Introduction

The Stamford Public Schools School Counseling framework developed by the school counseling staff, with the help of teachers, administrators, students, parents and community members, is an integral part of the educational process and addresses the academic, career, and social-emotional needs of all students at the secondary level. The framework is modeled after the 2020 Connecticut Comprehensive School Counseling Framework, which is aligned to student standards: ASCA Mindsets and Behaviors (2014), The 12 Career Ready Practices (National Association of State Directors of Career Technical Education), Collaboration for Academic, Social, and Emotional Learning (CASEL)’s five core competencies (2017), and the Next Generation Accountability System (Connecticut State Department of Education, 2015). The Stamford Public Schools framework is collaborative in nature and emphasizes a multi-tiered system of support (MTSS) approach to delivering services to students and families in a systematic, equitable way.

Mission Statement

The mission of the Stamford Public Schools Counseling Department is to empower students to be self-aware, to take ownership of their academic growth, and to plan for the future. This will be accomplished through the equitable delivery of the comprehensive school counseling program.

Vision Statement

Our Stamford Public Schools graduates will:

- Participate as responsible and productive members of society
- Advocate for themselves and others
- Collaborate effectively
- Develop a commitment to a healthy lifestyle and personal well-being
- Engage in lifelong learning
- Use critical thinking skills
- Adapt to an ever changing global society

Belief Statements

The School Counselors of the Stamford Public Schools believe the following:

- All students can succeed
- We are advocates for students, families, and for our profession
- Collaborating with students, families, staff and community will enhance connectedness
- All students can grow in mind, body, and heart
- Using data will help to evaluate and support both student and program needs
- Student self-awareness contributes to college and career success

Comprehensive Service Delivery Framework

Direct Student Services
Direct student services are provided by our school counselors while working directly with students. This face to face time includes individual student planning, delivering the school counseling curriculum, and responsive services. These services are data driven and meant to help promote healthy development, a positive attitude toward work and learning and help students achieve success in school as well as effectively identify post-secondary choices. Direct services can be proactive and reactive.

Individual Student Planning: Session results in the development of a Student Success Plan for each student that is documented with career/education/social-emotional goals and postsecondary options. The plan is revised and modified annually throughout the student’s school career beginning in middle school and continuing throughout high school.

School Counseling Curriculum:

Classroom Lessons: School counselors, in collaboration with teachers, deliver a learning activity or unit in the classroom. The curriculum provides developmental and sequential lessons and activities in classroom and/or group settings, which address student development in academic, career and social-emotional domains. Lessons are approximately 40 minutes in length.

Small Groups: Counselors conduct groups outside the classroom to respond to students’ identified interests or needs. School counselors plan and lead structured activities that are designed to increase the skills and knowledge of student participants.

School-wide Events and Activities: Designed to reinforce the concepts being taught in the classroom by school counselors. Collaborations within and outside the school community are used to address specific information relevant to students and families. Examples: academic presentations, guest speakers, career fair, financial aid night, middle/high school transitioning.

Responsive Services: School counselors are trained and prepared to react to a crisis or immediate need experienced by a student or school community. School counselors provide supportive individual and group counseling, referral, collaboration, and consultation to help students and families overcome academic, personal-family, and socio-emotional barriers to healthy development. **Indirect Student Services**

Indirect student services are provided by our school counselors on behalf of students. School counselors take a team approach when working on behalf of students. As part of this team approach, *consultation* with staff, administration, families in regards to the challenges and barriers that students face, is an important part of our school counseling framework.

Through *collaboration* within the school and with outside agencies, school counselors develop programming as part of the comprehensive school counseling framework that fits the needs of students, parents and community members. Collaboration also allows for the school counseling department to make connections with outside agencies to provide students and parents with a number of resources that are available to them to help with issues that are not otherwise within the scope of the school day. School counselors often become a point of contact for families within the school. By providing *referrals*, families are able to connect with needed services not only within the school system, but outside in the community as well. (CT Comprehensive K-12 School Counseling Framework Guide, November 2020)

**School Counseling Curriculum**

Our school counseling curriculum was developed using a needs assessment conducted throughout our school community in Spring 2019. The student lessons are aligned to the 2020 Connecticut School Counseling Standards (pg. 6) and are based on what students should be able to understand, know, and be able to do in the academic, career, and social-emotional domains.
