Dear Keystone Central Families,

We hope this letter finds you safe and well. This letter is to inform you of the Keystone Exam testing requirements that will impact students who are currently enrolled in a Keystone trigger course (English 10, Biology and Algebra 1) during the Fall 2022 semester. Students enrolled in a Keystone trigger course complete the exam toward the end of their course enrollment.

The initial window for testing is January 4-18, 2023. At this time, the Department of Education has not made any provisions for remote testing, so all students will need to attend in-person testing sessions.

Please refer to your student's home school website for building specific time schedules and testing updates

*Virtual Academy students will report to the guidance office on their assigned testing days **no later than 8:15am** to receive their testing location. Virtual Academy students can arrange to be picked up after their testing session has ended for the day or remain at school and work in the cyber room.

Below is the tentative schedule:

Keystone Exam Tests	Testing Dates
Literature 10 grade Keystone Exam	**January 4-5**
Biology Keystone Exam	**January 9-10**
Algebra 1 Keystone Exam	**January 12-13**

We will continue to communicate any updated information in regards to Keystone exam testing as it becomes available to us. Thank you for your patience and understanding as we work through meeting the state requirements.

Sincerely,
Justin Evey, District Assessment Coordinator
Megan Hull, Director of Curriculum and Innovation
