

A large, thick black L-shaped graphic is positioned on the left and right sides of the slide, framing the central text. The top-left corner is open, and the bottom-right corner is open.

# **THINKING ABOUT THINKING: EXECUTIVE FUNCTIONING**

Karin Falness, ED.S.

# Resources

- Sara Ward- *Cognitive Connections, 360 Thinking*
  - [www.efpractice.com](http://www.efpractice.com)

  - <https://www.additudemag.com/7-executive-function-deficits-linked-to-adhd/>
- Ross Greene, *Explosive Child*

# What is Executive Functioning (EF)?

■ The term “**executive functions**” describes a set of processes that all have to do with managing oneself and one's resources in order to achieve a goal.

– Attention

– Flexibility

– Working Memory

-Organization

-Planning

-Inhibitory Control

EF can be impacted by an underlying learning disability, attention deficit hyperactivity disorder, or other neurological/mental health diagnoses.

# DEVELOPMENTALLY PREDICTABLE

Handouts

# Attention Span

- A neuro-typical child can concentrate for 2-5 minutes per year old they are...

So...

2 years: 4-10 minutes

4 years: 8-20 minutes

6 years: 12-30 minutes

8 years: 16-40 minutes

10 years: 20-50 minutes

# Impulse Control

- Executive functioning skills begin with impulse control
- This is the ability to delay gratification, to see into the future
- **This is a learned skill**
- It plays out in at school in the ability to plan.
  - *You can't plan- homework, assignments, any tasks actually- without stopping, thinking, and seeing into what the future of what the goal looks like*

# Situational Intelligence

- An early aspect of EF is situational intelligence (“reading the room”)
  - This is recognizing zones in the room- space, time, objects, people- in a self-directed way
- It is **self-directed** because the student is answering:
  - What do I need to do?
  - What is expected of me in this setting?
- It is “If... then” thinking
  - If it looks like this, then what do I need to do?

# STOP and “Read the Room”

Space	Time	Objects	People
Navigate the Room	Get on the Timeline	Organization/Objects	Read the person; <b>ROLE</b>
Kind of space?	Time of day?	Organization of the space? Parts/whole?	Face
What’s going on?	Sequence of actions	Location of objects? In sight/out of sight?	Body
Pathways used to navigate space	What is coming up?	Purpose/priority of objects?	Mood
Expected/Unexpected			Staying on-task

# Mimetic Ideational Information Processing

(aka....planning ahead)

- A type of nonverbal working memory which allows you to mentally pre-simulate how the future will play out in our head
  - You can try out and pre-experience and emotion of a situation without risk
  - You can run a “Plan A” and a “Plan B” in your head
  - **90% of planning occurs before you enter a space!!**
- Similar to episodic/autobiographical memory- but for the future (self-project)

# Be a Future Thinker: Mind **MIME** iT

- **M**- Future Scene Thinking: **M**ake an Image. **STOP** what will it look like?
- **I**- Episodic Future Thinking: What do **I** look like?
  - Self-projection
- **M**- Mental Time Travel: How am I **M**oving into the future?
  - Time management
- **E**- The Future **E**motion: How will I feel?
- **i**- if... then
- **T**- Self-**T**alk

# Development of the Time Horizon

- 2 years- Now
- 3-5 years- 5-20 minutes
- K-2<sup>nd</sup> grade- several hours
- 3<sup>rd</sup>-6<sup>th</sup> grade- 8-12 hours
- 6-12<sup>th</sup> grade- 2-3 days
- 12-23 years- 2-3 weeks
- 23-35 years- 3-5 weeks

**TASK COMPLETION**

# Get Ready, Do, Done Model

[www.efpractice.com](http://www.efpractice.com) (Jacobson and Ward)

Materials

Recipe

Kitchen tools- measuring cups, spatula, timer, pan

Crust Mix

Sauce

Cheese

Pepperoni

First, I need to make the crust, using mix and water.

Next, I need to bake the crust.

Then, I need to add toppings- pizza sauce, then pepperoni and cheese

Finally, I need to finish baking it

I. Done

Plan Backwards (plan my work)

# Stage I : Task Planning

3) Get ready, What do I need?

Get Ready

2) What steps do I need to take to be done? How long will each step take?

Do

1) What will it look like when I am **DONE**? Sketch the future product or show a picture.

Done

# Stage 2 : Task Execution

4) Start: What materials do I need to do this step.  
Prepare my space.

**Get Ready**

5) Do the work and check in. May use a clock to monitor time!

**Do**

6) Stop-know when to stop. Close out the task. Review: What worked, what did not work?

**Done**

**Get Done!** How do you turn the work in?

**Get Done**

360 THINKING

GET READY

Use my SMART.S!

Does my body need anything before I start?

DO

Task	Time

DONE

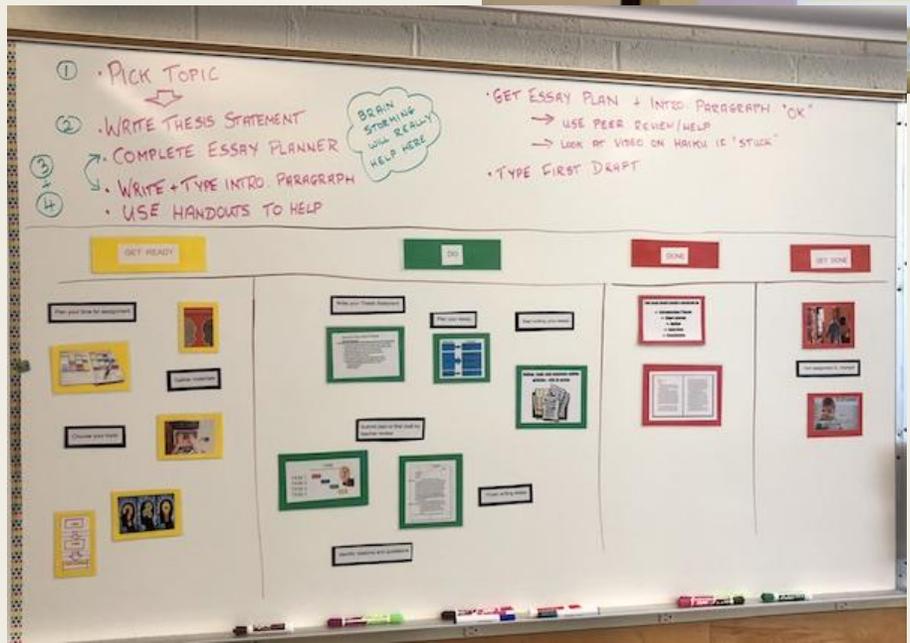

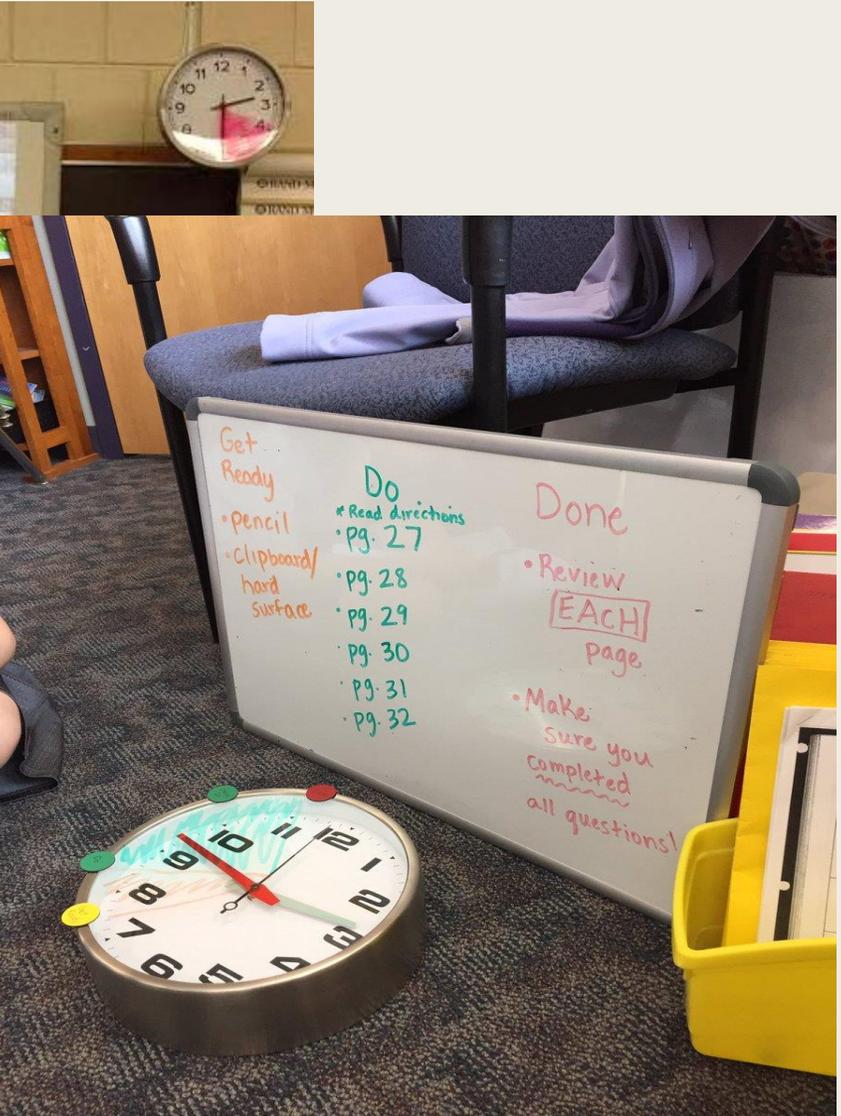

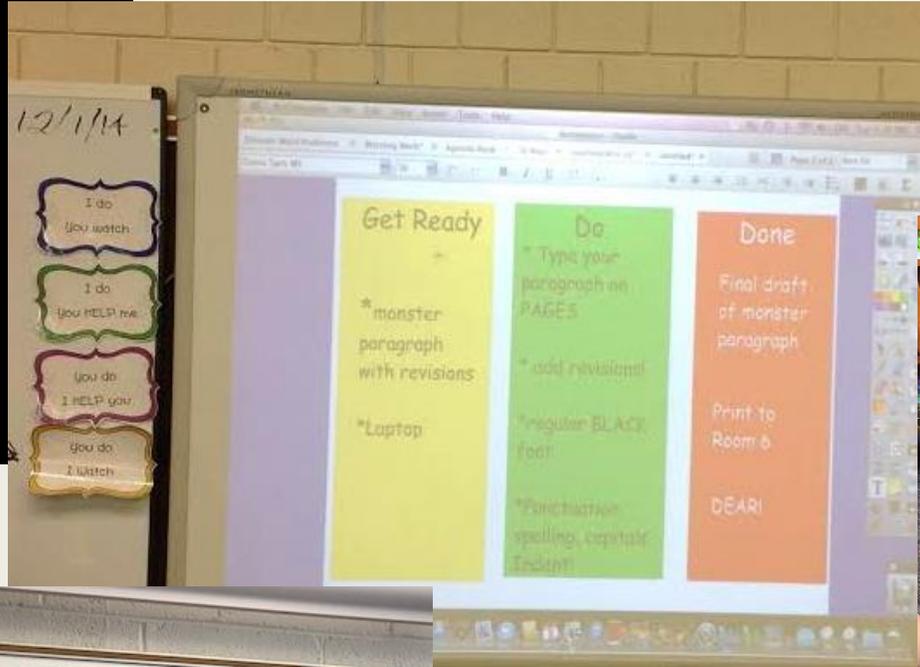

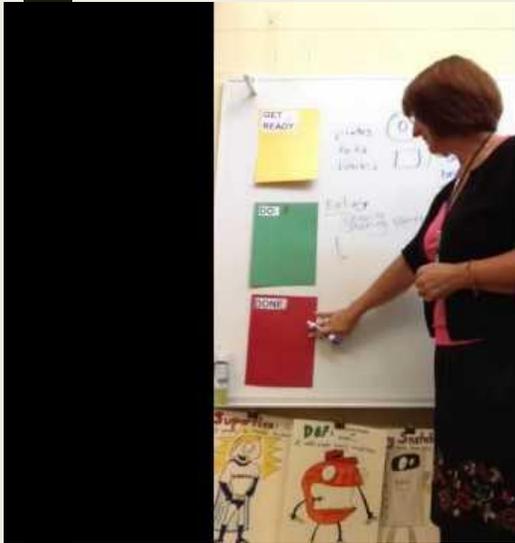

This task is...

- something new.
- similar to something I have done before.

When I am DONE, I will feel:

# What could this look like in a classroom?

# How it changes the classroom...

## Task introduction, Teacher A....

- You are going to create a poster
- Here's what I need you to do:
  - Gather your materials at the back for the room
  - In your group decide who is going to do what
  - Your poster needs three ideas and three pictures

## Task Introduction, Teacher B...

- Put on a pair of future glasses
- You are going to build a poster
- Here is an example of what it might look like **(Done)**.  
What parts/features do you notice in this poster?
- How do you imagine your poster will look the same but different?
- What steps will you need to **DO** to complete the task?
- What will you need to **Get Ready** to complete the task?

# Should I use GDD?

- Review last night's homework-no
- Teach what a chemical reaction is- no
- Teach student **how to** fill out cards for a research assignment- yes
- Have students **do research** and make six notecards-yes
- **Write** an introductory paragraph —yes
- **Practice** reading and highlighting topic sentences- yes

**Does the student need to envision their action and outcome?**

**Yes- Use the GDD Model**

# **MATERIAL MANAGEMENT**

# Using Visual Aids to Manage Materials

Start with the end in mind- what does it look like?

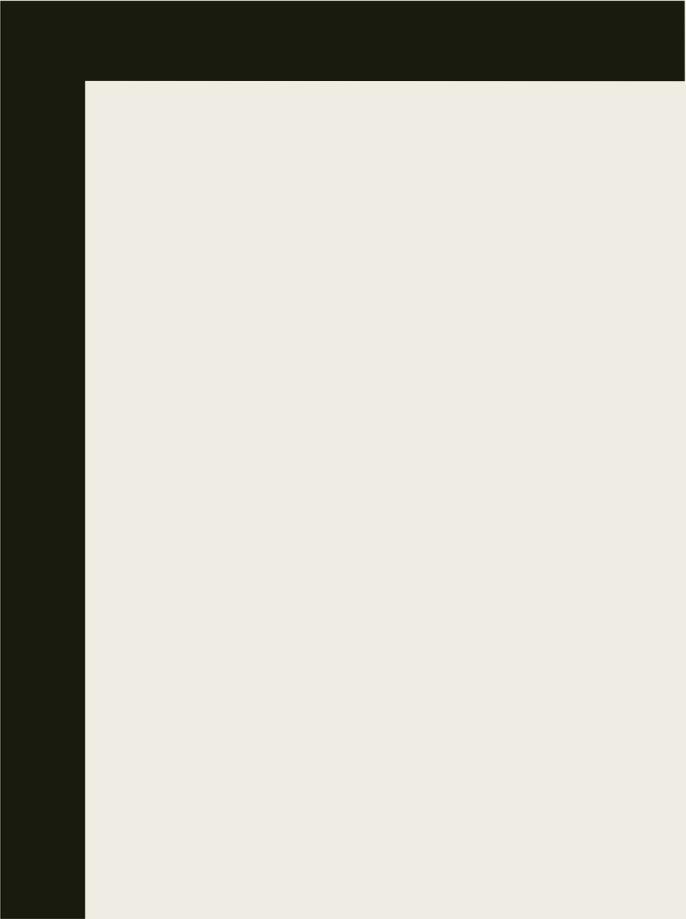

## Book Bag Tag

- Ask the student to take out essential items from their backpack and lay them on the floor
- Have the student group like items together
- Take a picture
- Laminate the picture to create a back-pack tag so they can “match the picture” when it is time to go home.

The image features two large, thick black L-shaped brackets. One is positioned in the top-left corner, and the other is in the bottom-right corner. They are oriented towards each other, framing the central text.

# **TIME MANAGEMENT**

**THANK YOU!**
