### Important News

#### Care Plans

Asthma-Allergy-Seizure-Diabetic

If your student has any of the above health conditions we need a signed Plan of Care on file in the health office, along with any emergency medications they may need at school, and the latest written M.D orders.

[You can find the recommended forms online Silver Creek Website under the health tab.](#)

Turn these forms into the School Health Office as Soon as Possible

### Medications at School

"Medication" includes all medicine/treatment prescribed by a physician and any non-prescribed (over-the counter) drugs/remedies.

Before any medications may be administered to any student, the school requires written authorization of the guardian, and in some cases a physician.

Medication must be brought into the school by a guardian, or someone over 18yrs old, in its original container, labeled w/ the student's name and sign the proper documents.

**No Student is Allowed to Carry any Medication with them at school, unless previous self-administration documents are signed and on file in the Health Clinic.**

Please Drop off any medications your student may need while attending school.

### Immunizations

Are your student's up-to-date with their required immunizations? Indiana Statues require immunizations for every child present in this state. Every guardian is responsible for ensuring that their child(ren) receives the required immunizations. **Please provide a copy of your student's most recent up-to-date vaccine records to the SCHS Health Clinic**
