INDEPENDENT AUDITOR'S REPORT

Board of School Directors
Forbes Road School District
Waterfall, Pennsylvania

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activity, each major fund, and the aggregate remaining fund information of Forbes Road School District, as of and for the year ended June 30, 2021, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activity, each major fund and the aggregate remaining fund information of Forbes Road School District, as of June 30, 2021, and the respective changes in financial position, and where applicable, cash flows thereof and the respective budgetary comparison for the General Fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As disclosed in Note 1 to the financial statements, the District adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 84, *Fiduciary Activities*, as of July 1, 2020. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 4 - 11 and the required supplementary information as listed in the Contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries with management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Matters (Continued)

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Forbes Road School District's basic financial statements. The Schedule of Changes in Student Group Balances - Fiduciary Fund Type - Student Activity Fund is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The Schedule of Changes in Student Group Balances - Fiduciary Fund Type - Student Activity Fund is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting or other records used to prepare the basic financial statements, or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Changes in Student Group Balances - Fiduciary Fund Type - Student Activity Fund is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

**FORBES ROAD SCHOOL DISTRICT
MANAGEMENT’S DISCUSSION & ANALYSIS (MD&A)
FOR THE YEAR ENDED JUNE 30, 2021**

The management’s discussion and analysis of Forbes Road School District’s (District) financial performance provides an overview of the District’s financial activities for the fiscal year ended June 30, 2021. The intent of this discussion and analysis is to look at the District’s financial performance as a whole; readers should also review the financial statements and the notes to the basic financial statements to enhance their understanding of the District’s financial performance.

Management’s Discussion & Analysis (MD&A) is an element of the reporting model adopted by the Governmental Accounting Standards Board (GASB) in GASB’s Statement No. 34, *Basic Financial Statements and Management’s Discussion and Analysis for State and Local Government*, issued in June 1999. Certain comparative information between the current year and the prior year is required to be presented in MD&A.

Financial Highlights

Property Taxes

The District’s real estate tax rate for the 2020-2021 fiscal year was 35.042 mills (\$35.04 per \$1,000 assessed valuation) which took effect with the July 2020 tax levy. There was no increase in the real estate tax rate from the 2019-2020 fiscal year. The total assessed valuation on which the July 2020 real estate tax levy was based was \$72,875,210.

Property Tax Reduction Allocation

During the 2020-2021 fiscal year, the District used \$172,753 of state property tax reduction funds, received from the Commonwealth of Pennsylvania under the provisions of the Taxpayer Relief Act (Act 1 of 2006), to reduce property tax bills for approved homestead/farmstead properties within the District.

Food Service Fund

For the year ended June 30, 2021, the Food Service Fund showed a net income before transfers of \$11,680. This was a \$137,600 decrease in the net loss before transfers as compared to the 2019-2020 fiscal year. During the current fiscal year, the General Fund transferred \$85,801 to the Food Service Fund, which was \$28,745 less than the amount transferred in the prior fiscal year.

Table A-1 summarizes the major features of the District’s financial statements, including the portions of the District the statements cover and the types of information the statements contain. The remainder of the overview section of MD&A explains the structure and contents of the statements.

Overview of Financial Statements

Government-Wide Statements

The government-wide statements report information about Forbes Road School District, as a whole, using accounting methods similar to those used by private-sector companies. The Statement of Net Position includes all of the government's assets and liabilities. All of the current year's revenues and expenditures are accounted for in the Statement of Activities regardless of when cash is received or paid.

The two government-wide statements report the District's net position and how it has changed. Net position, the difference between the District's total assets and deferred outflows of resources less total liabilities and deferred inflows of resources, is one way to measure the District's financial health or position.

Over time, increases or decreases in the District's net position is an indication of whether its financial health is improving or deteriorating, respectively.

To assess the overall health of the District, additional non-financial factors, such as changes in the District's property-tax base and the performances of students, must be considered.

The government-wide financial statements of the District are divided into two categories:

- **Governmental Activities** - All of the District's basic services are included here, such as instruction, administration and community services. Property taxes and state and Federal subsidies and grants finance most of these activities.
- **Business-Type Activities** - The District operates a food service program and charges fees to students, staff and visitors to cover the cost of the food service operation.

Fund Financial Statements

The District's fund financial statements provide detailed information about the most significant funds - not the District as a whole. Some funds are required by state law or by bond requirements.

Governmental Funds - Most of the District's activities are reported in governmental funds, which focus on the determination of financial position and change in financial position, not on income determination. They are reported using the modified-accrual method of accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental-fund statements provide a detailed short-term view of the District's operations and the services it provides. Governmental fund information helps the reader determine whether there are more or fewer financial resources that can be spent in the near future to finance the District's programs. The relationship (or differences) between governmental activities (reported in the Statement of Net Position and the Statement of Activities) and governmental funds is reconciled in the financial statements.

Fund Financial Statements (Continued)

Proprietary Funds - These funds are used to account for the District's activities that are similar to business operations in the private sector, or where the reporting focuses on determining net income, financial position, changes in financial position, and where a significant portion of funding comes through user charges. When the District charges customers for services it provides, whether to outside customers or to other units in the District, these services are generally reported in proprietary funds. The Food Service fund is the District's only proprietary fund and corresponds to the business-type activities reported in the government-wide statements.

Fiduciary Funds - The District is the trustee, or fiduciary, for several scholarship and student activity funds. All fiduciary activities are reported in a separate column on the Statement of Net Position. We exclude these activities from the District's other financial statements because the District cannot use these assets to finance operations.

Financial Analysis of the District as a Whole

The District's total net position was \$(4,179,246) as of June 30, 2021.

Most of the District's net position is invested in capital assets (land, buildings and equipment). The remaining net position consists of amounts either unrestricted or restricted for a specific purpose. The restricted balances are amounts set aside to fund future capital purchases or projects planned by the District.

The results of this year's operations, as a whole, are reported in the Statement of Activities. All expenses are reported in the first column. Specific charges, grants, revenues and subsidies that directly relate to specific expense categories are presented to determine the final amount of the District's activities that is supported by other general revenues. The two largest general revenues are the Basic Education Subsidy provided by the Commonwealth of Pennsylvania and the local taxes assessed to community taxpayers.

**RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET
TO THE STATEMENT OF NET POSITION
June 30, 2021**

Total fund balances - governmental funds	\$	4,829,011
Amounts reported for governmental activities in the Statement of Net Position are different because:		
Capital assets used in governmental activities are not financial resources, and therefore, they are not reported as assets in governmental funds. The cost of assets is \$12,218,698 and the accumulated depreciation is \$5,335,953.		6,882,745
Certain taxes receivable are not available soon enough to pay for current period expenditures, and therefore, are reported as deferred inflows of resources in the fund financial statements.		175,819
Deferred inflows and outflows of resources related to pensions are applicable to future periods, and therefore, they are not reported within the funds. Deferred inflows and outflows related to pensions are as follows (see footnotes for detail):		
Deferred inflows		(381,000)
Deferred outflows		1,669,000
Deferred inflows and outflows of resources related to OPEB are applicable to future periods, and therefore, are not reported within the funds. Deferred inflows and outflows related to OPEB are as follows (see footnotes for detail):		
Deferred inflows		(54,270)
Deferred outflows		383,314
Long-term liabilities, including bonds payable, compensated absences, net pension liabilities, and other post-employment benefits, are not due and payable in the current period, and therefore, they are not reported as liabilities in the funds. Long-term liabilities at year-end consist of:		
General obligation debt	(5,455,000)	
Accrued interest payable	(2,016)	
Compensated absences	(132,348)	
Net pension liability	(9,635,000)

RECONCILIATION OF THE GOVERNMENTAL FUNDS STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES TO THE STATEMENT OF ACTIVITIES
Year Ended June 30, 2021

Net change in fund balances - governmental funds	\$	60,950
<p>Amounts reported for governmental activities in the Statement of Activities are different because:</p>		
<p>Capital outlays are reported in governmental funds as expenditures. However, in the Statement of Activities, the cost of those outlays is allocated over the assets' useful lives as depreciation expense. This is the amount by which depreciation exceeds capital outlays in the period.</p>		
Capital outlays	132,990	
Less depreciation expense	<u>(288,703)</u>	(155,713)
<p>Because some delinquent taxes will not be collected until several months after the District's fiscal year-end, they are not considered as "available" revenues in the governmental funds. Unavailable tax revenue decreased by this amount during the fiscal year.</p>		
		(57,176)
<p>Interest on long-term debt in the Statement of Activities differs from the amount reported in the governmental funds because interest is recognized as an expenditure in the funds when it is due, and thus, requires the use of current financial resources. In the Statement of Activities, interest expense is recognized as the interest accrues, regardless of when it is due. The decrease in interest accrued reflected in the Statement of Activities is shown here.</p>		
		152
<p>Governmental funds report District pension and OPEB contributions as expenditures. However, in the Statement of Activities, the cost of pension and OPEB benefits earned net of employee contributions is reported as pension and OPEB expense.</p>		
District pension and OPEB contributions (PSERS)		977,000
Cost of benefits earned - net of employee contributions (PSERS)		(1,113,860)
<p>Some expenses reported in the Statement of Activities do not require the use of current financial resources, and therefore, they are not reported as expenditures in governmental funds.</p>		
Change in compensated absences	3,324	
Change in other post-employment benefits (District's Plan)	<u>(214,608)</u>	(211,284)
<p>The issuance of long-term debt provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effects of bond premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the Statement of Activities. This amount is the net effect of these differences in the treatment of long-term debt and related items.</p>		
Repayment of long-term debt	<u>413,000</u>	<u>413,000</u>
Changes in net position - governmental activities		<u><u>\$ (86,931)</u></u>

FORBES ROAD SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies

Forbes Road School District (District) operates a public-school system which serves students within the northern area of Fulton County, Pennsylvania. The District operates under current standards prescribed by the Pennsylvania Department of Education in accordance with the provisions of the School Laws of Pennsylvania. The governing body of the District is a locally elected nine-member Board of School Directors.

The financial statements of the Forbes Road School District have been prepared in accordance with accounting principles generally accepted in the United States of America as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the authoritative standard setting body for the establishment of governmental accounting and financial reporting principles. The significant accounting policies of the District are described below:

A. Reporting Entity

The financial statements include only the primary government of Forbes Road School District, which consists of all funds, organizations, institutions, agencies, departments and offices that comprise the District's legal entity. These primary government financial statements do not include financial data for the legally separate component unit, which accounting principles generally accepted in the United States of America require to be included as part of the financial reporting entity.

The Governmental Accounting Standards Board defines the criteria used to determine the composition of the reporting entity. The standards require that the financial reporting entity consists of (a) the primary government, (b) organizations for which the primary government is financially accountable, (c) organizations that are fiscally dependent on the primary government and for which a financial benefit or burden exists, and (d) other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. The District is not a component unit of any other entities. Additionally, the District does not exercise oversight responsibility over any other entities, and consequently, no other entities have been included in the accompanying financial statements.

FORBES ROAD SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies (Continued)

A. Reporting Entity (Continued)

The District is affiliated with the Tuscarora Intermediate Unit #11 (TIU#11) along with eight other member school districts. The District is also affiliated with the Fulton County Center for Career and Technology (FCCCT) along with two other member school districts. The member school districts participate in providing oversight responsibility to the TIU#11 and FCCCT through the following:

- Appointment of Board members who are also Board members of the participating schools
- Approval and funding of operating budgets

Despite the foregoing, the overriding issue is that the volume of participating school districts does not permit Forbes Road School District to exercise “significant influence” over the operations of the TIU#11 and FCCCT; consequently, these entities are not considered “component units” of the Forbes Road School District in determining the “reporting entity” as defined by the Governmental Accounting Standards Board.

B. Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the Statement of Net Position and the Statement of Activities) report information on all of the non-fiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenue, are reported separately from business-type activities, which rely to a significant extent on revenue generated from fees charged to external parties for goods and services.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not included among program revenues are reported as general revenues.

Separate fund financial statements are provided in the report for all of the governmental, proprietary and fiduciary funds of the District, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements. Non-major funds are aggregated and presented in a single column. Fiduciary funds are reported by fund type.

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

The District complies with accounting principles generally accepted in the United States of America (GAAP) and applies all relevant Governmental Accounting Standards Board (GASB) Pronouncements.

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met. Net position (assets plus deferred outflows of resources less liabilities and deferred inflows of resources) are used as a practical measure of economic resources, and the operating statement includes all transactions and events that increased or decreased net position. Property and equipment are capitalized and depreciated over the assets' useful lives. Depreciation is charged as an expense against current operations, and accumulated depreciation is reported the Statement of Net Position. Debt obligations are reported in the Statement of Net Position and payments made on debt reduce the related liabilities. This approach differs from the manner in which governmental fund financial statements are prepared; therefore, the governmental fund financial statements include reconciliations with brief explanations to better identify the relationship between the government-wide financial statements and the governmental fund financial statements.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers tax revenues to be available if they are collected within 60 days of the end of the current fiscal period. Revenues from Federal, state and other grants designated for payment of specific District expenditures are recognized when the related expenditures are incurred; accordingly, when such funds are received, they are recorded as unearned revenues until earned. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt-service expenditures, and expenditures related to compensated absences and claims and judgements, are recorded only when payment is due.

When both restricted and unrestricted (including committed, assigned and unassigned) resources are available for use, it is the District's policy to generally use the resources with the most stringent restrictions first, followed by resources in decreasing order of restriction, as funds are needed. However, the District does use unassigned monies at times to pay for expenditures that may have been Board committed.

Governmental funds are those through which most governmental functions of the District are financed. The acquisition, use and balances of the District's expendable financial resources and related liabilities (except those accounted for in proprietary funds) are accounted for through governmental funds.

FORBES ROAD SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies (Continued)

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation (Continued)

The District reports the following major types of funds:

Governmental Funds:

Governmental funds are those through which most governmental functions of the District are financed. Governmental fund reporting focuses on the sources, uses and balances of current financial resources. Expendable assets are assigned to the various governmental funds according to the purposes for which they may be used. Current liabilities are assigned to the fund from which they will be paid. The difference between governmental fund assets and liabilities is reported as fund balance.

General Fund

The General Fund is the District's primary operating fund and is always classified as a major fund. It accounts for all financial resources except those required to be accounted for in another fund. Revenues are primarily derived from local property, earned income, and per capita taxes, and state and Federal distributions. Many of the more important activities of the District, including instruction, administration of the District, and certain non-instructional services are accounted for in this fund.

Capital Projects Fund

The Capital Projects Fund is used to account for and report financial resources that are restricted, committed, or assigned to expenditures for capital outlays, including the acquisition or construction of capital facilities and other capital assets (other than those financed by proprietary funds). There are no major Capital Projects Funds for the District.

Proprietary Funds:

Proprietary funds are used to account for business-like activities provided to the general public. These activities are financed primarily through user charges, and the measurement of financial activity focuses on net income measurement similar to the private sector. The District operates one proprietary fund that is reported as a major fund:

The Food Service Fund is used for all financial transactions related to food-service operations. Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the proprietary fund's principal, on-going operations. The principal operating revenues of the District's proprietary fund are food-service charges. Operating expenses for the District's proprietary fund include food-production costs, supplies, administrative costs, and depreciation of capital assets. All revenues or expenses not meeting these classifications are reported as non-operating revenues and expenses. The District does not attempt to allocate "building-wide costs" to the Food Service Fund. Thus, General Fund expenditures which partially benefit the Food Service Fund (utilities, janitorial services, insurance, etc.) are not proportionately recognized within the Food Service Fund; similarly, the Food Service Fund does not recognize a cost for the building space it occupies (no rental-of-facilities expense).

FORBES ROAD SCHOOL DISTRICT

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation (Continued)

Fiduciary Funds:

Fiduciary funds are used to account for assets held by the District in a trustee or agent capacity. There are two major types of fiduciary funds: trust funds established by a formal trust agreement that places restrictions on the use of the fund's assets; and custodial funds that account for the resources of another entity for which the District has custodial responsibility.

Private-purpose trust funds are used to report all trust agreements under which principal and interest benefit individuals, private organizations, or other governments. Custodial funds account for school activities such as various clubs and class funds. Student activity funds are addressed in Section 511 of the Public School Code. Custodial funds are accounted for using the accrual basis of accounting. The District has no pension or investment trust funds, but reports the following private-purpose trust and custodial funds:

Scholarship Fund

This private-purpose trust fund accounts for assets held by the District in a trustee capacity. It accounts for activities of the various scholarship accounts, the sole purpose of which is to provide annual scholarships to students as prescribed by donor stipulations.

Student Activity Fund

This custodial fund accounts for monies authorized by Section 511 of the Public-School Code of 1949 for school publications and organizations.

D. Budgets and Budgetary Accounting

An operating budget, prepared in accordance with the modified-accrual basis of accounting, is adopted for the General Fund prior to the beginning of each fiscal year. The General Fund is the only fund for which a budget is legally required. The Pennsylvania School Code dictates specific procedures relative to adoption of the District's budget and reporting of its financial statements:

- The District, before levying annual school taxes, is required to prepare an operating budget for the succeeding fiscal year.
- The District is required to publish notice by advertisement, at least once in two newspapers of general circulation in the municipality in which it is located, and within fifteen days of final action, that the proposed budget has been prepared and is available for public inspection at the administrative office of the District.
- Notice that public hearings will be held on the proposed operating budget must be included in the advertisement; such hearings are required to be scheduled at least ten days prior to when final action on adoption is taken by the Board.

D. Budgets and Budgetary Accounting (Continued)

Legal budgetary control is maintained at the sub-function/major-object level. The Board may make transfers of funds appropriated to any particular item of expenditure by legislative action in accordance with the Pennsylvania School Code. Management may amend the budget at the sub-function/sub-object level without Board approval. Appropriations lapse at the end of the fiscal period. Budgetary information reflected in the financial statements is presented at or below the level of budgetary control and includes the effects of approved budget amendments, if applicable.

E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position or Fund Balance

Cash and Cash Equivalents: For purposes of the Statement of Cash Flows presented for the proprietary fund, the District considers all highly-liquid investments with maturities of three months or less when purchased to be cash equivalents.

Investments: Investments are stated at fair value or at amortized costs, depending on the investment type, consistent with generally accepted accounting principles.

Allowance for Estimated Uncollectible Taxes and Delinquent Property Taxes: The allowance for estimated uncollectible taxes is based upon an historical estimate of delinquent taxes that will not be received within one year of the fiscal year-end. Delinquent property taxes are based upon an historical estimate of delinquent taxes expected to be received within one year of the fiscal year-end. The portion of taxes which is expected to be received within sixty days of June 30 is recorded as revenue in the current year. The remaining amount of taxes which is expected to be received within one year from June 30 is recorded as delinquent property taxes. All other taxes receivable are written off as estimated uncollectible taxes.

Inventories: Governmental funds record the cost of inventory items as expenditures when purchased. Food Service Fund inventories are presented at the lower of cost or market on a first-in, first-out basis, and are recorded as expenditures when used.

A physical inventory of the Food Service Fund's food and supplies was taken as of June 30, 2021. The inventory consisted of government donated commodities which were valued at estimated fair market value, and purchased commodities and supplies, valued at cost using the first-in, first-out method. The District has adopted an inventory recordkeeping system which distinguishes between donated and purchased commodities. Accordingly, unearned revenue for donated commodities received, but not used, has been recorded.

Prepaid Expenses: Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items (consumption method) in both the government-wide and fund financial statements.

FORBES ROAD SCHOOL DISTRICT

Note 1. Summary of Significant Accounting Policies (Continued)

E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position or Fund Balance (Continued)

Capital Assets and Depreciation: Capital assets, which include property, plant, and equipment, are reported in the applicable governmental or business-type activities column in the government-wide financial statements. Capital assets with an original unit cost of \$4,000 or greater are capitalized, unless assets are acquired by debt proceeds, in which case the assets must be capitalized. Management considers various factors in the capitalization of assets, including the assets' estimated useful lives, their costs and the extent to which the assets are components of larger capital projects. All purchased capital assets are valued at cost when historical records are available and at an estimated historical cost when no historical records exist. Donated capital assets are valued at their estimated fair market values on the dates of donation. The costs of normal maintenance and repairs that do not add to the values of the assets or materially extend assets' lives are not capitalized. Depreciation is provided for capital assets on the straight-line basis over the estimated useful lives of the assets or groups of assets as determined by management.

Deferred Outflows of Resources - Deferred Amounts on Refunding Debt: The District recognizes the difference between the re-acquisition price and the net carrying amount of the old debt as a deferred outflow and recognizes it as a component of interest expense over the remaining life of the old or new debt, whichever is shorter.

Deferred Outflows of Resources - Pensions: The District recognizes the difference between expected and actual experience, changes in assumptions, net difference between projected and actual investment earnings, changes in proportion, the difference between employer contributions and proportionate share of total contributions, and the contributions subsequent to the measurement date as deferred outflows of resources. These amounts are amortized over the average remaining service lives of active and inactive members.

Deferred Outflows of Resources - Other Post-Employment Benefits: The District recognizes changes in assumptions, net difference between projected and actual investment earnings, benefit payments subsequent to the measurement date and contributions subsequent to the measurement date as deferred outflows of resources. These amounts are amortized over the average remaining service lives of active and inactive members.

Long-Term Obligations: In the government-wide financial statements and in the proprietary-fund type in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental or business-type activity columns in the Statement of Net Position. Bond premiums and discounts, as well as the cost of bond insurance, are deferred and amortized over the lives of the respective issues using the effective-interest method. Bonds payable are reported net of applicable bond premiums or discounts. Bond insurance costs are reported as deferred charges and amortized over the terms of the related debt. Other bond issuance costs are expensed at the time the debt is issued.

FORBES ROAD SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies (Continued)

E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position or Fund Balance (Continued)

In the fund financial statements, governmental fund types recognize bond premiums and discounts as expenditures during the current period. The face amount of the debt issued is reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Compensated Absences: Under the system of financial accounting and reporting for Pennsylvania School Systems, the District accrues certain accumulated employee benefits, such as unpaid vacation, sick and personal days. Calculation of this amount is determined by the appropriate vacation, sick, personal and retirement lump-sum payments which would be available to employees if they would leave or retire from the District. Accrued benefit days, multiplied by appropriate rates per employment contracts, are reflected as a long-term liability unless retirements are likely within the upcoming fiscal year. The value of future compensated absences is reflected as a liability in the Statement of Net Position.

Other Post-Employment Benefits: In the government-wide financial statements, the District recognizes the costs and liabilities associated with post-employment benefits other than pension compensation. The District participates in two plans the first is a single employer plan administered by the District. The plan provides retiree health, dental and prescription drug coverage to eligible, retired employees and qualified spouses/beneficiaries. The District has estimated the cost of providing these benefits through an actuarial valuation.

The District also participates in a governmental, cost sharing, multiple employer, other post-employment benefit plan (OPEB) with the Public School Employees' Retirement System (PSERS) for all eligible retirees who qualify and elect to participate. For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of PSERS and additions to/deductions from PSERS' fiduciary net position have been determined on the same basis as they are reported by PSERS. For this purpose, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Additional disclosures related to other post-employment benefits of the District’s Single Employer Plan and PSERS Cost Sharing Plan are in Notes 12 and 13, respectively.

Pensions: For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Public School Employees’ Retirement System (PSERS) and additions to/deductions from PSERS’ fiduciary net position have been determined on the same basis as they are reported by PSERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Interfund Activity: Advances between funds that are not expected to be repaid are accounted for as transfers. In those cases where repayment is expected, the advances are accounted for through the various “due from” and “due to” accounts. In the fund financial statements, short-term interfund loans are classified as interfund balances. These amounts are eliminated in the Statement of Net Position, except for amounts between governmental and business-type activities, which are presented as internal balances.

E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position or Balance (Continued)

Deferred Inflows of Resources - Pensions: The District recognizes its share of the difference between projected earnings and actual investments and the difference between expected and actual experience of their pension plan as deferred inflows of resources. These amounts are amortized over the average remaining services lives of active and inactive members.

Deferred Inflows of Resources - Other Post-Employment Benefits: The District recognizes the changes in assumptions, changes in proportions and the difference between employer contributions and proportionate share of total contributions as deferred inflows of resources. These amounts are amortized over the average remaining service lives of active and inactive members.

Deferred Inflows of Resources - Delinquent Property Taxes: The District recognizes the property tax revenues when they become available. Available includes those property tax receivables expected to be collected within sixty days after year-end. Those property tax receivables expected to be collected after sixty days after year-end are shown as deferred inflows of resources in the fund financial statements. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned.

Equity Classifications:

Government-Wide Statements: Equity is classified as Net Position and is displayed in three components.

Net investment in capital assets: Consists of capital assets, including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances on any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvements of those assets.

Restricted: Consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets and is restricted because (1) constraints or limits are externally imposed by creditors, grantors, contributors or laws and regulations of other governments, or by (2) constitutional provisions or enabling legislation.

Unrestricted: Net amount of assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted component of net position.

It is the District's policy to first use restricted net resources prior to the use of unrestricted net resources when an expense is incurred for the purposes for which both restricted and unrestricted net resources are available.

Fund Financial Statements: The District's fund financial statement classifications are defined and described as follows:

Nonspendable: Represents fund balance amounts that cannot be spent because they are not in a spendable form or are legally or contractually required to be maintained intact.

Restricted: Represents fund balance amounts that are constrained for a specific purpose through restrictions of external parties, through constitutional provisions, or by enabling legislation.

Committed: Represents fund balance amounts that can only be used for specific purposes pursuant to the constraints imposed by formal action of the Board, the District's highest level of decision making authority. Committed amounts cannot be used for any other purpose unless the Board removes the constraints or changes the specified purpose through the same action it used to commit the funds.

Assigned: Represents fund balance amounts that are constrained by the government's intent to be used for a specific purpose but are neither restricted or committed. Fund balance may be assigned by the governing body itself or a body or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes.

Unassigned: Represents fund balance amounts that have not been restricted, committed, or assigned to specific purposes within the General Fund.

It is the District's policy to use unrestricted resources in the following order: unassigned, assigned, then committed.

The District does not have a formal minimum fund balance policy. It is the District's policy to use unrestricted resources in the following order: unassigned, assigned and then committed.

Use of Estimates: Management uses estimates and assumptions in preparing financial statements. These estimates and assumptions affect the reported amounts of assets and liabilities and the reported revenue, expenditures/expenses and disclosures. Actual results could differ from these estimates.

Restatement of Net Position and Fund Balance Beginning Balances: As of July 1, 2020, the District implemented Governmental Accounting Standards Board Statement GASB No. 84, *Fiduciary Activities*. The implementation of GASB No. 84 required the District to report income and expenses for student sponsored activity fund. This change has resulted in a restatement of the Fiduciary net position of \$120,917.

As of July 1, 2020, the District updated the allocation method for pension and OPEB liabilities between Governmental Activities and Business-Type Activities. This change resulted in a restatement of government-wide net position of \$(17,872) and business type activities net position of \$17,695.

Section 440.1 of the Public-School Code of 1949 as amended and supplemented by Act 10 of 2016 define allowable investments for school districts, which are summarized as follows:

- United States Treasury Bills
- Short-term obligations of the U.S. Government or its agencies or instrumentalities
- Deposits in savings accounts or time deposits or share accounts of institutions insured by the Federal Deposit Insurance Corporation (FDIC) or the Federal Savings and Loan Insurance Corporation (FSLIC) or the National Credit Union Share Insurance Fund (NCUSIF) to the extent that such accounts are so insured, and, for any amounts above the insured maximum, provided that approved collateral as provided by law therefore shall be pledged by the depository
- Obligations of the United States of America or any of its agencies or instrumentalities backed by the full-faith and credit of the United States of America, the Commonwealth of Pennsylvania or any of its agencies or instrumentalities backed by the full-faith and credit of the political subdivision
- Shares of an investment companies registered under the Investment Company Act of 1940
- Local Government Investment Pools
- Repurchase agreements with respect to U.S. Treasury bills or obligations, participations or other instruments of or guaranteed by the U.S. or any Federal agency, instrumentality or U.S. government-sponsored enterprise
- Obligations, participations or other instruments of any Federal agency, instrumentality or U.S. government-sponsored enterprise if the debt obligations are rated at least "A" or its equivalent
- Commercial paper issued by corporations or other business entities organized in accordance with federal or state law, with a maturity not to exceed 270 days
- Bills of exchange or time drafts drawn on and accepted by a commercial bank, otherwise known as bankers' acceptances, if the bankers' acceptances do not exceed 180 days maturity
- Negotiable certificates of deposit or other evidence of deposit, with a remaining maturity of three years or less

The deposit and investment policies of the District adhere to state statutes and prudent business practices. There were no deposit or investment transactions during the year that violated either state statutes or District policies.

Act 72 of 1971, as amended, is an act standardizing the procedures for pledges of assets to secure deposits of public funds with banking institutions pursuant to other laws; establishing a standard rule for the types, amounts and valuations of assets eligible to be used as collateral for deposits of public funds; permitting assets to be pledged against deposits on a pooled basis and authorizing the appointment of custodians to act as the pledgers of the assets.

As of June 30, 2021, the District had the following investments:

	Credit Rating	Weighted Average Maturity	Carrying Value
Pennsylvania Local Government Investment Trust (PLGIT)			
Class	AAAm	91 days	\$ 500
Reserve-Class	AAAm	91 days	5,625
Pennsylvania School District Liquid Asset Fund (PSDLAF)			
Max Series (PSDMAX)	AAAm	54 days	1,236,940
			<u>\$ 1,243,065</u>

Portfolio Assets

Certain external pool investments held by the District, based on portfolio maturity, quality, diversification, and liquidity measures, qualify for measurement at amortized cost at both the pool and the participating government levels consistent with GASB Statement No. 79. The District measures those investments, which include PLGIT and PSDLAF-Max Series, at amortized cost.

Note 2. Deposits and Investments (Continued)

Portfolio Assets (Continued)

PLGIT Portfolio - This fund invests primarily in U.S. Treasury and Federal agency securities and repurchase agreements secured by such obligations, as well as certain municipal obligations and collateralized or insured certificates of deposit. Weighted-average portfolio maturity for the fund is expected to be kept at or below 60 days. PLGIT Portfolio offers its participants PLGIT-Class and PLGIT/Reserve-Class shares. This investment has no minimum initial investment requirement and has a minimum investment period of one day.

PSDMAX - This fund invests in U.S. Treasury obligations, securities issued by the U.S. government, its agencies and instrumentalities, collateralized or government agency LOC-backed bank deposits, and repurchase agreements collateralized by such securities and contracted with highly-rated counterparties. The fund is required to maintain a weighted-average portfolio maturity of no longer than 60 days. PSDLAF does not have limitation or restrictions on withdrawals.

The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; and Level 3 inputs are significant unobservable inputs. Presently, the investments currently held by the District are valued at amortized cost and are not subject to the fair value categorization disclosures.

Weighted-Average Maturity

The weighted-average maturity (WAM) method expresses investment time horizons, the time when investments become due and payable, in years or months, weighted to reflect the dollar-size of individual investments within an investment type. WAMs are computed for each investment type. A portfolio's WAM is derived by dollar-weighting the WAM for each investment type.

Interest-Rate Risk

The District does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Credit Risk

As indicated above, Section 440.1 of the Public-School Code of 1949, as amended, limits the composition of the District's investments, and the District has no investment policy that would further limit its investment choices.

Concentrations of Credit Risk

The District places no limit on the amounts invested in any one issuer. The District's investments in PLGIT and PSDLAF represent 1% and 99%, respectively, of the District's total investments.

General Obligation Note - Series of 2002 - On November 13, 2002, the District issued an \$8,410,000 General Obligation Note. The proceeds were used to finance the costs of acquisition, construction or renovation of certain school facilities. The note is due in annual installments ranging from \$5,000 to \$572,000 through May 25, 2032. The note bears interest at a variable Loan Weekly Rate provided to the Trustee by the Program Administrator with a maximum annual rate of 15%; interest is paid monthly. On June 4, 2013, the District entered into a new agreement to secure a fixed interest rate of 2.217% through May 25, 2023, at which time the interest rate will return to a variable Loan Weekly Rate. The note is secured by the full faith, credit and taxing power of the District.

The District is in compliance with all debt covenants of the outstanding debt issues. Those covenants include the following: the District shall include the annual debt service in its budget for the fiscal year, shall appropriate these amounts from its general revenues, and shall punctually cause the payment of the principal and interest of each of the debt obligations.

Future maturities of the long-term debt are as follows:

Note 11. Defined-Benefit Pension Plan

Plan Description

PSERS (System) is a governmental cost sharing, multiple employer defined-benefit pension plan that provides retirement benefits to public school employees of the Commonwealth of Pennsylvania. The members eligible to participate in the System include all full-time public-school employees, part-time hourly public-school employees who render at least 500 hours of service in the school year, and part-time per diem public school employees who render at least 80 days of service in the school year in any of the reporting entities in Pennsylvania. PSERS issues a publicly available financial report that can be obtained at www.psers.pa.gov.

Benefits Provided

PSERS provides retirement, disability and death benefits. Members are eligible for monthly retirement benefits upon reaching (a) age 62 with at least 1 year of credited service; (b) age 60 with 30 or more years of credited service; or (c) 35 or more years of service regardless of age. Act 120 of 2010 (Act 120) preserves the benefits of existing members and introduced benefit reductions for individuals who become new members on or after July 1, 2011. Act 120 created two new membership classes, Membership Class T-E (Class T-E) and Membership Class T-F (Class T-F). To qualify for normal retirement, Class T-E and Class T-F members must work until age 65 with a minimum of 3 years of service or attain a total combination of age and service that is equal to or greater than 92 with a minimum of 35 years of service. Benefits are generally equal to 2% or 2.5%, depending upon membership class, of the member's final average salary (as defined in the Code) multiplied by the number of years of credited service. For members whose membership started prior to July 1, 2011, after completion of five years of service, a member's right to the defined benefits is vested and early retirement benefits may be elected. For Class T-E and Class T-F members, the right to benefits is vested after ten years of service.

Participants are eligible for disability retirement benefits after completion of five years of credited service. Such benefits are generally equal to 2% or 2.5%, depending upon membership class, of the member's final average salary (as defined in the Code) multiplied by the number of years of credited service, but not less than one-third of such salary nor greater than the benefit the member would have had at normal retirement age. Members over normal retirement age may apply for disability benefits.

Death benefits are payable upon the death of an active member who has reached age 62 with at least one year of credited service (age 65 with at least three years of credited service for Class T-E and Class T-F members) or who has at least five years of credited service (ten years for Class T-E and Class T-F members). Such benefits are actuarially equivalent to the benefit that would have been effective if the member had retired on the day before death.

Contributions

Member Contributions:

Active members who joined the System prior to July 22, 1983, contribute at 5.25% (Membership Class T-C) or at 6.50% (Membership Class T-D) of the member's qualifying compensation.

Members who joined the System on or after July 22, 1983, and who were active or inactive as of July 1, 2001, contribute at 6.25% (Membership Class T-C) or at 7.50% (Membership Class T-D) of the member's qualifying compensation.

Members who joined the System after June 30, 2001 and before July 1, 2011, contribute at 7.50% (automatic Membership Class T-D). For all new hires and for members who elected Class T-D membership, the higher contribution rates began with service rendered on or after January 1, 2002.

Contributions (Continued)

Member Contributions (Continued):

Members who joined the System after June 30, 2011, automatically contribute at the Membership Class T-E rate of 7.5% (base rate) of the member's qualifying compensation. All new hires after June 30, 2011, who elect Class T-F membership, contribute at 10.3% (base rate) of the member's qualifying compensation. Membership Class T-E and Class T-F are affected by a "shared risk" provision in Act 120 of 2010 that in future fiscal years could cause the Membership Class T-E contribution rate to fluctuate between 7.5% and 9.5% and Membership Class T-F contribution rate to fluctuate between 10.3% and 12.3%.

Employer Contributions:

The Districts' contractually required contribution rate for the fiscal year ended June 30, 2021, was 34.51% of covered payroll, actuarially determined as an amount that, when combined with employee contributions, is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The 34.51% rate is composed of a contribution rate of 33.69% for pension benefits and 0.82% for healthcare-insurance premium assistance (OPEB benefits).

The District is required to pay the entire contribution and will be reimbursed by the Commonwealth in an amount equal to the Commonwealth's share as determined by the income-aid ratio (as defined in Act 29 of 1994), which is at least one half of the total District's rate. The District's contributions to the Plan, relating to pension benefits, for the year ended June 30, 2021 was \$958,008, and is equal to the required contribution for the year. For the year ended June 30, 2021, the District recognized gross retirement subsidy revenue from the Commonwealth in the amount of \$591,791.

Pension Liabilities, Pension Expense, and Deferred Outflows/Inflows of Resources Related to Pensions

At June 30, 2021, the District reported a liability of \$9,946,000 for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2020, and the total pension liability used to calculate the net pension liability was determined by rolling forward the System's total pension liability as of June 30, 2019 to June 30, 2020. The District's proportion of the net pension liability was calculated utilizing the employer's one-year reported covered payroll as it relates to the total one-year reported covered payroll. At June 30, 2021, the District's proportion was 0.0202 percent, which was an increase of 0.0004 percent from its proportion measured as of June 30, 2020.

Actuarial Assumptions

The total pension liability as of June 30, 2020, was determined by rolling forward the System's total pension liability as of June 30, 2019 to June 30, 2020, using the following actuarial assumptions, applied to all periods included in the measurement:

- Actuarial cost method - Entry Age Normal - level % of pay.
- Investment return - 7.25%, includes inflation at 2.75%.
- Salary growth - Effective average of 5.00%, comprised of inflation of 2.75% and 2.25% for real wage growth and for merit or seniority increases.
- Mortality rates were based on the RP-2014 Mortality Tables for Males and Females, adjusted to reflect PSERS' experience and projected using a modified version of the MP-2015 Mortality Improvement Scale.

The actuarial assumptions used in the June 30, 2020 valuation were based on the results of an actuarial experience study that was performed for the five year the period ended June 30, 2015.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The pension plan's policy in regard to the allocation of invested plan assets is established and may be amended by the PSERS Board. Plan assets are managed with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the pension.

The above was the PSERS Board's adopted asset allocation policy and best estimates of geometric real rates of return for each major asset class as of June 30, 2020.

Discount Rate

The discount rate used to measure the total pension liability was 7.25%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate and that contributions from employers will be made at contractually required rates, actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Plan Payables

At June 30, 2021, the District has payables to the PSERS pension plan of \$357,570. This total is composed of staff payroll accruals and the quarterly PSERS payment amount for retirement contributions in the second quarter of 2021.

Pension Reform

Pursuant to Commonwealth Act 2017-5, members hired on or after July 1, 2019, are required to choose one of three new retirement plan design options for retirement benefits. The current defined benefit plan will no longer be available to new members hired on or after July 1, 2019. The new plan design options include two hybrid plans consisting of defined benefit and defined contribution concepts. The third option is a standalone defined contribution plan. PSERS school employers will be charged interest at the assumed rate of return, currently 7.25%, for delinquent payments to PSERS rather than 6%.

Actuarial Assumptions

The total OPEB liability was determined by an actuarial valuation as of July 1, 2019, using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified:

- Actuarial Cost Method - Entry Age Normal
- Inflation - Assumed to be 3.00% less than the ultimate healthcare trend rate.
- Salary Increases - An annual rate of 2.50%.
- Discount Rate - An annual rate of 3.50%. Previously an annual rate of 3.00% was used.
- Health Care Cost Trend Rate - 5.5% in 2020, 5.4% in 2021, 5.3% in 2022, 5.2% in 2023-2045. Rates gradually decrease from 5.1% in 2046 to 4.7% in 2060 and later based on the Society of Actuaries Long Term Health Cost Trends Model.
- Retirees' Share of Benefit-Related Cost - Retiree and spouse contributions are assumed to remain at the current level.

Mortality rates are separate and assumed preretirement and postretirement. Preretirement is assumed using the rates in the PubT.H.2000 Employee (Male and Female weighted by headcount) as published by the Society of Actuaries. Postretirement is assumed using the rates in the PubT.H.2000 Healthy Annuitant (Male and Female weighed by headcount) as published by the Society of Actuaries.

Incorporated into the table are rates projected generationally by the Scale MP-2018 (Male and Female) as published by the Society of Actuaries to reflect mortality improvement.

System Administration:

The administrative staff of the Pennsylvania Public School Employees' Retirement System (PSERS or the System) administers a defined benefit pension plan, and two post-employment healthcare programs, the Health Insurance Premium Assistance Program (Premium Assistance) and the Health Options Program (HOP) for its retirees. The System is a governmental cost sharing, multiple employer defined-benefit pension plan that provides retirement benefits to public school employees of the Commonwealth of Pennsylvania (Commonwealth). The members eligible to participate in the System include all full-time public school employees, part-time hourly public school employees who render at least 500 hours of service in the school year, and part-time per diem public school employees who render at least 80 days of service in the school year in any of the reporting entities in Pennsylvania. The HOP is a PSERS sponsored voluntary health insurance program for the sole benefit of PSERS retirees, spouses of retirees, and survivor annuitants and their dependents who participate in HOP. The HOP is funded exclusively by the premiums paid by its participants for the benefit coverage they elect.

The control and management of the System, including the investment of its assets is vested in the Board of Trustees (Board). The Commonwealth's General Assembly has the authority to amend the benefit terms of the System by passing bills in the Senate and House of Representatives and sending them to the Governor for approval.

Plan Description and Benefits Provided - Health Insurance Premium Assistance Program

The System provides Premium Assistance which, is a governmental cost sharing, multiple employer other post-employment benefit plan (OPEB) for all eligible retirees who qualify and elect to participate. Employer contribution rates for Premium Assistance are established to provide reserves in the Health Insurance Account that are sufficient for the payment of Premium Assistance benefits for each succeeding year. Effective January 1, 2002, under the provisions of Act 9 of 2001, participating eligible retirees are entitled to receive premium assistance payments equal to the lesser of \$100 per month or their out-of-pocket monthly health insurance premium. To receive premium assistance, eligible retirees must obtain their health insurance through either their school employer or the PSERS' Health Options Program. As of June 30, 2020, there were no assumed future benefit increases to participating eligible retirees.

Premium Assistance Eligibility Criteria

Retirees of the System can participate in the Premium Assistance program if they satisfy the following criteria:

- Have 24 ½ or more years of service, or
- Are a disability retiree, or
- Have 15 or more years of service and retired after reaching superannuation age, and
- Participate in the HOP or employer-sponsored health insurance program.

Employer Contributions

The Districts' contractually required contribution rate for the fiscal year ended June 30, 2021, was 0.82% of covered payroll, actuarially determined as an amount that, when combined with employee contributions, is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the OPEB plan from the District were \$23,975 for the year ended June 30, 2021.

OPEB Liabilities, OPEB Expense, and Deferred Outflows/Inflows of Resources and Related to OPEB

At June 30, 2021, the District reported a liability of \$439,000 for its proportionate share of the net OPEB liability. The net OPEB liability was measured as of June 30, 2020, and the total OPEB liability used to calculate the net OPEB liability was determined by rolling forward the System's total OPEB liability as of June 30, 2019 to June 30, 2020. The District's proportion of the net OPEB liability was calculated utilizing the employer's one-year reported covered payroll as it relates to the total one-year reported covered payroll. At June 30, 2021, the District's proportion was 0.0203 percent, which was an increase of 0.0005 percent from its proportion measured as of June 30, 2020.

For the year ended June 30, 2021, the District recognized OPEB expense of \$22,300. At June 30, 2021, the District reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

OPEB Liabilities, OPEB Expense and Deferred Outflows/Inflows of Resources and Related to OPEB (Continued)

\$24,000 reported as deferred outflows of resources related to OPEB resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability in the year ended June 30, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Actuarial Assumptions

The Total OPEB Liability as of June 30, 2020, was determined by rolling forward the System's Total OPEB Liability as of June 30, 2019 to June 30, 2020, using the following actuarial assumptions, applied to all periods included in the measurement:

- Actuarial cost method - Entry Age Normal - level % of pay.
- Investment return - 2.79% - S&P 20 Year Municipal Bond Rate.
- Salary growth - Effective average of 5.00%, comprised of inflation of 2.75% and 2.25% for real wage growth and for merit or seniority increases.
- Premium Assistance reimbursement is capped at \$1,200 per year.
- Assumed Healthcare cost trends were applied to retirees with less than \$1,200 in premium assistance per year.
- Mortality rates were based on the RP-2014 Mortality Tables for Males and Females, adjusted to reflect PSERS' experience and projected using a modified version of the MP-2015 Mortality Improvement Scale.
- Participation rate:
 - Eligible retirees will elect to participate Pre-age 65 at 50%
 - Eligible retirees will elect to participate Post-age 65 at 70%

Actuarial Assumptions (Continued):

The actuarial assumptions used in June 30, 2019 valuation were based on the results of an actuarial experience study that was performed for the five-year period ended June 30, 2015.

The following assumptions were used to determine the contribution rate:

- The results of the actuarial valuation as of June 30, 2018, determined the employer contribution rate for fiscal year 2020.
- Cost Method: Amount necessary to assure solvency of Premium Assistance through the third fiscal year after the valuation date.
- Asset valuation method: Market Value.
- Participation rate: 63% of eligible retirees are assumed to elect premium assistance.
- Mortality rates and retirement ages were based on the RP-2000 Combined Healthy Annuitant Tables with age set back 3 for both males and females for healthy annuitants and for dependent beneficiaries. For disabled annuitants, the RP-2000 Combined Disabled Tables with age set back 7 years for males and 3 years for females for disabled annuitants. (A unisex table based on the RP-2000 Combined Healthy Annuitant Tables with age set back 3 years for both genders assuming the population consists of 25% males and 75% females is used to determine actuarial equivalent benefits.)

Investments

Investments consist primarily of short-term assets designed to protect the principal of the plan assets. The expected rate of return on OPEB plan investments was determined using the OPEB asset allocation policy and best estimates of geometric real rates of return for each asset class.

The OPEB plan's policy in regard to the allocation of invested plan assets is established and may be amended by the Board. Under the program, as defined in the retirement code employer contribution rates for Premium Assistance are established to provide reserves in the Health Insurance Account that are sufficient for the payment of Premium Assistance benefits for each succeeding year.

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return</u>
Cash	50.3%	-1.0%
U.S. Core Fixed Income	46.5%	-0.1%
Non-U.S. Developed Fixed	3.2%	-0.1%
	<u>100.0%</u>	

The above was the Board's adopted asset allocation policy and best estimates of geometric real rates of return for each major asset class of June 30, 2020.

Discount Rate

The discount rate used to measure the Total OPEB Liability was 2.66%. Under the plan's funding policy, contributions are structured for short-term funding of Premium Assistance. The funding policy sets contribution rates necessary to assure solvency of Premium Assistance through the third fiscal year after the actuarial valuation date. The Premium Assistance account is funded to establish reserves that are sufficient for the payment of Premium Assistance benefits for each succeeding year. Due to the short-term funding policy, the OPEB plan's fiduciary net position was not projected to be sufficient to meet projected future benefit payments, therefore the plan is considered a "pay-as-you-go" plan. A discount rate of 2.66% which represents the S&P 20-year Municipal Bond Rate at June 30, 2020, was applied to all projected benefit payments to measure the total OPEB liability.

Change in Actuarial Assumptions

The discount rate used to measure the total OPEB liability decreased from 2.79% as of June 30, 2019, to 2.66% as of June 30, 2020.

Sensitivity of the District's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate

The following presents the District's proportionate share of the net OPEB liability, calculated using the discount rate of 2.66%, as well as what the District's proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is 1-percentage-point lower (1.66%) or 1-percentage-point higher (3.66%) than the current discount rate:

General Obligation Notes - 2002 Series Interest Rate Management Plan

On November 13, 2002, the District issued General Obligation Notes to the Delaware Valley Regional Financing Authority (Del Val) in the amount of \$8,410,000 for the purpose of construction of a new junior/senior high school and the payment of the costs of issuance of the 2002 notes. Del Val, as a financing authority, issues local government revenue bonds to provide loans for local government units.

Del Val enters into interest-rate swaps in order to reduce the costs of the participants in the Loan Program and to enhance the ability of those in the Loan Program to manage their interest-rate risk. These swaps carry the basic risks including, basis risk, termination risk, credit risk and market access risk. As a participant in the Loan Program, the District could be adversely affected by the implications of Del Val's compliance with the terms of these swap agreements through additional costs which are not estimable at this time.

Note 19. Uncertainties

Recent developments arising from the coronavirus pandemic and efforts to mitigate the disease's domestic and global impacts have impacted the operations and finances of school districts. Changes in service approach, labor and personnel changes, facility closings, contracted service disruptions, personal protective equipment purchases, and technological equipment acquisitions have affected all school districts. Unstable conditions enhance school district's risk factors as they have significant reliance on revenues from taxpayers and governmental agencies to fund their operations. These factors impact revenue recognition, cash flows and liquidity, and contingencies. Presently, the ultimate, effects of this crisis on financial position, results of operations and cash flows are indeterminable because the duration of the crisis is also indeterminable; however, management continues to monitor developments.
