

Field Trips at MEADOWRIDGE

From the Elementary School, through the Middle School and High School, experiential learning and field trips are an integral part of the curriculum at Meadowridge School.

Requiring the participation of all students, these opportunities can either occur as planned journeys for one or more days away from our campus, or they may occur as a workshop opportunity at the school. Properly planned and executed experiential education must:

- Supplement and enrich classroom procedures by providing learning experiences in an environment outside of the classroom.
- Help students relate school experiences to the reality of the world outside of the school.
- Give students the opportunity to study and explore real situations and processes in their actual environment.
- Inspire new interests among students.
- Involve group interaction, team building, and reflection.
- Integrate different areas of the curriculum, allowing students to apply what they learn in school beyond the classroom setting.
- Enhance students' education and passion for learning.
