

MISSION AND VISION

MOT Charter School provides a challenging curriculum in a safe and nurturing environment where all children learn and flourish. By utilizing diverse teaching strategies and exposing students to a wide variety of educational experiences, we ensure that each child participates in and enjoys learning.

MOT Charter School's purpose is to serve as a pillar of life-long learning. We combine the beneficial rigors of a classical education with the latest technology and the best teaching and learning practices. MOT Charter School will prepare students to be informed and responsible citizens and will compel all students to excel by engaging every child in learning and by holding students to high standards. All students will be stimulated and challenged in a variety of ways.

At the core of MOT Charter School is a belief that character development and personal responsibility form the basis for learning. Students are empowered to take responsibility for their own learning and development. The school facilitates the learning process with an environment that encourages high ethical and academic standards and reinforces positive values taught at home.

MOT Charter School's goal is to prepare students to be creative, intuitive, and analytical thinkers. The curriculum will prepare students to solve problems both individually and collaboratively, using critical thinking skills cultivated through comparative, interdisciplinary study. Extensive access to technology as an authentic learning tool will enable MOT students to become technologically literate and prepare them for advanced study beyond high school.

At MOT Charter School, we believe that a strong school community enables every child to reach his or her academic potential. Parents are invited and expected to be actively engaged in their children's education.
