

Our Mission Statement:

It is the mission of the school counseling department to create a program that should address the academic, social/emotional, and career areas of the Deer Park students and **to have an open door to those in need**. The counseling department seeks to grow life-long learners with the supported efforts from the entire educational staff, parents, guardians, and the community at-large, as well as local and area businesses. These students should possess the skills to grow and adapt in our ever-changing society in order to be competitive workers and learners in the 21st century. Deer Park students should feel confident in their academic abilities as well as their interpersonal skills, and display respect for others and respect for themselves. The final path for the Deer Park student is to become a contributing member of our society who is both successful in the career path of their choice and the relationships in their lives. It is our mission to support, educate and nurture our students as they travel down this path towards an ever-changing and challenging future.
