Subject: Gasoline and Diesel Fuel Bid
Bid No. TRA-084-07-19-624

Questions and Answers

1. Q. I noticed in your bid it states that you require that the supplier have accurate metering equipment at the time of delivery (Page 5, "Delivery", last bullet point). This equipment is only available on bobtail trucks and not on the larger transport trucks, as they unload only what is loaded. However, it looks like you have tanks large enough for orders of 7600. Can you please verify that metered equipment is required?

A. Yes. All delivery vehicles and/or trailers must have accurate metering equipment to enable the District personnel to verify quantities delivered.
