*Data collected Spring 2018*

## Introduction

Congratulations! Based on your administration of the Illinois Youth Survey (2018), this report provides data on a variety of health and social indicators including drug use, bullying, school climate and much more. Your data has been organized into topical sections as noted in the table of contents on the next page. To help you get started using your data, here are a few suggestions:

Review the table below to determine how widely your students participated in the survey. If the “% of Enrolled Students Reported” **is at least 50% for each grade level**, you can be more confident that the data in your report is representative of your total student population.

There will be NO DATA presented in this report for any grade level with **fewer than 10 valid surveys** (in the column “N Students Surveyed”). This is to protect the confidentiality of your students.

**Comparison of Students Surveyed with Enrollment**

	<b>N Students Surveyed</b>	<b>N Enrolled Students</b>	<b>% of Enrolled Students Reported</b>
10th	520	815	64%
12th	287	907	32%
Total	807	1722	47%

Keep in mind that the 8th grade form does not include all questions asked on the IYS high school form. For that reason, responses to some questions do not appear in the tables and charts for some grade levels. If you would like to determine what section includes responses to a specific survey item or verify if a question was asked at a specific grade level, please refer to the Site Report Appendix on our website <http://iys.cprd.illinois.edu/results>.

**Tables can be helpful when** you are looking for a summary of responses for particular survey questions, for example, the percentage of 8th grade youth who report using prescription pain killers to get high. Some tables may contain a mean score (an average of all the responses), a median score (the middle point of all responses given) or an “N” (number of students who responded to that question). Tables can also be useful when you need specific data to support a grant or report. If you see an “N/A” (**Not Applicable**) noted in a table, this indicates that the question was **not asked at that grade level**. If you see an “N/R” (**Not Reported**) noted in a table, this indicates, unless otherwise specified, that *at least 90% of students skipped the question for no known reason*, making the results too biased to report.

**Summary charts can be helpful** to view multiple questions in one place (e.g., use of different drugs to determine which is the most used) and to compare your results with the scientific sample of Illinois students who participated in the 2016 IYS. State level results from the 2018 IYS will not be available until late fall. IYS state level norms from 2016 are a good benchmark for immediate decision-making because state estimates stay relatively stable across two IYS administration years. To locate the starting page of your Summary Charts, refer to the Table of Contents on the next page.

We are confident that you will find this report to be a valuable resource for planning, grant writing, program development and reporting. If you have any questions about your report, please call 888-333-5612 and ask for an IYS Coordinator or visit the IYS website at <http://iys.cprd.illinois.edu/>.

# Summary Charts

Summary charts provide a snapshot of selected health and social indicators. All charts provide grade-level data (8th, 10th or 12th only). Some charts illustrate comparisons between one grade level of *Your Students in 2018* with the same grade level in a statewide random sample of *Illinois Students in 2016* (as noted in the introduction to your report). Other charts provide a comparison of *Your Students in 2018* across all grades surveyed to easily surface developmental trends. *Please note that there has been no 6th grade state sample since 2016, therefore no charts will display 6th grade data vs. 2016 state data for 6th graders.* Sixth grade data if available and reportable (more than 10 valid surveys) will show only on charts displaying all grade levels surveyed in 2018.

**Your report may not contain the full array of charts listed below.** As noted in the introduction to your report, there will be NO DATA presented in this report for any grade level with **fewer than 10 valid surveys** in order to protect the confidentiality of your students. In addition, the IYS 8th grade form contains a subset of the questions asked on the IYS high school form. As a result, some of the charts listed below may not be included in your report. Information about the availability of grade-specific charts or data is defined for each chart below. If an item within a chart is not displayed for a grade level (most often - 8th grade), a footnote is included on the chart to explain.

## Substance Use Behaviors and Consequences

### *Substance Use in the Past Year*

- Separate chart displayed for each grade level surveyed
- Your Students in 2018 compared to Illinois Students in 2016

### *Substance Use in the Past 30 Days*
