I will install the irrigation meter with accordance with accepted plumbing standards.

I will properly separate all water pipes and there is no cross-connections between the domestic and irrigation.

I will "T" or "Y" the service to the specifications of the Water Meter Division.

I will install shut-offs before and after the new irrigation meter placement.

Signed under the pains and penalties of perjury,

Signature of Licensed Plumber

Guidelines for Basic Residential Irrigation Meter Installation and Requirements

1. A licensed plumber must obtain a permit at the building department (781)393-2498 and will be responsible for installation according to all Medford Meter Division specifications.
2. A certified and tested backflow device must be furnished at customer's expense. Customer must maintain the backflow prevention assembly on the irrigation system to ensure protection of the potable water supply with yearly inspections. Backflow test are conducted by the Engineering Division and the current fee for inspection is \$60.00 annually.
3. All irrigation systems must comply with all local and state landscape irrigation regulations and restrictions.
4. All pipes from the service thru the irrigation meter and three feet past the backflow preventer must be brass or copper material. No plastic, galvanized or cast iron pipe is allowed.
5. New and existing dwellings may split service connection for irrigation with backflow device that is "T" or "Y" split to separate domestic and irrigation water.
6. The City of Medford Metering Division is not responsible for pressure loss or consumption and volume issues resulting from split connections.
7. The meter and the reading device are issued by the city and the price is included in the application fee.
8. All pipes from the irrigation meter must be inspected to insure that there are no cross connections between domestic and irrigation lines.
9. Must install shut-off valves before and after the new irrigation meter.
10. Unprotected or improperly protected Cross Connections are prohibited under the Medford Water Department Regulations and Commonwealth of Massachusetts Drinking Water Regulations governing Cross Connections (310-CMR-22.22).

FAILURE TO COMPLY WITH THESE PROVISIONS MAY RESULT IN TERMINATION OF WATER SERVICE

I have read and understand the requirements outlined in this application and will comply with these provisions.
