

STAR ACADEMY: PREPARE FOR LAUNCH

The STAR Initiative addresses the traditional underrepresentation of women and people of color in the computer science and tech industry through targeted support and intervention. As a comprehensive K-12 computer science pathway to prepare students with the 21st-century skills and competencies to excel in a career in the computer science and technology industry. The STAR Initiative is vertically aligned across all grade levels for students to develop as computer scientists in appropriate ways at each grade level.

“
The Star Academy Initiative is visionary in its inclusivity and comprehensiveness. There is something for everyone, whether you have ambitions for these fields in the future or you just want to explore.
 ”
DR. MARK TRIPLETT
