Private education since 1885

*Excellence in fundamental knowledge and openness to the future*

**Kindergarten | Primary | Middle School | High School**

**Kindergarten  
and Hattermer Primary**

### **Hattermer Preschool, a guarantee of success for the future**

Hattermer offers children, from a very early age, the opportunity to develop their logical mind and visual attention while focusing and concentrating through exercises specifically designed by the teaching team.

**Hattermer welcomes students in Nursery (from age 2), Pre-Kindergarten (age 3 to 4) and Kindergarten (age 4 to 5).**

The objective of this grade system is to nurture the personality of each child, develop the feeling of satisfaction when solving a problem and foster **their desire to learn**. The days are punctuated by handwork, listening, talking and playing sessions. Each activity offered to the child is designed to help them gain key skills useful for their education. **Most of our students can read in kindergarten.**

**In addition, our students learn English through daily immersive activities. The timetable is designed as follows:**

**50% of instruction in English and 50% of instruction in French.**

Because a successful education should begin in preschool, the programme offered at Hattermer is designed to prepare our students for their future education.

To this end, graphic, quantity, spatial, logical and memory concepts are implemented within the teaching method for preschool students.

To help children take their first steps into the academic world, every learning activity of the Hattermer curricula is based on day-day practical examples.

## Hattermer Primary, a renowned method with results

Thanks to the Hattermer method, children learn at an earlier age and more thoroughly. **Reading is taught with the syllabic method, and mathematics instruction is very closely related to the so-called Singapore method.** The Singapore method is based on a gradual and stepwise learning acquisition of mathematical concepts, using problem representation and problem solving strategies to promote both interest and insight.

The programme contents of Hattermer stand out from that of other schools.

French, arithmetic, English, history, geography and science are taught every day, but with the added value of the Hattermer method. French knowledge and practice are enhanced on a daily basis, particularly with daily dictation passages of writers.

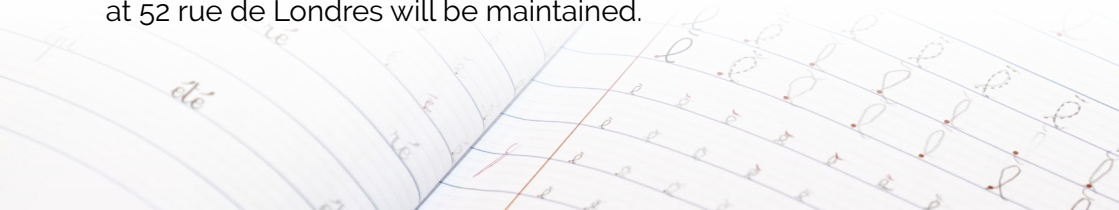

Mathematical reasoning is promoted every day through mental arithmetic, operations, conversions, problem solving and geometry. As with nursery grades, we offer daily English immersion sessions conducted by a native teacher (1.5 hours per day): language lessons, English-speaking culture and literature.

Hattermer's traditional «Grand Cours» which has been in place for decades **consists of inviting Parents every week to attend this oral examination, which is intended to review what has been achieved during the week.**

In addition, families are kept informed of the work done in class every week and the results of the students every month.

From the start of the next academic year in September 2023, Hattermer Middle School and High School are to become an additional division of Collège EIB Monceau and Lycée EIB Etoile, which are State-contracted secular private schools.

By joining EIB, middle and high school students will then benefit from continuous assessment and all exam procedures for students enrolled in State-contracted private schools. The school site located at 52 rue de Londres will be maintained.

## **Catherine DE MESTIER**

**Head of School and Director of Nursery and Primary school**

When completing the Primary school cycle, our students perfectly master the core subjects and show great appetite for intellectual for learning and studying. The Hattemer method ensures that beyond the basic knowledge, they develop a great personal balance and a good command of themselves and their minds. Our students enter middle school fully prepared to benefit from the unique opportunities offered by secondary education.

### **Our schedules and extracurricular activities**

In the morning, we welcome students from 8.45 am (classes at 9.00 am) to 12.00 pm and in the afternoon from 2.00 pm to 5.00 pm (day care or afterschool study are offered from 5.00 pm to 6.00 pm) and on Wednesday mornings.

Extracurricular activities are also offered at lunchtime or on Wednesday afternoons around cultural, athletic and artistic activities.

Hattemer makes sure that each student can develop in the artistic, cultural or sporting field of their choice:

- music school,
- dance,
- capoeira,
- chess,
- judo,
- computer coding...

Do not hesitate to consult our website or to contact our administration office to find out about all the activities available.

## Hattemer, the school of knowledge

At the end of the 19<sup>th</sup> century, Rose Hattemer, a primary school teacher from Alsace, taught French to young children in Paris. As a tutor in a number of families, she has quickly gained success and popularity. Mademoiselle Hattemer started to teach groups of children at her home and later developed the first distance learning school created in France.

**Her teaching method: Set up a learning programme for each child and foster their minds.**

**The Hattemer Method was born, both innovative and traditional.** Since then, Hattemer has been an independent private secular school that welcomes children **from nursery to 12<sup>th</sup> grade.**

With 135 years of experience, Hattemer rests on a **unique, approved and proven teaching method**, based on the mastery of the core subjects and a wide range of academic disciplines. Children benefit from a continuous **intellectual development**. Our goal is to develop a sense of aesthetics and empathy, general culture, curiosity and openness to the world. With its humanist values, high standards and intellectual honesty, Hattemer offers a nurturing working environment and a memorable school experience.

### Some famous alumni:

Elisabeth Badinter, Bao Daï, Jacques Chirac, Jean d'Ormesson, Jean Louis Debré, Françoise Dorin, Etienne Dailly, Anne Sinclair, Michel Poniatowski, Anne Queffélec, Rainier de Monaco, Françoise Sagan, Jean-Paul Sartre, etc...

## Hattermer also offers:

- distance learning (Hattermer Academy),
- intensive internships,
- private lessons,
- revision classes,
- a music school.

Do not hesitate to contact us for further information and to register your child.
