

Content Recovery Policy

Content Recovery may be available as a supplement to the typical academic program for students who failed to meet the requirements for passing a course during the regular school year.

Students enrolled in Content Recovery must complete supplemental assignments/activities assigned and approved by a certified teacher in the content area of the course being recovered at an acceptable level prior to the established end of the subsequent grading period

Upon satisfactory completion of all assigned work and the completion of the final exam with a pre-determined grade, the certified teacher shall average the recovered work with the final grade to arrive at a new grade no higher than a "D". The teacher may then request a "grade change" for the student and the new grade will replace the failing grade on the student's transcript.

The principal shall consider teacher recommendations prior to allowing students the option of using content recovery.
