## TECH TIPS

MIT Video - [The MIT Video website](#) is developed and maintained by the MIT News Office. It aggregates and curates video produced by the Institute's offices, laboratories, centers and administration. This includes feature and editorial videos, event recordings, academic content and more. Each day, the editorial team at MIT Video selects one or more videos to "spotlight" based on the videos' content, production value and timeliness. There are some nice videos on this site. Take five minutes and browse through today!
