

PENNCREST
EMPOWERING LIFE-LONG LEARNERS

Media Release

PENNCREST contracts with ZeroEyes for Weapons Detection Services

Saegertown, PA – February 10, 2022 – The PENNCREST School District approved a 3-year agreement with [ZeroEyes](#), the industry's leading artificial intelligence weapons detection solution. ZeroEyes' platform is purpose-built to detect visible weapons in real-time, identifying guns before any violent threats can occur.

ZeroEyes' software integrates with an organization's existing camera systems and video analytics to detect weapons in real time. As soon as a visible weapon is detected, an alert with the image of the weapon goes to the ZeroEyes monitoring team. Once confirmed, an alert is sent to a local emergency dispatch, police and school administrators.

"PENNCREST has invested in a number of different technologies, equipment and trainings focused on keeping students, staff and visitors safe. As a geographically large school district, law enforcement response time is critical. ZeroEyes is a 24-7-365 proactive approach to ensure safety. ZeroEyes technology will help protect students, staff, and visitors by proactively monitoring and detecting threats at first sight.

- Dr. Timothy S. Glasspool, PENNCREST

About ZeroEyes

ZeroEyes is the industry's leading AI-based weapons detection solution. Our software integrates into existing security and surveillance camera systems and sends out a series of alerts when a verified gun is detected via our best-in-class weapons detection algorithms. The ZeroEyes platform is the most proactive and actionable early-warning system on the market, allowing users to "Stop threats at first sight, not first shot." Founded by a team of Navy SEALs and military veterans with over 50 years of military experience with deep special operations and intelligence community expertise, ZeroEyes is the trusted weapons detection provider of numerous clients, to include the US Department of Defense, leading public K-12 school districts, commercial property groups, Fortune 1000 corporate campuses, shopping malls, and big box retail. The company is headquartered in the Philadelphia area and has additional locations in Washington DC, Hawaii, and Kansas.
