

## Brown County FIRST Robotics

**WHO:** Teams of 7-8 Students from 5<sup>th</sup> and 6<sup>th</sup> Grades

**Parents Needed to help mentor teams – ROBOT & SCIENCE PROJECT**

**WHAT:** Build a Robot from LEGO Technic Bricks, and program it to complete as many of this years LEGO obstacles as possible before competition.

Teams must also complete a science fair project on this years topic “Cargo Connect” and how we get items from manufacturers to users more quickly.

**WHEN:** September 12<sup>th</sup> Kickoff at Foxview Library 4:30-5:30 pm (12 week season begins)

12 Week Season culminates with November 12/13<sup>th</sup> Competition at Lakeshore Technical College

NOTE: Teams can advance to State Level Competition, but rare for rookie teams.

During this period, teams will meet twice weekly from approx. 5:00 to 7:00 pm

Evenings TBD when we get teams/parents together for discussion

**WHERE:** Foxview Intermediate School – Library

**WHY:** FIRST LEGO League inspires students to learn building, design, programming, and other technical skills at an early age. In future years, we will be starting FIRST Tech Challenge Teams for 7<sup>th</sup> to 9<sup>th</sup> grades, and this is a great primer to prepare students for that level.

**COST:** Requested \$40 donation to cover T-shirts/supplies

**NOTE:** No student will **EVER** be turned away because they are unable to pay, just pull us aside and let us know.
