

Unit: Energy

Content Area: Science

Strand: Physical Science

Grade: Fourth Grade

Unit	Weeks	Disciplinary Core Ideas	Science and Engineering Practices	Crosscutting Concepts	Unit Language Goal(s)	Resources
Energy (FOSS – Next Generation)	6 Weeks	<p>PS3.A: Definitions of energy</p> <p>PS3.B: Conservation of energy and transfer</p> <p>PS3.C: Relationship between energy and forces</p> <p>PS3.D: Energy in chemical processes and everyday life</p> <p>PS4.A: Wave properties</p> <p>PS4.B: Electromagnetic radiation</p> <p>PS4.C: Informational technologies and instrumentation</p> <p>ESS3.A: Natural resources</p> <p>ETS1.A: Defining and delimiting an engineering problem</p> <p>ETS1.B: Developing possible solutions</p> <p>ETS1.C: Optimizing the design solution</p>	<ul style="list-style-type: none"> Asking questions and defining problems Developing and using models Planning and carrying out investigations Analyzing and interpreting data Using mathematics and computational thinking Constructing explanations and designing solutions Engaging in argument from evidence Obtaining, evaluating, and communicating information 	<ul style="list-style-type: none"> Patterns Cause and effect Systems and system models Energy and matter 	<p>I can...</p> <ul style="list-style-type: none"> -investigate a question based on observations -identify and use evidence from data, models, and/or information to explain why something occurs -use evidence to show relationships between claims and evidence -present information without personal opinion 	<p>FOSS Science Resources Book</p> <p>FOSS Next Generation Investigation Guide</p>

Language for Science (Explain)

Language for Science (Argue)

Language Expectations: Multilingual learners will...

Language Expectations: Multilingual learners will...

ELD-SC.4-5.Argue.Interpretive

Interpret scientific arguments by

- Identifying relevant evidence from data, models, and/or information from investigations of phenomena or design solutions
- Comparing reasoning and claims based on evidence
- Distinguishing among facts, reasoned judgment based on research findings, and speculation in an explanation

ELD-SC.4-5.Argue.Expressive

Construct scientific arguments that

- Introduce topic/phenomenon in issues related to the natural and designed world(s)
- Make and define a claim based on evidence, data, and/or model
- Establish a neutral tone or an objective stance
- Signal logical relationships among reasoning, relevant evidence, data, and/or a model when making a claim

ELD-SC.4-5.Explain.Interpretive

Interpret scientific explanations by

- Defining investigable questions or design problems based on observations, data, and prior knowledge about a phenomenon
- Obtaining and combining evidence and information to help explain how or why a phenomenon occurs
- Identifying evidence that supports particular points in an explanation

ELD-SC.4-5.Explain.Expressive

Construct scientific explanations that

- Describe observations and/or data about a phenomenon
- Establish neutral or objective stance in communicating results
- Develop reasoning to show relationships between evidence and claims
- Summarize and/or compare multiple solutions to a problem based on how well they meet the criteria and constraints of the design solution

Part (Lesson) & Guiding/Focus Questions	Content Standards (NGSS)	Language Expectations (Sample Language Objectives)	Language Functions and Features (bolded are the focus for instruction)	Multilingual Learner Strategies
<p>Investigation 1 Lesson 1</p> <p>What is needed to light a bulb?</p> <p>*Reading Lesson Page 127 in <i>Energy Investigation Guide</i></p>	<p>Disciplinary Core Ideas</p> <p>PS3: How is energy transferred and conserved?</p> <p>PS3.A: Definitions of energy</p> <p>PS3.B: Conservation of energy and energy transfer</p> <p>PS3.D: Energy in chemical processes and everyday life</p> <p>ETS1: How do engineers solve problems?</p> <p>ETS1.A: Defining and delimiting engineering problems</p> <p>ETS1.B: Developing possible solutions</p> <p>ETS1.C: Optimizing the design solution</p>	<p>ELD-SC.4-5.
