

GOAL 1C

Strategy:

Engage ALL students in high levels of learning in **Science EVERY day** resulting in increased proficiency and growth.

Description:

Ensure all students are engaged in high-quality, standards-aligned **Science** instruction, utilizing the curriculum maps and assessment resources district-wide.

Activities:

1. Review and revise curriculum maps and provide training and coaching for effective implementation to impact learning (Curriculum).
2. Provide content-focused professional learning that results in effective implementation of high-impact, standards-aligned instructional strategies (Instruction).
3. Analyze student assessment data to provide differentiated support based on students' needs (Assessment).

Rationale:

By providing Professional Learning Standards-aligned teacher training focused on improving teachers' content knowledge, improving instructional delivery practices and effectively utilizing data from standards based assessments, a higher percentage of students will obtain the knowledge and skills required by the state standards.
