

NOVEMBER 2022

OSHKOSH AREA SCHOOL DISTRICT PROJECT PROGRESS REPORT

CONSTRUCTION UPDATE

At Vel Phillips Middle School, the project has continued making good progress over the past month, with the most significant difference being the walls of the gymnasium arriving and being placed on site. Walls continue to rise on the North portion of the site; meanwhile, infrastructure items, concrete slabs, roofing, and stud walls are going on around the site. The Vel Phillips project will continue to push to get more and more on the exterior of the building completed before the winter weather shows up.

PLANNING & DESIGN UPDATE

On the new elementary school at the Webster Stanley site, the design portion of this project is coming to a close, with one design meeting remaining. On an administrative level, the project has successfully received approval from the Traffic and Parking Advisory Board at the City of Oshkosh as one of the prerequisites to achieving City of Oshkosh approval. We are on track to receive approval at the City level sometime in January 2023.

The OASD has released an initial survey for the New Elementary School, asking for suggestions on what to name the building. This survey will be the first of two to gather information. The School Board will consider the survey results when deciding on the name of the new building. The first survey will close on November 7th. You can access the survey on the school district's website to submit your suggestions.
