Bancroft School is designed as a learning laboratory where students ask questions, share ideas, and solve problems through research, experimentation, and reflection. Our students shape their education in a supportive community where intellectual risk is encouraged and strong personal relationships are valued. Students leave Bancroft ready to make independent decisions and manage multiple priorities because they have had plenty of practice. You will never find a Bancroft alum on the sidelines, waiting for others to create solutions. You will find them engaging, leading, collaborating, and taking thoughtful action.

STUDENT LEADERSHIP & COMMUNITY ENGAGEMENT

Bancroft School is located in Worcester, MA, New England's second-largest city, which boasts a socioeconomically and ethnically diverse population of 205,000 and a broad array of cultural and academic opportunities. You may find our students working in a Medical Research Lab, developing materials for the Worcester Historical Society, partnering with artists creating murals throughout the city, or teaching fellow students how to engage in the political process. Students also lead and participate in 30 different clubs and affinity groups within the school.

Students are also heavily involved in community service. Notable examples have included Bancroft's popular CARE & Horizons Program in which students volunteer their Saturday mornings to mentor local children with significant special needs. The student-led Worcester Refugee Assistance Program (WRAP) Soccer Project was initially designed by a Bancroft senior during her Co-Op in 2016 as a sports program to serve Burmese refugee children in our community. Recent student-leaders have expanded the program to include arts and academics.

SCHEDULE

Bancroft's Upper School operates on a semester system. Courses run on a seven-day rotating schedule comprising 28 blocks of 75 minutes. Students typically schedule an average of 24 blocks of course time per rotation.

- Greater flexibility and choice in how each student meets the graduation requirements;
- Development of time-management skills and intrinsic self-motivation that will serve students beyond high school;
- Focused time for collaboration with project partners or faculty, independent research, or homework;
- Fewer classes each day with longer class time for in-depth work;
- Greater opportunity for students to discover new interests and explore areas of passion.

GRADING & CLASS RANK

Bancroft does not rank its students. We use a uniform, unweighted marking system ranging from A to F; we do not use A+. Students with an overall average of A- achieve High Honors, and those with a B+ average achieve Honors. Bancroft is a member of the national Cum Laude Society, which inducts a maximum of 10% of the junior and 10% of the senior class every spring.

HONORS & ADVANCED COURSES

Classes designated as "Honors" are positioning students to engage in college-level work before they leave high school. Most of these students will go on to take "Advanced" courses. Students who do well in our "Advanced" courses are prepared for upper-level college courses in these and related departments.

We have various special programs that enhance the Bancroft academic experience. At all levels, we offer strong art and music courses which are fully credited academic courses.

Students can elect junior/senior courses representing a broad range of disciplines, and all graduating seniors write their Senior Thesis, a capstone research paper. Additional advanced and individual work is offered whenever appropriate. For example, in Science and Engineering Inquiry (SEI) and Research and Historical Inquiry (RHI) advanced students choose a specific topic of interest, conduct year-long experimentation and/or research, and present their deep mastery and research findings monthly to faculty and then at regional, state and national competitions. Advanced world language students take immersive, field-oriented courses such as Advanced Studies in Spanish or Contemporary French Culture. Computer Science and Math students also have the opportunity to take courses beyond the traditional AP curriculum including Algorithms and Data Structures and Multivariable Calculus.
