

Dear Parent(s)/Guardian(s),

IV Renovation Update – Tuesday, September 13, 2022

The renovations scheduled for this school year continue to move forward. Phase 1 construction, which is the new addition to the front of the building, is getting ready to pour footers and flatwork. We are looking forward to the completion of the base and the start of framing.

Phase 2, renovation work in the 8<sup>th</sup> grade E-Wing is continuing and Phase 3A is ahead of schedule at the present time. Phase 3A is the lower level across from the gym where the tech. ed. room, weight room, health room, and IVTV were housed. This is being gutted and opened up for the new locker rooms, weight room, and elevator. A few photos below.

Additionally, there is a lot of electrical, plumbing, and HVAC work being completed around the corridors and hallways. I will continue to update you as we move forward through the phases of the renovations to Indian Valley. It will be beautiful!

Jeff Pammer, Ed.D.

Principal

Indian Valley Middle School
