Certified Peoplesoft HCM Functional Consultant

Bachelor of Engineering in Computer Science

Recruiting Experience:
• Implemented Recruiting Module for one of the large school districts
• Implemented Onboarding and Offboarding functionality on both public and private domain sectors
The ‘Why’

Health Check Goals and Recommendations

• In our 2021 and beyond Roadmap plan, we Prioritized the Recruiting Solution work and project
THE ‘WHY’

The PeopleSoft Recruiting Project will eliminate the need for third-party recruiting systems and help ensure that personal information is included in the system properly and securely.

• Create a job opening
• Post a job to EDJOIN, the district website, and the SDCOE PeopleSoft job site
• Screen applicants
• Provide email notifications to applicants, hiring managers, interview team, etc.

• Provide interview questions, content, and appointments
• Automate the pre-employment process, extend job offers, and notify candidates
• Add a new employee into PeopleSoft once offered a position with a district
The PeopleSoft Recruiting Project encompasses onboarding and offboarding, plus the implementation of PeopleSoft modern user interfaces, navigation, and fluid solutions that support the districts’ business processes.

The implementation will also enable functionality for job posting for both internal and external candidates on the SDCOE primary career site and each school district’s career site page.
Our Customers:
1. Alpine
2. Cajon Valley
3. Encinitas
4. Escondido High
5. Grossmont
6. Lemon Grove
7. Mountain Empire
8. Poway
9. Ramona
10. SDCOE
11. Solana Beach
12. South Bay
13. Chula Vista
ESSER II funding will be used to cover the external costs of the Recruiting Project!

- Consulting cost for the design
- Configuration
- Programming
- Testing
- Training
- Tools/plug-in

- Project management
- Change management
- Support of implementing recruiting and post support for issues of the system
- Automating integration, user interfaces, and portal career sites

NO ADDITIONAL COST!

# ROLES & RESPONSIBILITIES

<table>
<thead>
<tr>
<th>Project Role</th>
<th>Responsibilities</th>
</tr>
</thead>
</table>
| Executive Steering Committee                     | • Key people that assist the project manager in making decisions and moving the project forward  
  • Provides leadership in support of the project on behalf of stakeholders  
  • Resolves issues escalated by the project manager or project team |
| Project Manager                                  | • Oversees the project work plan through management, review, and prioritization  
  • Leads project team that is responsible for achieving the project objectives  
  • Responsible for ensuring project goals, objectives and deliverables are accomplished on time, on budget  
  • Creates project plan and deliverables with project leads  
  • Schedules and facilitates project team meetings  
  • Provides status and progress reviews to Executive Sponsor and Steering Committee  
  • Manages and leads various team resources  
  • Brings issues and recommends resource and policy changes to the Steering Committee as needed  
  • Motivates and coaches team members  
  • Coordinates to develop Communications, Risk Management, Training and Testing plans |
| Project Core Team & District Extended Team       | • Assigned full or part time to project activities  
  • Provides source information to the team  
  • Provides business understanding of the organization  
  • Represents the user area in identifying procedures  
  • Reviews and confirms major products for the project  
  • Participates in requirements gathering sessions, design and User Acceptance Testing (UAT)  
  • Watches recordings for any sessions they are unable to attend |
| Stakeholders                                     |                                                                                                                                                |
SUCCESS CRITERIA

Upon completion of this project, our Stakeholders will:

1. Reduce manual operation for setting up new employees
2. Receive direct system access for posting open positions and managing the hiring process
3. Utilize a more intuitive user interface
4. Utilize an automated and streamlined Recruiting process
5. Utilize a standard system process rather than manual or disconnected processes
