What 2 adjectives would you use to describe using Adobe Sign?
Do you have any additional comments or questions about the project? Is there a particular success story you are willing to share?

• The diversity and flexibility of this platform is a key to success.
• Switching to Adobe helped us make our applications look and feel more professional and allows us to easily share and track documents.
• Implementation and on-going support from the App Dev team has been incredible. This project has been a game changer for HR onboarding. The time savings alone has been profound. I can't thank the team enough for all of their willingness to listen to our goals in this project and to help us bring them to fruition.
• Thank you for a smooth roll out that was easy to follow and offered plenty of support! I would like to see more of the usual forms admins use available in Adobe Sign but I realize that's up to each division to finalize and make available. You just gave us the tools and training.
• I wish all departments would dive into using Adobe Sign regularly like HR and Payroll.
• Adobe Sign and the implementation from our partners at IT was well planned and effective.
• With the help of the ITS team, Ivan in particular, we were able to offer this to the district teachers of the year last April to get their principal and superintendent signatures. It reduced their stress and made things easier on my end as I support them in all their needs.
