

22-23 Goals

Interim Superintendent Rebecca Miner

The following goals were developed based on current observations in the district, in alignment with the current school board annual goals (based on the strategic plan). These goals have two primary objectives: continue to advance the immediate needs to support student learning in the district and to simultaneously build a firm foundation for future superintendent success.

Goal # 1: Plan for upcoming (2023-2024) budget realities including staff, student and stakeholder input while at the same time advocating at the state level for sustainable and adequate funding.

Goal #2: Review current policies and procedures and amend as necessary.

Goal # 3: Lead for instruction to support teaching, learning and equity, by continuing to systematize the work of the strategic plan and provide monitoring, including predictable data reviews, to the board.

Goal #4: Explore opportunities for the implementation of Transitional Kindergarten in the District and prepare, if warranted, for implementation in the 2023-2024 school year.

Goal #5: Shepherd a review of the student services department by an outside organization and provide recommendations to the board based on the outcome of the review.

Goal # 6: Foster positive relationships with employee groups, with opportunities for two-way communication.

Goal #7: Support the board with the professional development and resources needed to achieve and monitor their adopted annual goals.

Goal # 8: Be an active member of the community while strategically providing information about the current state of our schools to include academic, financial and capital updates.
