

SCHOOL-BASED HEALTH CENTER

Conveniently meeting physical and mental health needs at your school.

We believe that strong schools are the foundation of our community. That access to health care is a right. That students, faculty and staff thrive when they are their healthiest.

That's why we are committed to bringing health care right to our schools. Our mission is to improve the health, academics and success of Montana's brightest future, our children. We envision a future where everyone access to the high-quality health care they deserve, without needing to leave campus.

Although providing exceptional health care is an important part of our mission, you won't just find us in our exam rooms. We will be in the stands wearing your school colors and cheering at events, sharing health information in your classrooms, and passing out high-fives in the hallways. Being part of your school culture is one of the best parts of our jobs!
