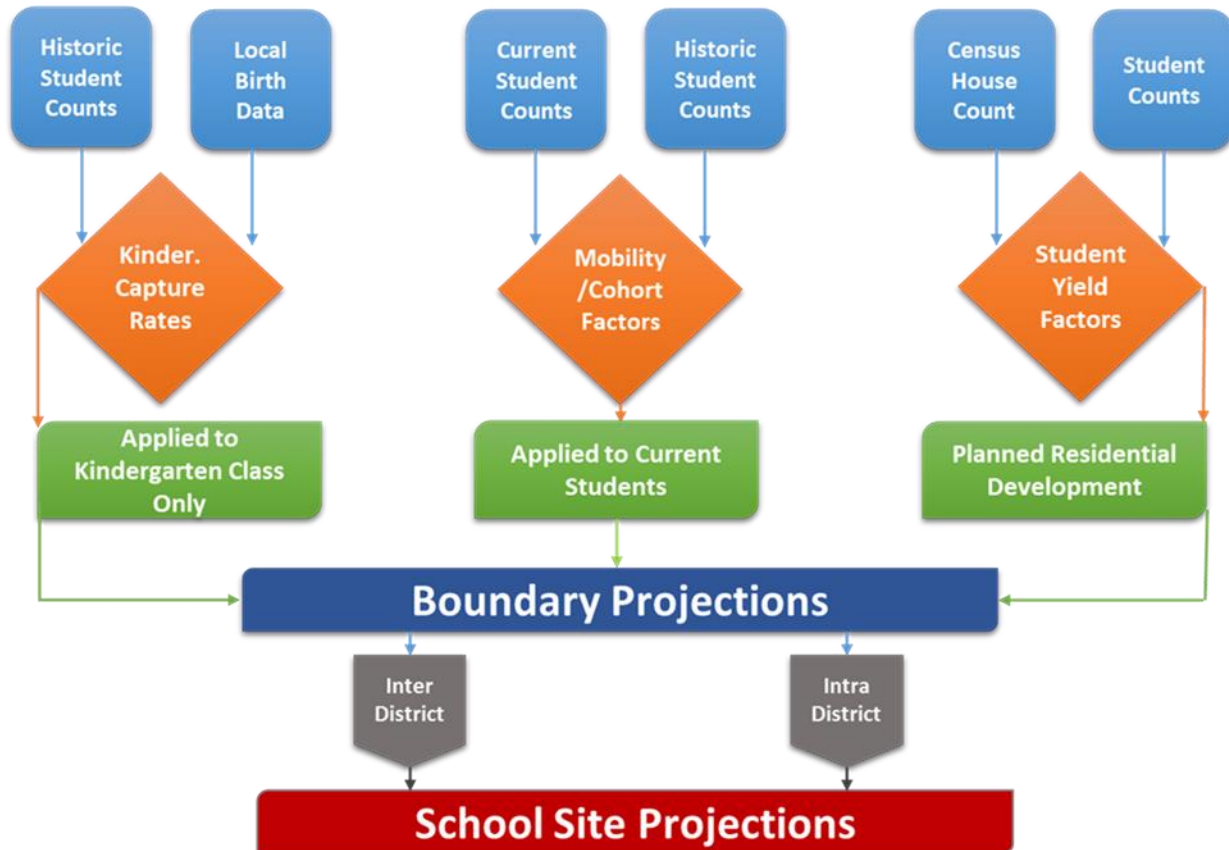

This Demographics and Enrollment Projections Study provides a comprehensive enrollment analysis for the Alum Rock Union School District. The district-wide and school-specific enrollment projections are meant to serve as a planning tool to help with both long- and short-term planning. Demographic Studies examine the factors that influence school enrollments, namely trends in demographics, birth rates, and housing development. They are also used as a tool to identify certain facility planning requirements such as capacity, utilization of existing facilities, planning for modernization or new construction, and attendance boundary redistricting.

This Study provides information based on the 2021/22 District enrollments and programs, local planning policies and residential development. As these factors change and timelines are adjusted, the Demographic and Enrollment Projections Study should be revised to reflect the most current information.

METHODOLOGY

The chart below summarizes the inputs to calculate the boundary and school site projections.

The **enrollment projections** for each school are generated using a State standard non-weighted cohort trend analysis. The basic projections are created by studying the individual geographic areas. Once the trends are analyzed for each area, the base projections are modified using the following procedures:

- a) **Birth rates** are used to project future kindergarten and transitional kindergarten enrollment. It is assumed if the births indicate there was an increase of 4% one year, then there will be a corresponding 4% increase in the kindergarten class five years later or the transitional kindergarten class four years later.
- b) **New Housing Development rates** and **yield rates** are compared to the historical impact of development, and if the future projections exceed the historical values, the projections are augmented accordingly.
- c) **Inter-District student** counts are not included in the base geographic trend analysis since these students reside outside of the District. Therefore, the current number of students-per-school and students-per-grade are added to the base projections.

Alum Rock Union School District

2021/22 Demographics and Enrollment Projections

- d) **Intra-District students** are those who transfer from one school to another. The number of students transferring into and out of each school are calculated and used to determine the difference between the projections for students living in each attendance area versus those that are projected to attend the school.
- e) The projections for **special education students** and **alternative programs** are created by assuming those programs typically serve a percentage of the total District population. Therefore, as the District grows or declines, the enrollment in those programs would increase or decrease accordingly.
- f) **Cohort Trend Analysis:** The number of students living in the boundary are used to generate the cohort factors. The non-weighted average of the three years was determined with each year weighted 33.3%. This reduces the current trends compared to the weighted model. This was done due to the impacts of the pandemic which should be a short-term adjustment. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years.

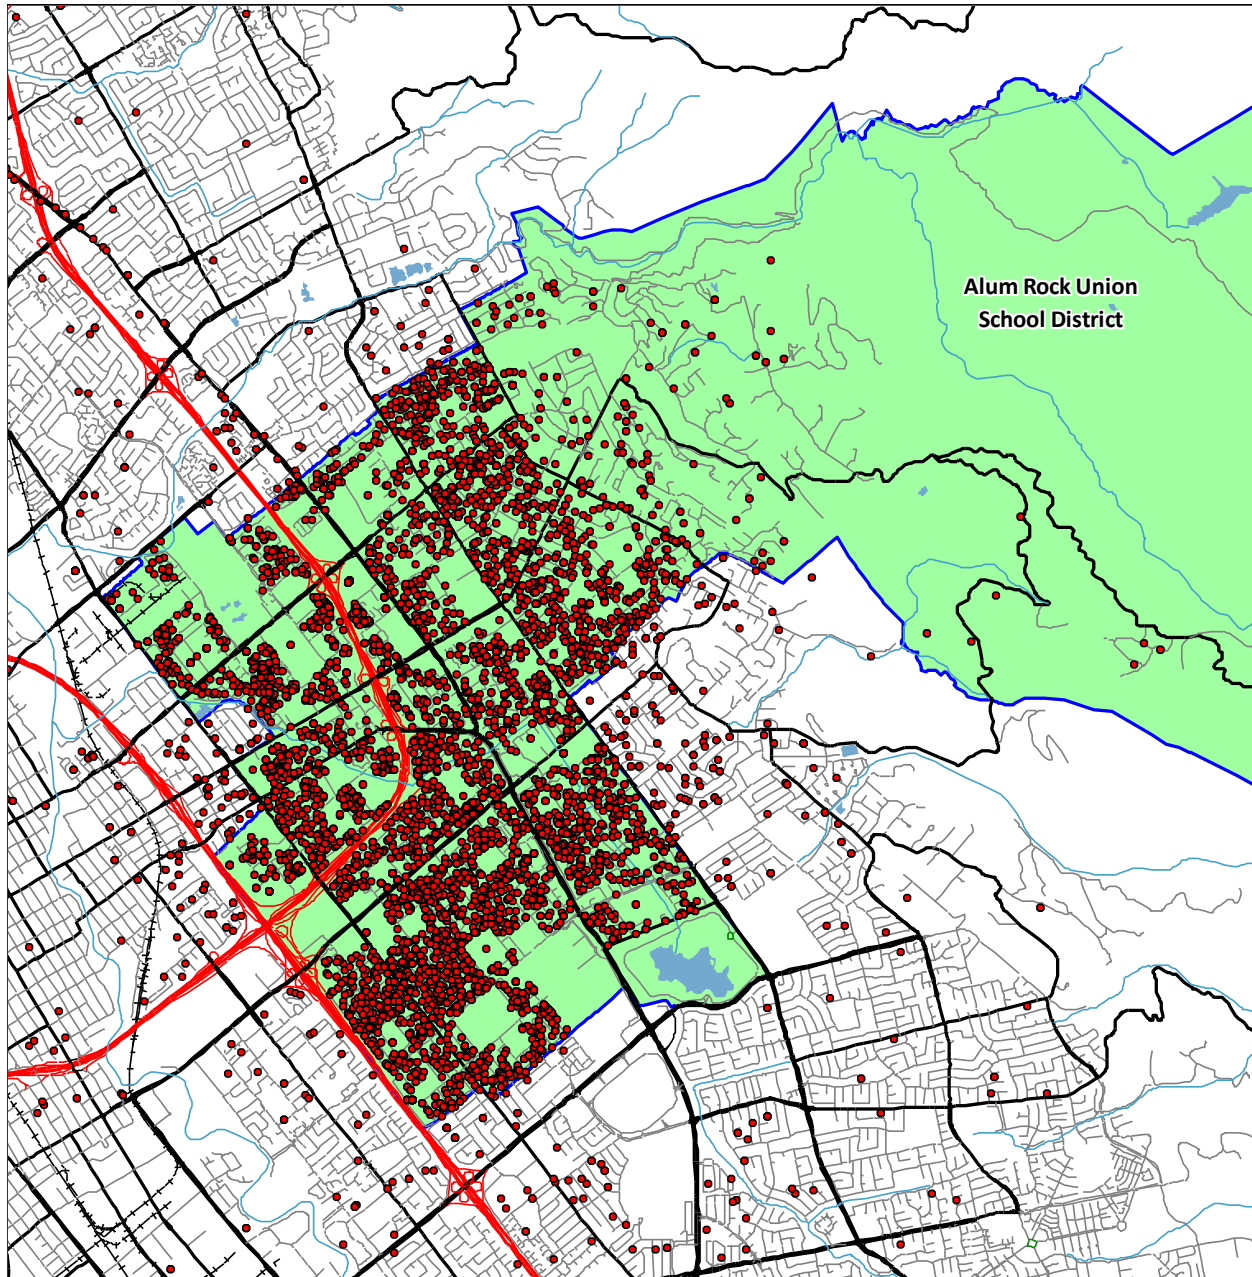

Neighborhood School Attendance Area Analysis: Each school attendance boundary is input into our GIS (Geographic Information Systems) Software. Students are counted in each of the attendance area boundaries based on their residential address and can be studied to view optimum and balanced utilizations. Attendance pattern maps for each individual boundary will analyze impacts of intra-district transfers from within the district boundary, as well as inter-district transfers from neighboring school districts.

“TK for All” Initiative: This report models the growth projected for Transitional Kindergarten in alignment with the recent “TK for All” initiative which follows a phased plan to allow all 4 year olds to attend TK by 2025/26. This includes the assumption that TK will be offered at all sites that currently house K students. The expansion for TK enrollment is based on the following schedule:

- 2022/23 – 5 months (Adds 2 months)
- 2023/24 – 7 months (Adds 2 months)
- 2024/25 – 9 months (Adds 2 months)
- 2025/26 – 12 months (Adds 3 months)

DISTRICT BOUNDARIES

District Map with Student Residential Locations

This map shows the District boundary along with the location of each student based on their residential address. This geographic data is the foundation for our demographic analysis. Any red dots outside the District boundary will represent students attending one of the District schools or programs but have a residence outside the District. This map also identifies different areas of student population density.

HISTORIC BIRTH RATES

The following section is an analysis of the number of births in the Alum Rock Union School District. The number of births are compiled by zip code regions and provided by the Department of Health. The zip code areas do not exactly match the District boundaries and therefore the zip codes 95127, 95133, 95140, and half of 95116, which are in the District, were used for this analysis.

*Kindergarten Totals may include some Transitional Kindergarten students for some of the past years to more accurately correlate a 12-month period of births to a 12-month period of enrollment.

The above figure illustrates the correlation between births in the District area and the number of kindergarten students attending Alum Rock Union schools five years later. The number of births between 2005 and 2016 has averaged about 1,866 per year. The recent birth rates over the past four years (2017 to 2020), which will generate the kindergarten classes for the next four years (2022 to 2025), have been between 1,323 and 1,516. We have assumed that the current kindergarten capture rate of 48.05% will be maintained in the future.

Historic Kindergarten Capture Rates

This figure shows the kindergarten capture rates for the past 12 years. Since the birth data is derived from zip code areas, which do not exactly match with the District boundaries, the capture rate also accounts for differences in the coverage areas. Low capture rates are common when a district serves only a portion of a large zip code area. A large capture rate is possible when families move into the area after the children were born, but before they arrived for kindergarten. Overall, the District has had a declining capture rate with a 12 year average of 59.64%.

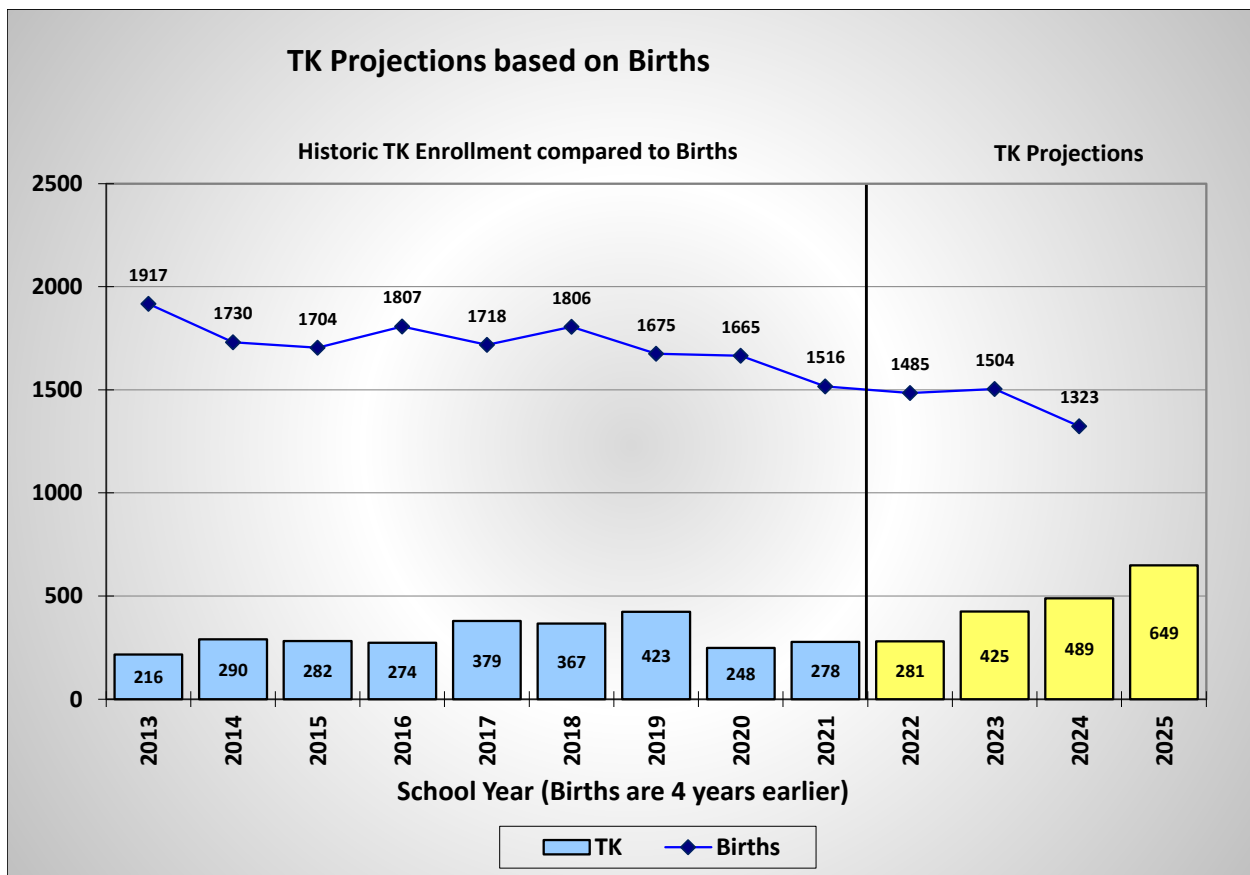

Alum Rock Union School District

2021/22 Demographics and Enrollment Projections

Transitional Kindergarten

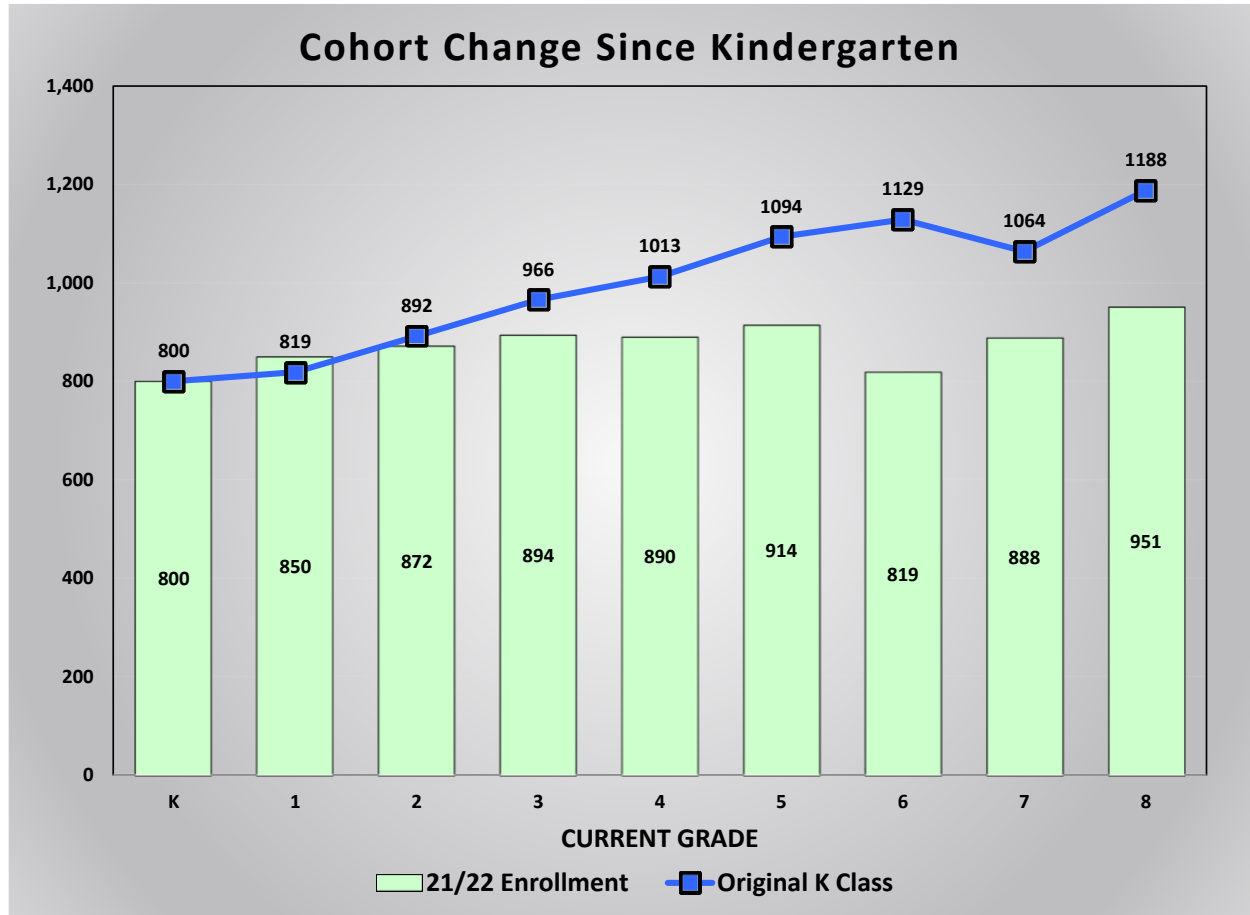

The Transitional Kindergarten (TK) program started in 2012 to provide an extra year for young children to get ready for kindergarten. Currently, the TK program allows four year-olds who will turn five between September 1 and December 2. Some districts allow parents with children just outside that window to also participate in the program. Since the window for the TK program is only three months, participation in the TK program is typically less than 25% of the total kindergarten enrollment. In most current state processes, such as CalPADS reporting, the State Building Program, and ADA, TK students are included with the kindergarten numbers.

As mentioned under "Methodology", this report addresses the growth of the TK program over the next four years to a full grade.

The TK projection for 2025/26 shows a total of 649 students and would be a full grade at that point.

Retention Rates Since Kindergarten

This chart compares the original kindergarten class size to the current enrollment for each grade. For example, the current 6th grade class has 819 students and six years ago the kindergarten class had 1,129 students. Overall the class sizes have decreased since kindergarten.

Alum Rock Union School District

2021/22 Demographics and Enrollment Projections

Historic Enrollment and Trends

Alum Rock Union School District Historic Enrollment and Cohorts								
Grade	CalPADS Enrollment				Historic Cohorts			Non-Weighted
	18/19	19/20	20/21	21/22	18 to 19	19 to 20	20 to 21	Average
T K	367	423	248	276	56	-175	28	-30.3
K	966	892	819	761	-74	-73	-58	-68.3
1	968	921	880	828	-45	-12	9	-16.0
2	1,044	948	889	845	-20	-32	-35	-29.0
3	1,026	1,017	920	867	-27	-28	-22	-25.7
4	1,021	965	998	864	-61	-19	-56	-45.3
5	1,019	937	891	883	-84	-74	-115	-91.0
6	1,021	962	891	809	-57	-46	-82	-61.7
7	1,010	1,001	952	871	-20	-10	-20	-16.7
8	1,009	1,002	994	936	-8	-7	-16	-10.3
SDC	314	306	301	216	-8	-5	-85	-32.7
Totals	9,765	9,374	8,783	8,156	-31.6	-43.7	-41.1	-38.8
Annual Change:		-391	-591	-627				

This chart shows the enrollment by grade level over the past four years. The cohort values were calculated for each grade and each year, along with the non-weighted average for each grade. A positive cohort value indicates that grade is expected to have more students than the previous grade last year. A negative value would mean that the grade has fewer students compared to the previous grade last year.

In general, a positive cohort is representative of growth and a negative cohort indicates a decline in enrollment. There are some exceptions. First grade usually has a positive cohort, as there are some students that do not attend kindergarten at public schools but arrive in first grade.

Another important item to notice is the current breakdown by grade level of the student population. Comparing the number of students in the lower grades to the upper grades can indicate potential increases or decreases in future enrollments. Also, if there is a large class or a small class, it will slowly cause a ripple in the enrollments as it advances a grade each year.

Finally, the annual change at the bottom of this chart indicates the net impact of the changes in enrollment over the past few years.

NEW HOUSING DEVELOPMENTS

This close up view of the District shows the location of the projected new development areas.

The City Planning Department within the school district’s boundary was contacted for input on new housing developments. Two years of building permits were geocoded by address or APN to show the locations of active new developments.

The projections used in this report are based on the following number of units projected from these developments:

<u>ID</u>	<u>Name</u>	<u>Remaining</u>	<u>Six Year</u>	<u>Boundary</u>	
		<u>Units</u>	<u>Projection</u>	<u>TK-5</u>	<u>6-8</u>
1	2880 Alum Rock Mixed Use	166	166	Lyndale	Sheppard
2	Alum Rock Family Housing-Vela	87	87	Lyndale	Mathson
3	Alum Rock Multifamily	65	65	San Antonio	Mathson
4	Sunset Mixed Use	794	0	San Antonio	Mathson
5	Villa Del Sol Mixed	194	194	San Antonio	Mathson
	Totals	1,306	512		

Assuming that 512 of the 1,306 planned units are completed over a six year period, there would be an average of 85 new housing units per year.

Alum Rock Union School District

2021/22 Demographics and Enrollment Projections

To determine the impact of the new housing development, each new housing unit is multiplied by the student yield rate. Currently the District student yield rate is 0.317 students per housing unit. This breaks down as follows:

Alum Rock Union School District Student Yield Rate Analysis			
<u>Grade</u>	<u>2020 Students in District</u>	<u>2020 Housing Units</u>	<u>Student Yield Rate</u>
Total TK-5	5,645	28,522	0.207
Total 6-8	2,837	28,522	0.099
Total SDC	301	28,522	0.011
Total	8,783		0.317

Based on 2020 Census Data for school district.

The yield rate used for new construction eligibility determination in the State building program is 0.50 students per home for K-8 districts. The yield rate in the Alum Rock Union School District is lower than the State average.

Alum Rock Union School District New Development Construction							
<u>School</u>	<u>Housing Units per Year</u>						<u>Totals</u>
	<u>22/23</u>	<u>23/24</u>	<u>24/25</u>	<u>25/26</u>	<u>26/27</u>	<u>27/28</u>

Sheppard Middle	0	83	83	0	0	0	166
Middle Totals	87	83	133	97	79	33	512

Based on these estimated construction rates, the development will generate 27 students next year and a total of 157 students in the next six years.

CLASSROOM COUNTS AND CAPACITY

It is important to understand that capacity and classroom counts may be viewed different ways for different purposes. The State School Facilities Program (SFP) considers all available teaching stations excluding physical education facilities and core facilities (e.g., libraries, multipurpose rooms, and administrative spaces), as part of the site capacity when calculating eligibility for new construction or modernization funding. The State also has its own loading standards per classroom as part of the eligibility determinations.

Another method for calculating capacity and number of classrooms is based on local District standards of class size and a definition of what is considered a full day teaching station. The District may set aside several classroom spaces defined by the SFP for specialized programs or pull-out spaces.

The classroom counts and capacities defined in this Demographics and Enrollment Projections Study represent the rooms that have been identified by Alum Rock Union School District administration as designated fulltime teaching stations. This count is a net count and may not take into consideration other rooms which could be used as fulltime teaching stations but are needed for other programs offered by the District.

The classroom counts are shown for each school and are used to determine the capacity. The classroom counts represent the rooms that can be used for teaching purposes at each school site. The classroom counts may not represent the current classrooms being used, as there may be unused rooms on the school site. In some cases, there may be fewer classrooms counted than current teaching stations if some of the rooms being used were designed for other purposes but are currently being used as classrooms due to overcrowding.

SCHOOL PROJECTIONS

This Study provides a detailed analysis of student attendance patterns and enrollment for each school. This includes a boundary map illustrating that particular school’s attendance patterns along with a chart showing the projected enrollment for the next six years. These charts indicate the actual enrollment at each school over the past four years along with the projected enrollment for the next six years. In addition, the number of students living in the boundary are shown for the same time period. If there are more students attending than live in the area, then there is a net inflow. If more students live in the boundary than attend the school, then there is a net outflow.

The current capacity is shown on these charts to identify if there will be classroom space available for the students. If space is not available, then the attendance patterns will likely need to change if the additional facilities are not provided. The capacity for each school was determined by using the following loading standards for each classroom identified:

<u>Grade</u>	<u>Loading Standard</u>
TK	20
K	24
1-3	24
4-6	31
7-8	31

These loading standards are based on the current loading factors used this year and may change based on the level of funding for schools in the future.

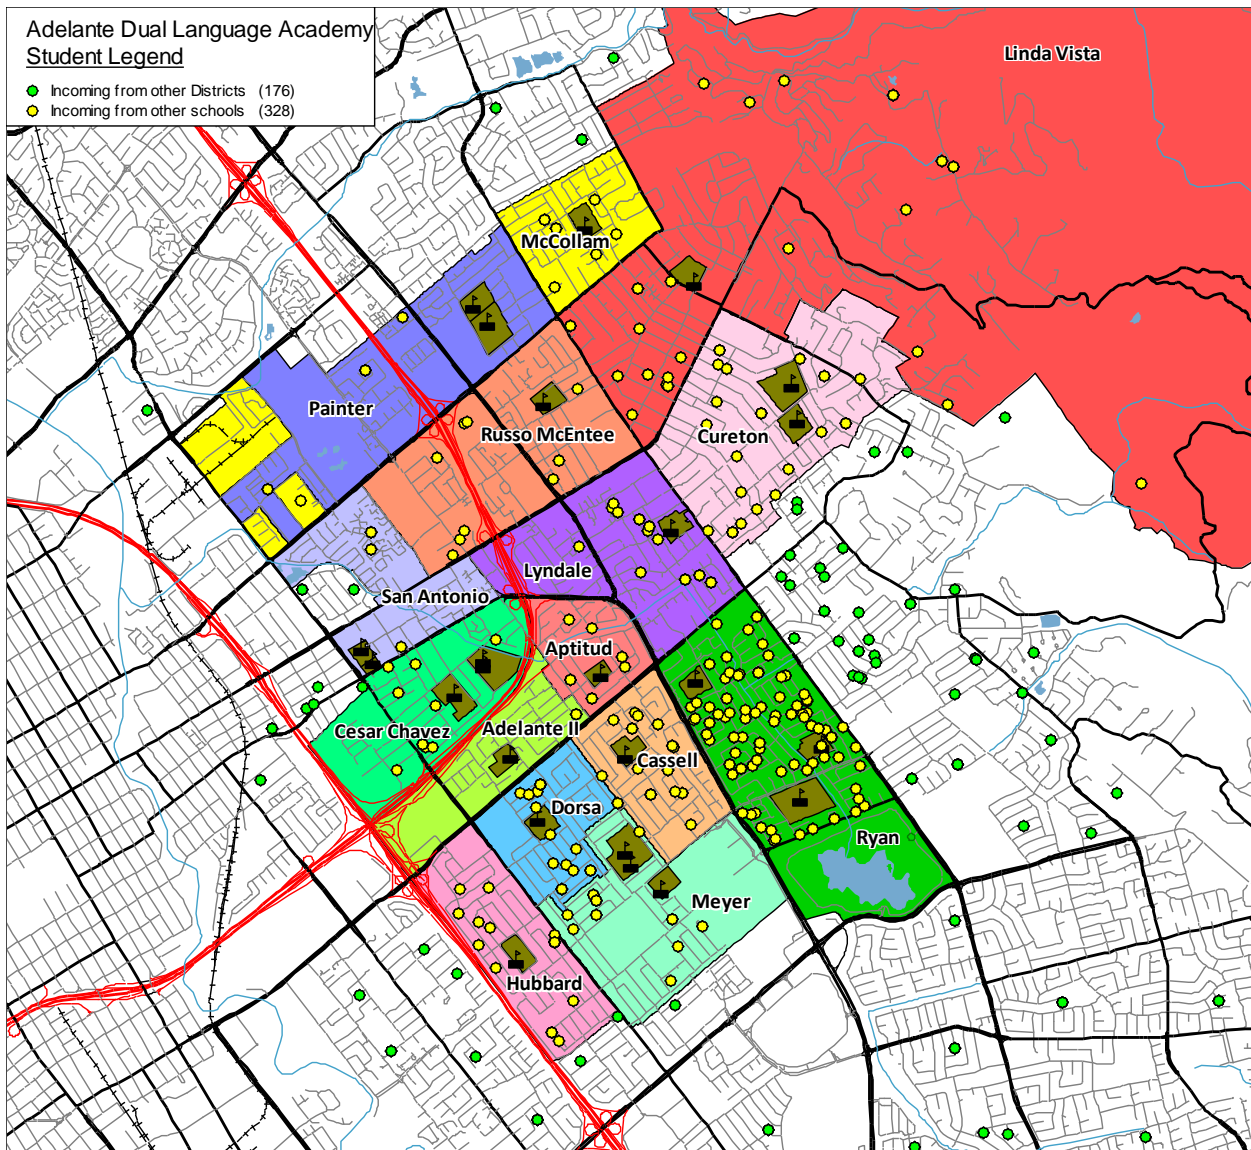

Detailed data is provided below each projection chart that shows the calculations of the cohort factors used to determine the enrollment projections for each school.

The number of students living in the boundary are shown, which are then used to generate the cohort factors. The non-weighted average of the three years was determined with each year weighted 33.3%. This reduces the current trends compared to the weighted model. This was done due to the impacts of the pandemic which should be a short-term adjustment. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years. The kindergarten and transitional kindergarten enrollment is projected using the birth data instead of a cohort factor.

The Attendance Factors were determined by analyzing the current year of students to see how many Inter- and Intra-District transfers there are. Once the baseline projections are calculated for the residents in the attendance area, the Intra-District and Inter-District factors are applied to determine the projected enrollment for each school.

The last three columns in the chart, Current Enrollment, 21/22 Projection, and Net Change, show the current enrollment, next year’s projection and net change in enrollment for next year. These are compared by grade to show the details needed for staffing and classroom needs.

This chart summarizes the transfers in and out of each elementary school as were seen by the yellow dots and blue dots on the school attendance maps. In addition, the data has been analyzed to determine the total in-flow and out-flow rates for each school. The school with the largest in-flow rate is Adelante II Academy and the school with the largest out-flow rate is also Adelante II Academy.

Student Residency and Enrollment Comparison

This chart compares each individual middle school enrollment to the students that reside within the school attendance boundary. Utilizing this data helps make it easy to see which schools have the largest and smallest enrollments as well as which boundaries are most populated. Schools with more students enrolled than those living in the boundary have a net transfer into the school. This is typically found at schools with special programs such as Gate or Dual Immersion, schools housing students from overcrowded or Program Improvement (PI) schools, and schools with more capacity than the student population living in the boundary.

Alum Rock Union School District

2021/22 Demographics and Enrollment Projections

Ten Year Enrollment History and Six Year Enrollment Projections

This graph shows a summary of the projections for the entire District. It shows the current enrollment for 2021/22, the historic enrollment for the past nine years, and the projected enrollment for the next six years. The end result is a total of 6,243 students in the District in 2027/28. The enrollment for the past years include all four year olds in the TK program which results in the enrollment numbers for the district being greater than shown in the official CBEDS counts.

The Alum Rock Union School District has declined in enrollment over the past ten years from 12,075 in 2012/13 to the current enrollment of 8,156.

This graph is color coded by grade groupings:

Orange represents the historic and projected enrollment for the elementary school grades TK-5.

Green represents the historic and projected enrollment for the middle school grades 6-8.

The entire District enrollment is shown at the top of each bar.

Cohort Change			-6	-13	-30	-58	-93	-76	1	7		

Alum Rock Union School District has a current enrollment of 8,156 students. The projected enrollment for next year shows a decrease of 485 students. This one year summary analyzes the net change between the current District enrollment by school and by grade, and the projected enrollment for 2022/23.

The students living in the boundary generate the cohort factors which are calculated for the past three years and the average is determined. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years. Next the attendance factor is used to determine the net enrollment for each grade. The attendance factor is determined by analyzing the current year of students to see how many Inter- and Intra-district transfers there are. The cohort change factor indicates the change in the number of students for each grade compared to the number of students in the prior grade the previous year.

These projections assume the transfers between schools remain consistent. If changes in facilities, schedules, programs or policies are made, then the patterns may be impacted. The actual enrollment for each elementary may vary from the numbers shown depending on which sites offer TK classes.

2021/22 Demographics and Enrollment Projections

SCHOOL FACILITY UTILIZATION

The following chart shows the current and projected utilization rates for each school. It has been color coded with blue representing schools with a utilization rate of under 70%, yellow representing a utilization rate of at least 70% but under 80% and red for the schools that have over 100% utilization. The utilization indicates the long term impacts of the changes in enrollment as compared to the school capacities.

School Facility Utilization
