

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2 [Amended 07/16/2014][Amended 05/20/2020]

A. PURPOSE

To provide an area for the location of small retail, business, service and community uses as well as a range of residential uses including multifamily dwellings and dwellings that are part of mixed use developments. The goal of the district is to supplement the RH District in fostering a high-quality, mixed use center, with development at a scale and uses at an intensity which are compatible with the surrounding area. This medium intensity mixed use district allows a range of land uses that are intended to compliment the core development pattern and uses in the RH District as well as serve as a transition to the surrounding rural residential areas. The Running Hill-Gorham Road Transition District shall be considered a business district whenever this Ordinance distinguishes between types of districts.

B. DEVELOPMENT DESIGN AND REVIEW PROCEDURES

Depending on the acreage, scale and site layout of a proposed project, a development/redevelopment project within this district may undergo a conventional review process involving Site Plan Review and/or Subdivision Review applying the quantitative standards of subsection E. or may be reviewed as a Planned Development applying the qualitative standards and design criteria of subsections E. and I.

1. Conventional Developments. Projects that are proposing to develop or redevelop less than 5 acres of land, except for newly created lots addressed in 3. New Lots, may be reviewed as a conventional development or may be reviewed as a Planned Development, at the applicant's option.

2. Planned Developments. Projects that are proposing to develop or redevelop 5 acres or more of land, shall be reviewed as Planned Developments in accordance with the standards of subsection I. Qualitative Development Standards for Planned Development of this district and Section VIII. Planned Development of this Ordinance.

3. New Lots. The division of a parcel that had five (5) acres or more of area as of July 16, 2008, into two or more lots as well as the subsequent development of the new lots regardless of their size shall be reviewed as a Planned Development in accordance with the standards of subsection I. Qualitative Development Standards for Planned Development of this district and Section VIII. Planned Development of this Ordinance.

C. PERMITTED USES, CONVENTIONAL AND PLANNED DEVELOPMENTS

RESIDENTIAL USES:

The following residential uses are permitted in both conventional and planned developments:

1. Single family dwellings
2. Two family dwellings
3. Multifamily dwellings limited to no more than twelve (12) dwelling units per building
4. Multiplex dwellings
5. Townhouses limited to no more than eight (8) dwelling units per building
6. Senior housing

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

MIXED USES:

The following mixed uses are permitted in both conventional and planned developments:

7. Dwelling units within a mixed use building limited to no more than eight (8) dwelling units per building. Permitted residential uses mixed with special exception uses requires special exception approval by the Zoning Board of Appeals under Section IV.(I)
8. Live/Work Units
9. Retail sales and services establishments with less than 1,000 square feet of retail floor area per unit of occupancy, excluding car washes, gasoline filling stations and outdoor sales and services, if located in a mixed use building that includes other non-residential uses and/or residential uses
10. Restaurants with no drive-through service if located in a mixed use building that includes other non-residential uses and/or residential uses
11. Personal services if located in a mixed use building that includes other non-residential uses and/or residential uses

NON-RESIDENTIAL USES:

The following mixed uses are permitted in both conventional and planned developments.

The following non-residential uses are limited to 5,000 square feet of floor area per unit of occupancy.

12. Business services and business offices
13. Professional offices
14. Financial, insurance and real estate offices
15. Day care center facilities and Nursery schools
16. Group day care homes and Family Day Care Homes, subject to the standards and conditions of Section IV(I)(6), except that Board of Appeals review is not required
17. Health clubs

The following non-residential uses are not limited in square footage of floor area per unit of occupancy.

18. Municipal buildings and uses
19. Place of worship
20. Accessory uses (excluding outdoor storage) including accessory agricultural activities subject to the performance standards of Section IX.P. [Amended 05/05/10]
21. General purpose agriculture existing as of September 1, 2008 including retail sales of farm products located on the same premises and kennels, but exclusive of abattoirs and piggeries

The following non-residential uses are permitted in conventional developments on lots existing as of April 1, 2014, that have frontage on Gorham Road:

22. Retail sales and services establishments with less than 2,500 square feet of retail floor area per unit of occupancy, excluding car washes, gasoline filling stations and outdoor sales and services
23. Restaurants with no drive-through services

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

D. SPECIAL EXCEPTIONS

The following uses are allowed as special exceptions in both conventional and planned developments:

1. Nursing homes.
2. Boarding care facility for the elderly.
3. Public utility facilities.
4. Telecommunication facility.
5. Adjunct Uses, Place of Worship.
6. Home occupations. Special exception approval is required only for those professions or occupations not otherwise allowed as permitted uses under subsection (B)
7. Non-municipal government offices
8. Non-residential institutional uses, including educational, religious, philanthropic, fraternal, or social institutions, which are not otherwise permitted uses in this section
9. Funeral homes
10. Elementary and secondary schools
11. Libraries and museums

E. SPACE AND BULK REGULATIONS

The following space and bulk regulations are applicable to conventional developments:

1. Minimum Lot Area and Dimensions

Housing & Use Type	Lot Area (square ft.)	Lot Frontage (ft.)	Lot Width (ft.)
Single-family dwellings; two-family dwellings; multi-family dwellings; multiplex; townhouses; senior housing	10,000 with public sewer 40,000 with on-site sewage disposal	200 for lots abutting Running Hill Road or Gorham Road; 50 for lots abutting any other street	50
Non-Residential and Mixed Uses	10,000 with public sewer 40,000 with on-site sewage disposal	200 for lots abutting Running Hill Road or Gorham Road; 50 for lots abutting any other street	50

2. Yard Standards - The following minimum front yard standards apply in conjunction with subsection G. of this district.

Abutting Streets	Minimum Front Yard (ft.)	Side and Rear Yard (ft.)
Running Hill Road and Gorham Road	30 or the height of the building fronting Running Hill Road or Gorham Road,	15 ^{1 & 2}

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

	whichever is greater	
All other streets	10	15 ^{1 & 2}

¹When multiple buildings and lots are within the same development the minimum side and rear yards may be reduced to 5 feet if the buildings meet the Fire Rating requirements for the lesser yard as per the NFPA 101 Life Safety Code and the Scarborough Fire Department approves the reduced yard.

² When a site abuts a residential district the minimum yard for a use other than a single-family or two-family dwelling shall be determined bases on the use in the RH2 District in accordance with the following table. Where the buffer is required, it shall comply with the buffering requirements of Section VIII of this Ordinance.

<u>Use of the Site</u>	<u>Minimum yard and buffer width</u>
<i>Buildings and structures for all residential uses other than single- and two-family dwellings.</i>	50 Feet
<i>Buildings and structures for non-residential uses or mixed-uses with one story.</i>	50 feet
<i>Buildings and structures for non-residential uses or mixed-uses with more than one story.</i>	100 feet

3. Maximum Building Coverage, and Lot Coverage, and Minimum and Maximum Building Height

Maximum individual building footprint	Maximum percent of lot coverage by buildings	Maximum percent of lot coverage by buildings and other impervious surfaces	Minimum building height	Maximum building height
5,000 sq. ft.	35%	85%	None	45 feet [Amended 05/20/2020]

The following space and bulk regulations are applicable to Planned Developments:

4. Minimum Lot Area and Dimensions

Housing & Use Type	Lot Area (square ft.)	Lot Frontage (ft.)	Lot Width (ft.)
Single-family dwellings; two-family dwellings; multi-family dwellings; multiplex; townhouses; senior housing	10,000	200 for lots abutting Running Hill Road or Gorham Road; for lots abutting any other street the Planning Board shall determine the lot frontage under subsection I. of this	50

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

		district	
Non-Residential and Mixed Uses	10,000	200 for lots abutting on Running Hill Road or Gorham Road; for lots abutting any other street the Planning Board shall determine the lot frontage under subsection I. of this district	50

5. Yard Standards – Determined by the Planning Board under subsection I. of this district

6. Maximum Building Footprint, Building Coverage, and Lot Coverage, and Minimum and Maximum Building Height

Maximum individual building footprint	Maximum percent of lot coverage by buildings	Maximum percent of lot coverage by buildings and other impervious surfaces	Minimum building height	Maximum building height
5,000 sq. ft.	35%	85%	None	45 feet [Amended 05/20/2020]

F. RESIDENTIAL DENSITY REGULATIONS, APPLICABLE TO BOTH CONVENTIONAL AND PLANNED DEVELOPMENTS

Within this zoning district the Residential Density Factors in Section VII C. A. of this Ordinance shall apply to multi-family, multiplex, townhouse, live/work, senior housing or dwelling units in a mixed-use building

1. Maximum Base Residential Density – The maximum base residential density is the maximum residential density permitted without utilizing additional density through the development transfer or affordable housing provisions

Single-family, two-family, multi-family, multiplex, townhouse dwellings, live/work units, senior housing and dwelling units located in a mix use building	5 dwelling units per acre of net lot area if served by public sewer or 1 dwelling unit per acre if served by on-site sewage disposal. The net lot area is the gross area of a lot exclusive of those areas described in paragraphs 1, 2, 3, 5 and 6 of the definition of Net Residential Acreage in Section VI of this Ordinance
---	--

2. Additional Residential Density Thru Development Transfer – A development that is served by the public sewer system may incorporate up to five (5) additional dwelling units per acre of net lot area beyond the maximum base residential density by utilizing the development transfer provisions in accordance with Section VIID. of this Ordinance.

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

3. Additional Residential Density Thru Affordable Housing – A development that is served by the public sewer system may incorporate up to five (5) additional dwelling unit per acre of net lot area beyond the maximum base residential density provided at least 40% of the additional dwelling units (with fractional numbers of units rounded up to the nearest whole number) are designated as affordable housing.

4. Additional Residential Density Thru an Affordable Housing In-Lieu Fee – In lieu of developing affordable housing to utilize additional residential density under subsection F.3., a development that is served by the public sewer system may incorporate up to five (5) additional dwelling unit per net residential acre beyond the maximum base residential density by utilizing the affordable housing in-lieu fee provisions in accordance with Section VII.C. of this Ordinance.

The Planning Board may allow a development that is served by the public sewer system to utilize additional residential density through both the affordable housing and development transfer provisions but the combined additional residential density shall not exceed five (5) dwelling units per acre of net lot area beyond the maximum base residential density. If subsections F.2., F.3., and /or F.4. are used, the additional dwelling units permitted under F.3. and /or F.4. shall not also be subject to the development transfer provisions under F.2.

G. BUILDING ORIENTATION, STREETScape AND OFF-STREET PARKING STANDARDS, APPLICABLE TO CONVENTIONAL DEVELOPMENTS

The design of a development site, and more specifically the orientation of buildings to Running Hill Road and Gorham Road and internal streets, the streetscape of Running Hill Road and Gorham Road and internal streets, as well as the location, layout and form of site parking, are fundamental to realizing the purpose of this district.

1. Streetscape – A landscaped buffer strip shall be established along the front property line of a lot where it abuts Running Hill Road or Gorham Road. The width of the landscaped buffer strip shall be a minimum of thirty (30) feet. Where trees exist within the buffer strip the Planning Board may require these trees to be saved to preserve this corridor. The buffer strip shall be landscaped in accordance with the Site Plan Review Ordinance, the Design Standards for Scarborough’s Commercial Districts and any subsequent Running Hill Road corridor landscaping plan. In addition to landscaping, the buffer strip may contain sidewalks or pedestrian trails, freestanding signage, and an access drive to the site.

2. Building Orientation - The location of buildings and their orientation to Running Hill and Gorham Roads is critical to establishing attractive gateways into the Town of Scarborough. Buildings fronting Running Hill and Gorham Roads shall be located relatively close to the street to exhibit a strong relationship with the street and shall be designed in coordination with the required landscape buffer strip. The height of buildings shall be proportional to their distance (or setback) from the Running Hill or Gorham Road right-of-way. The front line of buildings two-stories or thirty (30) feet in height may be sited as close as thirty (30) feet from the right-of-way, while taller buildings are required to be setback from these roads in proportion to their height in order to correspond with the landscaped buffer strip and not shadow or visually dominant the road corridors.

3. Access Management and Interconnections – Access management is critical to preserving mobility in the Running Hill and Gorham Road corridors as well as to establish attractive gateways

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

into the Town of Scarborough. Where feasible, adjacent sites shall be interconnected through the use of internal driveways or streets and shall establish one common curb cut onto the road in order to share an access point and reduce the number of curb cuts along the corridor. Site access shall also be designed in accordance with the Site Plan Review Ordinance.

4. Off-Street Parking Location – No off-street parking shall be located within the front yard of sites fronting Running Hill or Gorham Roads. The front yard shall be used to meet the streetscape requirements of subsection G.1. above and may also include sidewalks, other pedestrian amenities, street lighting, site access drives, and additional landscaping or buffering that exceeds the minimum requirements of subsection G.1. above.

This standard shall not apply to single-family and two-family dwellings that may utilize driveways for parking within the front yard.

Where parking lots and associated access drives are visible from adjacent public streets, they shall be buffered in accordance with the Design Standards for Scarborough’s Commercial Districts.

H. ADDITIONAL DEVELOPMENT STANDARDS APPLICABLE TO BOTH CONVENTIONAL AND PLANNED DEVELOPMENTS

1. Signs - Signs shall be regulated in accordance with the requirements of Section XII of this Ordinance.

2. Commercial Design Standards – All development within the Running Hill Road-Gorham Road Transition District, with the exception of single-family and two-family dwellings, must be consistent with the Design Standards for Scarborough’s Commercial Districts.

3. Pedestrian, Bicycle and Mass Transit Facilities – All developments shall provide for pedestrian movement to and within the site in accordance with Section IV.E. of the Site Plan Review Ordinance and the Design Standards for Scarborough’s Commercial Districts. Provisions must be incorporated into new developments for bicycle movement including appropriate facilities, such as bike racks and bike lanes, if the scale of the project makes these reasonable. Provisions must also be incorporated into new developments for mass transit use, such as bus stops and bus stop shelters, if the scale of the project makes these reasonable.

4. Public Sewer Service – All new development and redevelopment within a planned development shall be served by public sewer. All new, expanded, or redeveloped buildings that are part of a conventional development shall be served by the public sewer system unless all of the following are met in which case sewage disposal may be provided by an on-site sewage disposal system meeting the requirements of the Maine State Plumbing Code and the Town of Scarborough Plumbing Ordinance.

- a. The design sewage flow of the use will be less than six hundred (600) gallons per day based on the Maine State Plumbing Code; and,
- b. Only domestic type sewage will flow to the on-site sewage disposal system. No process water shall go to the system; and,
- c. The project will be designed to be connected to a public sewer system in the adjacent street if such a sewer is ever extended.

Existing single-family dwellings served by on-site wastewater systems shall not be subject to this requirement until the single-family dwelling is changed, converted or redeveloped to a new use.

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

5. General Off-Street Parking Standards -

- a. Off-street parking shall be provided in accordance with the requirements of Section XI of this Ordinance, except as otherwise permitted in this subsection.
- b. In order to reduce the establishment of unnecessary parking spaces and impervious area which segregates structures, uses and pedestrian amenities, the Planning Board may approve the shared or joint use of parking facilities by two or more principal buildings or uses. This allowance shall be granted where it is clearly demonstrated that the said parking facility will substantially meet the intent of the parking requirements by reasons of variation in the probable time of maximum use by patrons or employees among such establishments or uses. In the RH2 District, approval of this allowance by the Board of Appeals under Section XI(I) shall not be required.

I. DEVELOPMENT STANDARDS FOR PLANNED DEVELOPMENTS

The Running Hill Road-Gorham Road Transition District (RH2) Planned Development standards provide qualitative standards that are intended to promote flexible and innovative design solutions that further the purpose of this zoning district. These standards supplement the provisions of the Design Standards for Scarborough's Commercial Districts and provide more specific requirements for development in the RH2 District.

This subsection includes specific standards that a planned development is required to meet and a range of design criteria to be applied by the Planning Board when a development is reviewed under this subsection and in accordance with Section VIII.E. Planned Development.

1. PLANNED DEVELOPMENT STANDARDS

A planned development shall be designed in a manner that reinforces the RH2 District as a mixed use transition zone. Buildings, parking, pedestrian amenities, landscaping, streets and common space shall be arranged in a compact, interconnected development pattern that exhibits a human scale and a mix of land uses.

a. Running Hill and Gorham Road Streetscapes – The streetscape along Running Hill Road and Gorham Road are critical to establishing attractive gateways and transition into the rural area of Scarborough. Running Hill and Gorham Roads shall be buffered with shade trees and a generous landscaped strip along the road right-of-way. This landscape buffer shall meet or exceed the thirty (30') foot width required of conventional developments. The planned development process will be used to identify areas along these roads where existing trees and vegetation shall be preserved as well as areas in which new shade trees and landscaping shall be planted to enhance this corridor. Buildings may be visible from these roads but shall be setback and separated from the street by this landscaped buffer. Parking is not appropriate between Running Hill Road or Gorham Road and buildings within a planned development, but sidewalks, pedestrian trails, freestanding signs and access drives are.

b. Internal Street Streetscape - The streetscape along internal streets and driveways within a planned development shall differ from the streetscape along Running Hill Road and Gorham Road and shall exhibit a more compact form and scale. The streetscape along internal streets and driveways within a planned development shall be designed with shade trees on both sides; road widths that are more compact in scale; human scale street lighting; frequent intersections and crosswalks; and sidewalks as per standard I(1)c. below. The streetscape of internal streets may also include on-street parking on one or both sides of the streets or driveways.

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

c. Walk-able, pedestrian-oriented design – Appropriately designed and oriented sidewalks, and other pedestrian amenities, are critical to promote walk-ability, pedestrian activity, and a sense of place within the RH2 District. Sidewalks or pedestrian trails shall be designed along both Running Hill and Gorham Roads and internal streets and shall be a primary component of each streetscape. Pedestrian amenities along Running Hill and Gorham Roads should generally be setback from the street leaving a larger landscaped buffer strip along the roadway. Sidewalks along internal streets and driveways should be close to the roadway creating a more compact environment as per standard (I)1.b. above. In general, sidewalks or pedestrian trails shall be designed to provide linkages and continuity between each use within a planned development as well as connections to abutting uses to establish a greater pedestrian network.

d. Compact building design – Planned developments with the RH2 District shall exhibit a compact development pattern. Buildings shall be designed to front onto the internal street or driveway that provides access to the building(s). Buildings shall be a key component of the streetscape and exhibit a strong relationship to the street and associated sidewalks and landscaping. The majority of off-street parking shall be located to the side or rear of buildings or as a component of the building in the case of structured or covered parking. In planned developments with multiple buildings, the Planning Board may allow some buildings to be setback from the street or driveway with parking between those buildings and the street provided: other buildings front the street(s) or driveways and maintain a human scale streetscape; there is continuity between buildings with no major expanse of parking; and the development meets or exceeds each of the other planned development standards. The Planning Board may determine that this standard need not apply to single-family and two-family dwellings that may seek to utilize driveways for parking within the front yard.

e. Access management and interconnections – Access to planned developments from Running Hill Road and/or Gorham Road shall be strictly controlled to limit the number of curb cuts on these roads. Planned developments shall also make provisions for street and driveway interconnections to abutting properties to enable cross connections, the share use of curb cuts and intersections and to reduce the overall number of curb cuts on these roads.

f. Place-making – A planned development shall include at least one “place” and potentially a number of “places”, depending on the size and scale of the development. A “place” shall be a common space(s) where people can gather, meet and cross paths. A “place” can be a community green or common; plaza; court; square or some variation of each. Regardless of the style or size, “places” are required to be designed as an integral part of a planned development in locations where people will naturally gather, meet and cross paths. “Places” shall be located at the core of the pedestrian realm of a planned development; shall an element of the development streetscape and overall development pattern; and shall be available and desirable for public use. Areas for outdoor seating, court yards or green space associated with a particular use or establishment are desirable amenities, but should not be counted as a “place” unless they are available for public use.

2. DESIGN CRITERIA FOR PLANNED DEVELOPMENTS

The following design criteria shall apply to all planned developments. In addition, the Planning Board may require a planned development to be designed in conformance with any other standards

SECTION XX.B. RUNNING HILL – GORHAM ROAD TRANSITION DISTRICT RH2

of this Section XXB. when the Board finds that application of such standards will achieve conformity with the Planned Development Standards of section XXB.(I)(1).

a. On-street Parking On-street parking can provide spaces directly in front of residential and non-residential uses when buildings are sited close to the street; provide parking that can supplement off-street parking; function as a buffer between pedestrians using the sidewalk and vehicular traffic; and can act as a traffic calming measure. As indicated in subsection (I)(1) above, a planned development may include new internal streets or driveways with parallel or angled on-street parking or “on-driveway” parking. As part of the planned development review process the on-street parking design shall require approval from all applicable town departments, including Public Works, the Fire Department and Public Safety. When approved according to this Section, on-street parking can be used to satisfy the requirements of Section XI of this Ordinance.

b. Flexible yard standards - The Planning Board shall determine the yard requirements and site layout and off-street parking configuration for a planned development by applying the standards of subsections (I) (1). In reviewing a planned development, the Planning Board may use the Yard Standards under subsection E.2. and the Site Layout and Off-Street Parking Regulations under subsection G. that correspond with the yard standards as guidelines, but is not required to apply them. This enables the Planning Board to allow buildings to be sited closer to internal streets than conventional development or require buildings to be set further back from Running Hill Road or internal streets to meet the standards of subsection (I) and further the purpose of this district.
