Maclay School

Л

T

#### WELCOME

e know each child comes to us with their own abilities, dreams, and passions. At Maclay School, we meet our students where they are by providing a nurturing environment that allows all learners to thrive – to take risks, stretch their thinking, and be challenged and cared for. From Kindergarten through Grade 5, our devoted educators build a strong, layered educational foundation that prepares Lower School students to excel in a college-preparatory environment.

Maclay School is an independent, nonsectarian college preparatory school dedicated to providing a liberal arts education and enabling each student to develop their inherent ability to the fullest extent with a balance of discipline and freedom.

### Kindergarten

#### Language Arts

Develop print awareness and begin the development of comprehension skills and strategies

Develop phonemic awareness through both written and oral blending, segmentation of word parts and rhyming, decoding, and sight word recognition

Be able to read grade level texts with accuracy, purpose, and understanding

Develop a combination of drawing, dictating, and writing to share information or an opinion

Place words in alphabetical order

Identify capital and lowercase letters

Identify letter sound correspondences for single letters, blends, and digraphs

#### Math

Explore number awareness, patterns, measurement, geometry, and algebraic thinking

Develop strategies for answering questions, rote counting, count to tell how many, recording numbers, ordinal numbers, addition and subtraction, place value and positions

Exploring two and three-dimensional shapes, patterns, measurement

Communicate mathematical ideas, work in cooperative learning groups and understand mathematical terms

Identify, analyze, compare, and sort, two- and three-dimensional shapes

Explore the composition and decomposition of numbers 0-20 in different configurations

Understanding 0 and two more and 1 less within 0-20

#### Science

Develop an understanding of forces and interactions by building and manipulating simple machines

Explore forces of motion

Develop an understanding of weather and the importance of the sun's effect the Earth

Explore the interdependent relationships in ecosystems: animals, plants, and their environment

Conduct simple experiments to develop an understanding of the above skills

#### Social Studies

Develop concepts on how people grow and change, communities, holidays, U.S. symbols, black history, U.S. Presidents, and other famous Americans

Develop ways to communicate thoughts, show independence, organization and responsibility, and working in a classroom community

Develop an understanding of map skills

Demonstrate knowledge of the qualities of a responsible citizen

Explain how people do different jobs and work to meet wants and needs

#### World Language

Continue to develop oral language with the support of gestures, singing songs, and repeating rhymes

Continue to develop greetings, introduce themselves, numbers, tell time, describe weather, emotions, family, animals, and parts of the body in complete, short thoughts

Respond to questions when given two choices

Explore culture learning about different holiday celebrations

Physical Education	Music	Guidance	Art	Computer Science	Drama
Maintain momentary stillness on different bases	Further explore listening to a variety of music	Learn friendship skills and give and take	Develop an understanding of different media in art	Introduce basic computer skills including how to use the keyboard	Engage in creative dramatic activities by using imagination to

# 1ST GRADE

#### Language Arts

Promote a love of reading by exploring a variety of genres

Cultivate decoding and encoding skills to promote fluent independent reading

Study and develop an understanding of spelling patterns used in a developmentally appropriate context

Foster skills within the writing process using a variety of styles

Utilize a range of comprehension skills and strategies

Continue to develop and practice listening, organizing, and presentation skills for an authentic audience

Introduce skills to independently select appropriate level books

#### Math

Represent and solve problems involving addition and subtraction using a variety of strategies

Understand the relationship between addition and subtraction

Apply place value understanding and operations to add and subtract

Measure and compare lengths using standard and nonstandard unit

Tell and write time to the hour and the half hour

Represent and interpret data

Reason with shapes and their attributes

Learn to communicate mathematical ideas, work in cooperative groups, and understand mathematical terms

#### Science

Use of engineering design model to test solutions and answer questions

Plan and conduct investigations of sound and light

Explore and observe the characteristics, diversity, and life cycles of organisms

Develop a scientific vocabulary

Use observations of the sun, moon, and stars to describe solar patterns that can be predicted

#### Social Studies

Develop ways to communicate ideas orally, in written expressions, and through public speaking

Examine locations of people, places, and environments and describe their characteristics through map making

Compare and contrast everyday life in different times and places around the world and recognize that some aspects of people, places, and things change over time, while others stay the same

Understand basic economic concepts including goods and services as well as needs and wants

Engage in discussions on values, responsibilities, and global citizenship by exploring and describing similarities and differences in the way groups, societies, and cultures address similar needs and concerns

#### World Language

Communicate verbally on familiar topics using short phrases

Introduce alphabet and beginning sounds

Practice using listening and speaking skills of previously learned vocabulary and tell likes and dislikes using food vocabulary

Develop the use of high-frequency vocabulary using polite expressions and common phrases

Ask permission to move around the classroom, go to the bathroom, or get water in Spanish with support of gestures and describe the weather and daily routines with the support of gestures

Describe animals and familiar objects using size, shapes, and colors

Sing authentic songs to expose them to the music of the culture

# 3 RD grade

#### Language Arts

Read a variety of genres and make age-appropriate level selections

Practice and develop a variety of comprehension skills and strategies

Practice writing concepts, writing mechanics, cursive, sentence structure, and grammar and usage

Develop and practice spelling words and vocabulary, base words, affixes, and sight words

Continue to develop and practice the writing process using a variety of styles

Continue to develop listening, organizational, and study skills

Develop higher level of reasoning skills through shared inquiry of rich literature

Use dictionary skills with a text and digital tools

#### Math

Mastery of addition and subtraction skills using multi-digit numbers

Quick recall of multiplication skills (0-12)

Develop skills with multiplication and division whole numbers, distributive and communicative properties, place value, and develop fractional understanding and use measurement skills to define twodimensional shapes

Explore number routines that include time, elapsed time, area, calendar, and estimation

Be able to communicate mathematical ideas, work in cooperative learning groups, and understand mathematical terms

Collect data and interpret graphs

#### Science

Plan and carry out investigations to answer questions or test solutions by using both the scientific method and the engineering design method v(Example: Eggdrop Challenge)

Develop scientific vocabulary

Develop ways to communicate findings both orally and in written expressions

Use appropriate tools to collect quantitative and qualitative information on animal behaviors, adaptions, habitats, and role in ecosystems

Engage in a study of motion, designs, magnets, and chemical tests

#### Social Studies

Engage in discussions about communities, geography, U.S. government, map skills and large cities in America

Learn the 50 states and their abbreviations using a U.S. map

Develop ways to communicate ideas orally, in written expressions and through presentations

Develop strategies to work effectively and efficiently in small groups

Engage and discuss traditional manners in the use of technology, tables manners, and a variety of social settings

#### World Language

Build vocabulary and scaffolds, in the sense that words that are known are constantly reviewed while new words are added

Use listening and speaking skills in a variety of small and large group activities

Make oral presentations which require group work and preparation

Read short stories and work on reading and writing comprehension activities

Complete a variety of activities that are carefully sequenced to ensure success

Act out a play

# 4 TH grade

#### Language Arts

Read a variety of genres of literature focusing on specific topics and make level-appropriate selections

Develop a variety of comprehension skills and strategies

Develop proficient spelling and vocabulary skills

Practice the writing process and written skills using a variety of styles

Continue to introduce and identify parts of speech, usage, and mechanics

Continue to refine and develop listening, organizational, and study skills

Use a variety of media resources to encourage development of higher-level reasoning skills through inquiry

Develop strong independent readers and critical thinkers

#### Math

Continue to expand quick recall of addition, subtraction, and multiplication skills

Continue to develop and have quick recall on division skills

Understand the systems of units of measurement in relationship to area and perimeter, place value to the millions, division, multiplying by two digits, and understanding basic geometric shapes and formulas

Explore fraction equivalence and extend this understanding to mixed numbers

Use angle measurements and plane figures to understand the relationships of points, lines, line segments, rays, and angles.

Construct and recognize geometric objects using this knowledge and understanding to classify figures and solve problems

#### Science

Plan and carry out investigations to answer questions or test solutions by using both the scientific method and the engineering design model

Develop scientific vocabulary

Develop an understanding of plant and animal structures and functions

Apply scientific ideas to design, test, and refine devices that convert energy from one form to another

Develop models of Earth's layers, plate tectonics and natural resources

#### Social Studies

Develop a true understanding of Florida, its history, its geography, and the challenges it faces

Investigate and explore: the natural resources making Florida unique, plant and animal life native to the state, current water issues, Florida's Native American tribes, colonization of Florida, the growth of Florida in the 20th century, economic changes, agriculture, tourism, the enduring conversation of civil rights

Communicate ideas orally, in written expression and through presentations.

Introduce note taking and organization skills

Continue to develop map skills

Learn to work effectively and efficiently in small groups

#### World Language

Build vocabulary and scaffold, in the sense that words that are known are constantly reviewed while new words are added

Use listening and speaking skills in a variety of small and large group activities

Read short stories and work on reading and writing comprehension activities

Rewrite a story

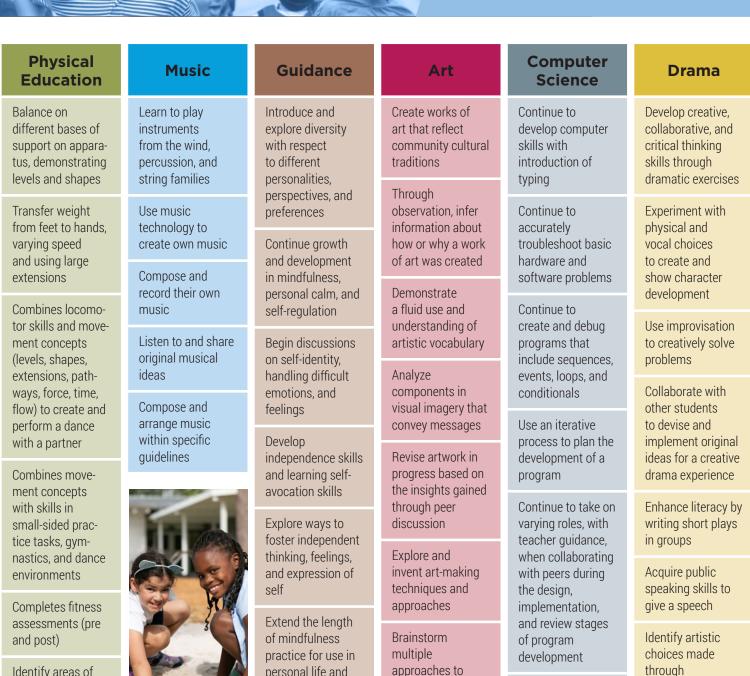

Make oral presentations which require group work and preparation

Present a play and develop confidence enunciating Spanish language

Act out a play based on an original story

Talk about traveling to Spanish speaking countries and their customs

**TELL COMBINE** 

Identify areas of needed remediation from tests and identify strategies for progress in those areas

# 5 TH grade

Language Arts	Math	Science	Social Studies	World Language
Employ tools of discovery – reading/writing; speaking/listening to create a love for language	Understand the re- lationships between and among adjacent places on the place value chart	Use models to describe that energy in animals' food was once energy from the sun	Identify core civic virtues and dem- ocratic principles that guide govern- ment, society, and communities	<b>Spanish</b> Develop verbal skills and enhance fluency Read short stories and develop
Formulate connections to the text by reading and responding to diverse genres	Apply the patterns of the base ten system to mental strategies and the multiplication and division algorithms	Support an argument that plants get the materials they need for growth chiefly from air and water	Explain the effects of increasing economic inter- dependence on different groups within participating	<b>Public Speaking</b> Identify and cater to the intended audience
Construct language-rich classrooms dedicated to the read aloud, and a	Work with fraction equivalence and decimals, as applied to algebra	Create a model to show the movement of matter among the environment	Explain how the cultural and environmental	Research key ideas and decipher the important content and adapt speech
diverse classroom library	Multiply fractions and decimal fractions and begin	Develop a model to describe that matter is made of particles	characteristics of places change over time	<b>French</b> Develop a basic understanding
Engage students in active reading and writing strategies to check for understanding and word choice in the use of vocabulary	working with fraction division Introduce volume through concrete exploration of cubic units and culminate the development of	Measure and graph quantities to provide evidence that the to- tal weight of matter is conserved	Describe how the spatial patterns of economic activities in a place change over time because of interactions with	of the French grammar and beginner level vocabulary Practice French pronunciation using reading +
Chart reading progress by using Fountas & Pinnell	the volume formula for right rectangular prisms	Make observations and measurements to identify materials	nearby and distant places Explain	sound activities Gain exposure to French culture
to identify 'Just Right' Texts for independent and guided reading Encourage	Use the number line as an introduction to the idea of a coordinate and construct two	based on their properties Investigate to determine whether the mixing of two or	connections among historical contexts and people's perspectives at the time	Latin Introduction to vocabulary, grammar, and ancient Roman culture
students to participate in local-, state- and nation-wide chal- lenges, contests, and Bees to expose them to the greater community's standards for	perpendicular number lines to create a coordinate system on the plane Use the coordinate system to explore relationships between points	more substances results in new substances Represent data in graphical displays to reveal patterns of daily changes	Gather relevant information from multiple sources while using the origin, structure, and context to guide the selection	Basic understanding of the language in relation to the English vocabulary and grammar
U U				

#### Physical Education

Combine balance and transferring weight in a gymnastics sequence or dance with a partner and transfers weight in gymnastics and dance environments

Combine locomotor skills and movement concepts (levels, shapes, extensions, pathways, force, time, flow) to create and perform a dance with a group

Combine movement concepts with skills in small sided practice tasks in game environments, gymnastics, and dance with self-direction

Analyze results of fitness assessment (pre and post), comparing results to fitness components for good health.

Design a fitness plan to address ways to use physical activity to enhance fitness

Apply safety principles with age-appropriate physical activities

#### Music

Play instruments from the wind, percussion, and string families

Further develop the use of music technology

Collaborate with other students to compose music

Listen to and share original ideas

Sing expressively

Listen to, analyze, and describe music

### Refine mindfulness and all it tenants

Recognize student ownership to identify personal strategies to manage anxiety and stress

Guidance

Identify strong feelings and emotions and learn ways to be resilient

Practice in admitting mistakes, taking ownership of actions and being mindful of others' feelings and reactions

Develop a sense of resiliency and learn to persist through challenging tasks and events

Work on ways to understand and be compassionate of others in relation to diversity, equity, and cultural norms

LISTEN CREATE DESCRIBE INTERPRET

#### Art

Combine ideas to generate an innovative idea for art making

Identify and demonstrate artistic choices for beginning a work of art

Experiment and develop skills in multiple art-making techniques and approaches through practice

Demonstrate quality craftsmanship through care for and use of materials, tools, and equipment

Create artist statements using art vocabulary to describe personal choices in art making

Compare one's own interpretation of a work of art with the interpretation of others

Interpret art by analyzing characteristics of form and structure, contextual information, subject matter, visual elements, and use of media to identify ideas and mood conveyed

#### Computer Science

Continue practice of typing

Continue to accurately troubleshoot basic hardware and software problems

Use data to highlight cause and effect relationships, predict outcomes, or communicate an idea

Create and debug programs that include sequences, events, loops, conditionals, and variables

Continue to use an iterative process to plan the development of a program

Continue to take on varying roles, with teacher guidance, when collaborating with peers during the design, implementation, and review stages of program development

Discuss real world cybersecurity problems and how personal information can be protected

Store, copy, search, retrieve, modify, and delete information using a computing device

#### Drama

Develop creative, collaborative, and critical thinking skills through dramatic exercises

Create and show character development through dialogue and movement

Use improvisation to creatively solve problems

Collaborate with other students to devise and implement original ideas for a creative drama experience

Enhance literacy by writing short plays in groups

Acquire public speaking skills to give a speech

Evaluate artistic choices to improve an improvised or scripted theatre work

Full theatre production

#### **RESPONSIVE CLASSROOM**

Maclay Lower School Faculty have been trained in **Responsive Classroom** techniques and adapted the concept into their classrooms. The Responsive Classroom is an evidence-based approach to teaching and discipline that focuses on engaging academics, positive community, effective management, and developmental awareness. Our classrooms are places where students feel safe, challenged, and joyful — a place that frees them to learn.

The Center for Academic Excellence supports and promotes a high standard of learning for all through support and extension opportunities at our Learning Hub and professional development through Faculty Excellence program.

The CAE serves all students in Lower, Middle, and Upper School with learning specialists designated to each division so our staff knows each student as individual learners and can partner with parents to make sure every child is being challenged and their needs are being met.

#### **The Learning Hub**

We believe that each child follows a unique learning path. Our staff partners with our faculty and families to support students' strengths and challenges in the classroom. We accomplish this by providing intervention and support services as well as enrichment opportunities for those who wish to add additional rigor and extension to their learning.

#### The Learning Hub services include:

- Learning Profiles & Accommodations
- Student observation and progress monitoring
- Small Group Tutoring
- Individual Tutoring
- 1:1 intervention
- Speech Therapy

Most CAE services are charged separately. To learn more, contact: **Director Janine Couch, jcouch@maclay.org.** 

#### **Special Areas**

One of the most unique features of Lower School at Maclay are the numerous co-curricular classes, or Special Areas, that our students are exposed to as early as PreK-3. Drama, Art, Music, Spanish, Computer Science, PE and Guidance all play a role in building a solid, well-rounded foundation for all our students. All of the Special Areas are part of the schedule rotation, and our afterschool programs offer Enrichment courses that give students an opportunity to go even deeper into academics, music and the arts, and athletics.

3737 NORTH MERIDIAN ROAD TALLAHASSEE, FL 32312 850-893-2138
