

HEAD START POLICY COUNCIL

The Policy Council elects parent representatives to serve as spokespersons for all families. The council helps make decisions and plans for upgrading the program in areas of planning, general administration, personnel grant application process and program evaluation. Training is provided for those elected members.

The council meets monthly with special meetings called as necessary. Representatives of the community also serve on the council. The council must be composed of at least fifty-one percent of currently enrolled Head Start families. All meetings are open to the public.
