

6th Grade Science Units of Study

Matter and Water

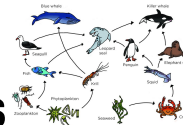

- A study of the atomic model and the kinetic theory of matter including a study of the distribution and circulation of water through Earth's systems, and human dependence on water.

Earth's Structures and Natural Processes

- A study of the interrelationships between Earth's structures, natural processes, and human activity.

Environmental Interactions

- A study of how changes in the flow of energy with the cycling of matter within an ecosystem can affect the survival of individual organisms, populations and entire species and how renewable and nonrenewable resources impact this cycle.

Northglenn Middle School Grades

Score	Description	What it means for your student
4	Advanced Understanding	Your student has mastered the expected standard AND has shown a deeper understanding of the concept.
3	Meets Standard	Your student understands the concepts being taught. <u>This is where we want to see all students scoring.</u>
2	Approaching Standard	Your student is making progress to learning the expected standard.
1	Does Not Meet Standard	Your student needs more time and extra help to understand the standard.
/	Not Assessed	Your student has not been assessed on this standard - YET
