Over-the-Counter Medication Authorization

Students in grades 6-12 may be administered school provided non-prescription, over-the-counter medications while at school provided the following guidelines are met:

- Parent or guardian's written authorization is present.
- Dose administered will not exceed the recommended dosage on the labeled container.
- Your student must not be allergic to any ingredients of the medication listed below.
- Parent or guardian must provide medication if "OTHER" is checked and filled out. *This includes Children's Liquid/Chewable Pain Relief medications.*
- Parent or guardian may be asked to provide student's own bottle of medication if needing the medication frequently.
- Authorization must be renewed yearly.

By checking and authorizing administration of over-the-counter medications to my son/daughter during school hours, I release school personnel from any liability in relation to this request when medication is given as directed. I will notify the school health office of any change in the medication (dose change, discontinuation of medication, etc.). I give permission for the school health service office to communicate with school staff about the action and side effects of medications on a need to know basis. I also give permission to the assigned teacher/responsible adult to administer the medications on a field trip following school protocol.
Please note that some medications may be generic. Please contact the Health Office if you have any questions or concerns.
