

Google Takeout allows you to export copies of content stored in Google to a local zip folder. Please note:

- Files will be downloaded in a **variety of formats** e.g. Word, PPTX, XLSX JPG, PDF, MP4, JSON or HTML formats. Click on Multiple Formats to check how readable / useful downloaded files will be.
- Google **Classroom content is not downloaded in readable format**; it is exported as JSON files. Use Takeout to download the Drive Classroom folder or Transfer to copy Drive content (which includes the Drive Classroom folder).
- Takeout provides the option to **deselect folders** (at root level) you don't want to download. (Google transfer copies all My Drive content you own or can edit).
- Options to download content from **YouTube, Calendar, Contacts, Photos as well as Chrome Bookmarks.**
- **Shared Drives are not supported**
