Instruction

SUBJECT: MULTICULTURAL/GLOBAL EDUCATION

The Board of Education believes that the learning environment in District schools must reflect diverse cultural traditions and contributions. The Board also believes that such an environment allows students to develop a broader knowledge base, as well as a sense of respect for and tolerance of culturally diverse peoples, their customs and historic legacy.

To ensure that District instructional materials are accurate, comprehensive, non-biased and inclusive of the perspective of different cultures, the Board directs the Superintendent of Schools to develop procedures necessary to ensure that District instructional materials are accurate, comprehensive, non-biased and inclusive of the perspective of different cultures.
