NORTHBROOK
HIGH SCHOOL

Celebrating a New Building A 2017 Bond Project

SPRING BRANCH INDEPENDENT SCHOOL DISTRICT

Northbrook High School

#1 Raider Circle, Houston, TX 77080
Principal: Dr. HP Hyder III

Northbrook High School's new classroom addition and building renovations enhance the campus' unique style and design. The 45,265-square-foot building strengthens collaboration and promotes engagement between students and staff.

Additional upgrades throughout the existing campus support its use and functionality. The original 394,609-square-foot school was built in 1974.

Building

The new classroom wing and building renovations were a collaboration between PBK Architects and the Project Advisory Team, comprised of staff, parents and community members.

Satterfield & Pontikes Construction served as the general contractor for the project.

Design

The new classrooms, athletic upgrades and site improvements provide important enhancements to accommodate for projected student growth. In addition, modern spaces feature opportunities for students and staff to collaborate and enrich the student experience.

Improvements

Campus upgrades include new classrooms to accommodate more students, improvements to athletic facilities, a new school entry with a secure vestibule, HVAC upgrades and a roof replacement.

Additional exterior and interior upgrades were also addressed during the renovation.

Athletics

Upgrades to the athletic facilities include renovated gym floors, additional lighting and a synthetic turf practice field, which greatly complement the existing building.

Spring Branch ISD celebrates the opening of the newly constructed classroom addition and campus renovations at Northbrook High School. The new addition and other facility improvements provide students with needed upgrades.

Approved by 80% of SBISD voters in November 2017, the 2017 Bond Program continues the transformation of district facilities that began with the 2007 Bond Program. For more information, visit:
