ASBESTOS MANAGEMENT PLAN

Dear Parents/Guardians:

The Asbestos-in-School Rule, mandated under the authority of the Asbestos Hazard Emergency Response Act (AHERA) of October 1987, requires that Local Educational Agencies have all buildings inspected for Asbestos containing materials. Pursuant to this rule, the Edison Board of Education has a team of trained, certified inspectors/management planners to inspect, assess, and recommend response actions as part of a comprehensive Management Plan for the District.

Please be advised that a copy of the Management Plan is on file in the Principal's office of each school, and it is available for public review during school hours.

Nothing Less Than Excellence
