

Sayreville Public Schools

Grade One Health

Revised: August 2022

Course Description

The Grade 1 Health Curriculum is based on the three comprehensive health standards, mental health: social and emotional wellness, physical wellness, and safety. Students will learn how to apply health-related concepts to situations outside of the school experience to build a base for life-long health and wellness. Age and developmentally appropriate concepts and skills covered in this Grade 1 curriculum may include but are not limited to: personal growth and development, mental health, social/emotional awareness, the benefits of physical activity, how to access health and wellness resources, how to make informed health-related decisions as a consumer and user of health related services, nutrition, safety and environment, health conditions, diseases and medicines, alcohol, tobacco and other drugs, practices for communication and conflict resolution, healthy relationships, tolerance and respect for cultural differences, and the ability to advocate for personal, family, community, and global wellness and climate change issues.

Unit One— Social and Emotional Health

Content Area: **Comprehensive Health & Physical Education**
Course(s): Grade One Health
Time Period:
Length:
Status: **Not Published**

Summary of the Unit

Social Health is a person’s ability to communicate and interact with others efficiently. Individuals are able to form meaningful relationships with others and interact in healthy, appropriate ways. They encompass respect and accept differences of an individual’s race, religion, gender identity, gender expression, ethnicity, disability, socioeconomic background, and perspectives of health-related decisions. The extent to which people connect with others in different environments, adapt to various social, feel supported by individuals, institutions, and experience a sense of belonging, all contribute to social and sexual health.

Emotional Health encompasses the views, feelings, and expressions about oneself. Emotional health includes a person’s emotional, mental, psychological, and social well-being. It also helps determine how to handle stress and make choices related to others. Emotionally healthy people consciously develop coping mechanisms that are situationally appropriate to resolve and gather positive outcomes, develop strategies for mental health emergencies, respond to situations in a positive and appropriate manner, connect with resources and trusted individuals to assist, communicate feelings with confidence, and recognize support systems.

Unit Two - Personal Growth and Development, Wellness, Health Conditions

Content Area: **Comprehensive Health & Physical Education**
Course(s): Grade One Health
Time Period:
Length:
Status: **Not Published**

Summary of the Unit

Personal Growth and Development are lifelong processes of physical, behavioral, emotional and cognitive change throughout one's lifetime. Personal Growth and Development pertains to keeping your body healthy and understanding hormonal changes (all body systems). It encompasses the human condition: who we are, how we grow or evolve, and how interaction with others affects the process of growth physically, mentally, socially, and emotionally from infancy through advanced age.

Health conditions are acute or chronic illnesses and diseases, which can be either controllable or life threatening. People contract different types of diseases, such as communicable diseases. Access to care and facilities affect the conditions of health. Health-enhancing behaviors help a person avoid and reduce health risks, and diseases. Early detection, treatment, screenings, and vaccines assist in preventing (personal, community and global) illnesses and outbreaks.

Enduring Understandings

The body is made up of many parts working together.

Illness can occur if we don't take care of our body.

Many factors influence how we think about ourselves and others.

Understanding and sharing our feelings can help with coping and stress.

There are different ways that people handle stress, and some are healthier than others.

Nutritious food choices promote wellness and are the basis for healthy eating habits.

There are ways to get better if we are sick.

Essential Questions

How does moving your body make you feel?

What can you do to keep yourself safe from germs?

What does it mean to be well?

Who can name a kind of germ? What can germs do to your body? Why do you think that germs are bad for you?

How do germs get into your body? What parts of your body help to protect you from getting sick?
What is Lyme disease? How can you contract it?
Can you name three different types of cancer?
What are the correct names for my body parts?
What are the five basic food groups?
What are some healthy foods to eat? What are some unhealthy ones?

Unit Three – Personal Safety, Community Services and Support

Content Area: Comprehensive Health & Physical Education

Course(s): Health Grade One

Time Period:

Length:

Status: **Not Published**

Summary of the Unit

Personal Safety involves being aware of your surroundings and understanding of how certain situations and/or unhealthy behaviors can lead to injury, illness or death. The ability to identify potential risks and an awareness of the steps that can likely prevent injuries and diseases are key to being safe. In addition, it is essential that students understand that there are circumstances that may make them feel uncomfortable or are unsafe/dangerous that are beyond their control. It is essential that students know where and how to seek help and do not blame themselves.

Community Health Services provide informational resources and assistance to communities and individuals to support disease and injury prevention, disaster relief, and improve the quality of services provided to all individuals. Community Health Services promote public health, health equity, healthy lifestyles and reduce health disparities.

Enduring Understandings

People in the community work to keep us safe.

Potential hazards exist in personal space, in the school, in the community, and globally.

Individuals face a variety of situations that may result in different type of feelings and learning how to talk about their feelings is important.

It is important to be aware of potential dangers around us.

The environment can impact personal health and safety in different ways.

Essential Questions

Can you name a person from school who can help you with a health emergency?

Do you know how to access school and community health helpers?

What are some reasons to call 911?

How can we prevent the spread of germs? Why is it important to wash your hands?

What are some safety rules you need to remember when you play outside? When you play inside?

What is climate change? What are some affects climate change has on individuals, plants and animals?

What situations may cause you to feel sad, angry, frustrated or scared?

Do you know who you can go to when you need to talk to someone about your feelings?

What do I need to know about sexual abuse and assault prevention and awareness to stay safe?
