

SAFETY PROGRAM/RISK MANAGEMENT
EMERGENCY PLANS

CKC
(REGULATION)

PUBLIC ACCESS DEFIBRILLATION	No school will make available for use and public access any automatic external defibrillator device (AED) that is not FDA-approved for public access defibrillation.
PROGRAM COORDINATION	<p>The District nursing services coordinator will administer the AED program and will serve as coordinator for the AED program.</p> <p>The coordinator will provide cardiopulmonary resuscitation (CPR) and AED training to campus nurses, certified athletic trainers, and coaches and will assist in coordinating the AED program with local emergency service (EMS) providers. Coordination with local EMS providers will include notifying all local EMS providers of the existence, location, and type of AED available in the District.</p>
FUNDING	The Board may accept public gifts of AEDs for placement at school campuses. [See CDC] The District may purchase AEDs if identified in the approved budget. [See CE]
TRAINING	Campus nurses and/or certified athletic trainers will conduct campus CPR and AED training for District employees who are likely to use an AED and will schedule periodic practice of the skills learned in the initial training program.
USE	When an AED is used, the coordinator will promptly notify local EMS providers and will provide a case review to the Superintendent.
AED MAINTENANCE AND STORAGE	The campus nurse will schedule periodic maintenance and testing of equipment, according to the manufacturer's guidelines.
MAINTENANCE	The program coordinator and the athletic director will submit a maintenance request in the annual budget. When an AED is no longer serviceable, the item will be deleted from the campus equipment inventory and forwarded to the central office for disposal. [See CI]
STORAGE	The campus principals and athletic director, in consultation with the program coordinator, will determine the location of each AED.
