

Medication Regimen

The parent or legal guardian of any pupil taking medication on a regular basis must inform the school nurse or school site administrative assistant of the medication being taken, the current dosage, and the name of the supervising physician. With the consent of the parent or legal guardian, the school nurse may communicate with the physician and may counsel with the school personnel regarding the possible effects of the medication on the pupil.

Administration of Prescribed Medication for Pupils

Any pupil who is required to take, during the regular school day, medication prescribed by a physician or surgeon, may be assisted by the school nurse or other designated school personnel or may carry and self-administer auto-injectable epinephrine or inhaled asthma medication if the school district receives both a written statement of instructions from the physician detailing the method, amount and time schedules by which such medication is to be taken and a written statement from the parent or guardian requesting the school district assist the pupil with prescribed medication as set forth in the physician statement.

Administration of Epilepsy Medication

If a pupil with epilepsy has been prescribed an emergency antiseizure medication by his or her health care provider, the pupil's parent or guardian may request the pupil's school to have one or more of its employees receive training in the administration of an emergency antiseizure medication in the event that the pupil suffers a seizure when a nurse not available.
