August 2022

Dear Parent(s) or Guardian(s):

During the 2021-22 school year, your student participated in assessments that measure a student's mastery of the West Virginia Alternate Academic Achievement standards. The Dynamic Learning Maps® assessment is a test that measures the academic achievement of students with the most significant cognitive disabilities. This test measures what your student knows and can do at his or her academic grade level, regardless of cognitive ability. Enclosed is the report of your student's results.

Setting challenging and achievable academic goals for your student is the foundation for a successful and productive school year. We hope that you will find the information included in these reports useful during your parent-teacher conferences and Individual Education Program (IEP) meetings. This report identifies your student's current level of academic achievement, including strengths and needs. We recognize that this assessment only measures academic skills, and your student also may have been successful in meeting additional goals that you and the IEP team have established.

Your student is constantly learning and growing. It is exciting to see what they have learned and can do. After reviewing these reports, we encourage you to talk to your student's teacher about how this report relates to daily class work and IEP goals. Together, we will discover all the new and exciting things your student has to share with us.

Sincerely,

A handwritten signature in blue ink that reads "David L. Roach".

David L. Roach
