

# Controlling Things That Make Asthma Worse

## SMOKE

- Do not smoke. Attend classes to help stop smoking.
- Do not allow smoking in the home or car. Remaining smoke smell can trigger asthma.
- Stay away from people who are smoking.
- If you smoke, smoke outside.

## DUST

- Vacuum weekly with a vacuum with a high efficiency filter or a central vacuum. Try to make sure people with asthma are not home during vacuuming.
- Remove carpet if possible. Wet carpet before removing and then dry floor completely.
- Damp mop floors weekly.
- Wash bedding and stuffed toys in hot water every 1-2 weeks. Freeze stuffed toys that aren't washable for 24 hours.
- Cover mattresses and pillows in dust-mite proof zippered covers.
- Reduce clutter and remove stuffed animals, especially around the bed.
- Replace heating system filters regularly.

## PESTS

- Do not leave food or garbage out. Store food in airtight containers.
- Try using traps and poison baits, such as boric acid for cockroaches. Instead of sprays/bombs, use baits placed away from children, such as behind refrigerator.
- Vacuum up cockroach bodies and fill holes in with caulking or copper wool.
- Fix leaky plumbing, roof, and other sources of water.

## MOLD

- Use exhaust fans or open windows for cross ventilation when showering or cooking.
- Clean mold off hard surfaces with detergent in hot water and scrub with stiff brush or cleaning pad, then rinse clean with water. Absorbent materials with mold may need to be replaced.
- Make sure people with asthma are not in the room when cleaning.
- Fix leaky plumbing or other sources of water or moisture.

## ANIMALS

- Consider not having pets. Avoid pets with fur or feathers.
- Keep pets out of the bedroom of the person with asthma.
- Wash your hands and the hands of the person with asthma after petting animals.

## ODORS/SPRAYS

- Avoid using strongly scented products, such as home deodorizers and incense, and perfumed laundry products and personal care products.
- Do not use oven/stove for heating.
- When cleaning, keep person with asthma away and don't use strong smelling cleaning products.
- Avoid aerosol products.
- Avoid strong or extra strength cleaning products.
- Avoid ammonia, bleach, and disinfectants.

## POLLEN AND OUTDOOR MOLDS

- Try to stay indoors when pollen and mold counts are high.
- Keep windows closed during pollen season.
- Avoid using fans; use air conditioners.

## COLDS/FLU

- Keep your body healthy with enough exercise and sleep.
- Avoid close contact with people who have colds.
- Wash your hands frequently and avoid touching your hands to your face.
- Get an annual flu shot.

## WEATHER AND AIR POLLUTION

- If cold air is a problem, try breathing through your nose rather than your mouth and covering up with a scarf.
- Check for Spare the Air days and nights and avoid strenuous exercise at those times.
- On very bad pollution days, stay indoors with windows closed.

## EXERCISE

- Warm up before exercising.
- Plan alternate indoor activities on high pollen or pollution days.
- If directed by physician, take medication before exercise. (See Green Zone of Asthma Action Plan.)
