

Franconia Construction Update - October 5th, 2022

Good afternoon, Franconia families. I hope that you are enjoying some family time today. The past few weeks have been busy at Franconia. As our students are busy building their knowledge base, the upper level of our building is being reconstructed. Below, take a look at our progress!

Classroom walls are being framed and drywall is being installed.

Our bathroom walls are being framed and all new pipework is being installed.

Have you ever wondered what is in Franconia's attic? Currently, the attic has received new plywood flooring, duct work has been installed, and it has new insulation.
