## *Family Partnership Toilet Training Plan*

Parents are our partners in supporting children with toilet learning, and when children are having multiple accidents, a collaborative meeting must be scheduled to talk with families about what they are doing at home, share with them what you are doing at school, and come up with a plan to support the child together.

The toilet learning action plan is a guided meeting, where school leaders, teachers, parents, and other relevant staff discuss strategies to support the child in toilet learning.

Students enrolled in our Early Childhood Special Education (ECSE) classrooms will receive support with potty training throughout the school day through a variety of support strategies that are appropriate for each student’s developmental level and the requirements of their IEP. Parents are encouraged to work with their student’s ECSE teacher (case manager) to collaborate on a potty training plan, but toilet learning action plans will be optional for children and families in ECSE classrooms. ECSE teachers should use their discretion and collaborate with their principal if a toilet learning action plan is necessary to support a child on their caseload.
