LURES & BAIT

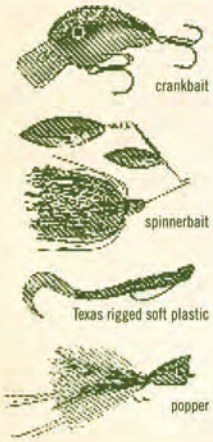

When selecting lures, the angler must consider what the fish eat and also what the fish have available to them in the particular body of water.

Consider these popular baits for different fish species:

PREDATORY SPECIES

(bass, crappie, yellow bass)

Feed on minnows, crustaceans, and terrestrial insects and animals.

Minnow Imitation: Spinnerbaits, crankbaits, swimbaits, jerkbaits, spoons, clouser minnow flies, deceiver flies, and crease flies

Crustaceans: Texas rigged soft plastics of all shapes and sizes and jig, wooly bugger flies, and Calcasieu pig boat flies

Terrestrials: Poppers, soft body frogs, soft body mice, foam spider flies, foam dragon fly flies, and deer hair mice flies

PANFISH SPECIES

(bluegill, green sunfish, warmouth, cichlids)

Feed on tiny minnows, crustaceans, and insects.

Live Bait: Crickets, worms or grass shrimp under a cork

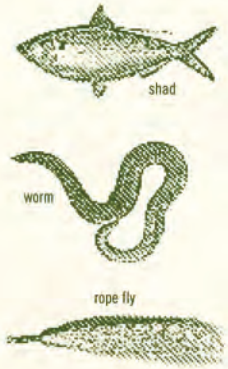

Lures: Beetle spins and tube jigs

Flies: Small rubber legged poppers, foam spiders on the surface, and nymphs in the water column including hare's ear, pheasant tail, rubber legged chenille flies in contrasting colors

LURES & BAIT

CATFISH / GAR

Opportunistic Feeders: feed on what is available.

Catfish

Worms, shad, or dough ball fished either tight-lined or under a cork

Occasionally, wooly buggers and rubber legged dragons

Gar

Cut shad or other fish tight-lined or under a cork

Occasionally caught on rope flies with combed out rope

Recreational fishing licenses may be purchased by phone toll-free at **1-888-765-260** or online at **www.la.wildlifelicense.com**

An Angler's Guide to Urban Fishing

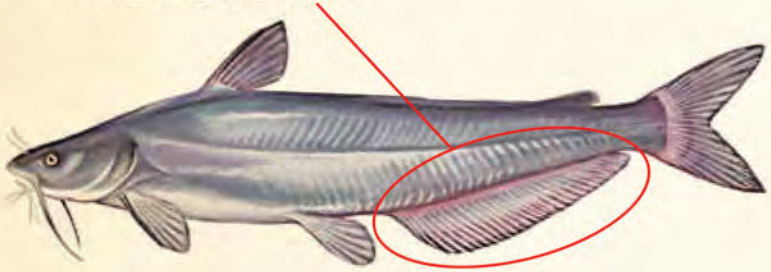

Invest in the Future... Geaux Fish Louisiana!

FISH ID**

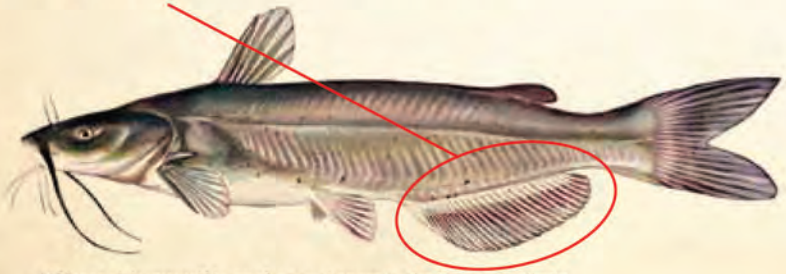

Largemouth Bass – *Micropterus salmoides*
- Broad black stripe, often broken, along side
- Limit 10 daily, any size

Blue Catfish – *Ictalurus furcatus*
- 12" minimum length, limit 100 daily in aggregate with channel and flathead catfish with up to 25 undersized
- Long, straight edged anal fin

Channel Catfish – *Ictalurus punctatus*
- 11" minimum length, limit 100 daily in aggregate with channel and flathead catfish with up to 25 undersized
- Rounded anal fin

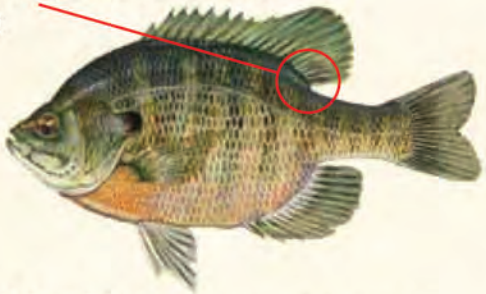

**Please visit www.wlf.la.gov for any changes to size/possession limits.

Green Sunfish – *Lepomis cyanellus*
- Black spot at rear of 2nd dorsal and anal fin bases
- Yellow or orange edge on 2nd dorsal, anal, and caudal fins
- Large mouth
- No limit

Bluegill – *Lepomis macrochirus*
- Large black spot at rear of dorsal fin
- No limit

Yellow Bass – *Morone mississippiensis*
- 5 to 7 broken stripes on side
- Dorsal fins joined by a membrane
- No size limit, 50 daily creel limit

Spotted Gar – *Lepisosteus oculatus*
- No Limit

- Trails
- Road
- Improved Shoreline

City Park History

(Relative to LDWF)

- LDWF is responsible for fisheries management in New Orleans City Park lagoons. The goal of urban fisheries management is to provide and enhance recreational fishing opportunities.
- Since 1999, LDWF has stocked the lagoons with many species of fish including largemouth bass, yellow bass, sunfishes, channel catfish, and blue catfish.
- The invasive Rio Grande cichlid* was first spotted in 1996 and has become more common in City Park's lagoons.
- Most aquatic vegetation problems are controlled by salt water entering City Park Lagoons from Bayou St. John.
- There are 11 miles of shoreline throughout the 1,300 acre park.
- Average depth of the lagoon system is 3 feet.

*Species must be killed immediately upon capture.
