

Always believe that something
wonderful is about to happen...*

Dear Fifth Graders,

I am so excited to be your teacher and experience all the wonderful adventures that this year will bring. Fifth grade is a year filled with teamwork, new learning, new challenges, and new rewards. This year, you will enjoy all the wonders that science has to offer. We start the year by diving into the depths of the ocean to explore mysteries such as the Titanic and marine life. We will also study Genetics, DNA, Minerals, Rocks, and Fossils.

We will also open our minds to new stories in book clubs, take on the role of a newspaper journalist in writing, and strengthen our mathematical knowledge. Also, we will get to explore the history, development, geography, and government of the Western Hemisphere. This will help us to better understand how the world around us has changed over time.

There are many special privileges associated with being a fifth grader. It is important to remember that those privileges come with responsibilities. Now that you are the big kids of the school, you are considered role models for the rest of the students at Jackson. It is important to remember to do the right thing even when no one is watching and treat everyone with kindness and respect.

As you enjoy your summer and prepare for the year to come, please be sure to label all supplies. Remember to keep your math skills strong and read a few good books!

I hope you have a wonderful summer and I can't wait to meet you on the first day!
The best is yet to come!

Sincerely,
Ms. Celic
