## It’s beginning to look a lot like Christmas!

### LEIA

It’s almost CHRISTMAS!!! And you know what that means, it means that it is time to celebrate with your family, either on the 24th or the 25th. So, bring out the stockings, wrap the Christmas tree and get ready for PRESENTS and FUN!!!Christmas also includes (and only if you love it) endless Christmassy, and dramatic Hallmark movies.

Let’s listen to some Christmas music like: “It’s beginning to look a lot like Christmas”, “Feliz Navidad”, “last Christmas” OR the FAMOUS ONE and ONLY “JINGLE BELLS”!!!!

#### My Christmas poem

When the snow hits the ground,

It makes such a gentle sound

The presents under the tree,

That is when the sound of Christmas,  
comes to me,

Dancing and singing,

Jingle bells ringing

“There is a Christmas song in my heart”,

It has been there from the start

“Hanging all the stockings by the  
Christmas tree,

Because that’s what Christmas  
means to me

Well, well, well. I am guessing that most of you are thinking: IS THERE GOING TO BE SNOW THIS CHRISTMAS?! Well either stay in London or travel to a cold country like Denmark, and then you will get all the SNOW you want! So, grab your boots, pack a suitcase, fly on out, and find some SNOW!! Personally, I love making snowmen with my brother, and making snowballs with my brother. So, if you have a sibling, get ready for some snowy fun!

I personally love going on snowy walks through the forest, where my grandma lives. (I know that sounds a lot like Red Riding Hood) But whilst you are out there, you can get some really good photos like the one I have taken over here!

## COP<sub>27</sub>

**2022 United Nations Climate Change Conference.**

## ASAD

Recently, on 16 November 2022, the 27th United Nations Climate Change Conference was held in the city Sharm El Sheikh in Egypt. The climate conference was attended by representatives from almost 200 countries in the UN. The conference involved discussions about climate finance and decarbonization of economies. Climate finance is any finance that seeks to reduce emissions of greenhouse gases and enhance ways to absorb greenhouse gases. Climate finance is intrinsically connected to decarbonization. Decarbonization involves replacing energy sources that are dependent on fossil fuels and emitting greenhouse gases like carbon. These energy sources are replaced by energy sources that produce little to no greenhouse gases.

Apart from discussion, a very important development within the conference was an adaptation fund for countries suffering from climate disasters. The fund is grant-based rather than loan-based helping poorer countries to avoid being put in debt to repair damages from natural disasters. The money pledged into the fund can be used by every country in the UN to repair and recover from the aftermath of a climate disaster. The fund is also available to help vulnerable countries adapt to the consequences of climate change, like floods, rising sea levels and rising temperatures. At the end of the climate conference, a total of 230 million US dollars were pledged into the adaptation fund by many countries, regional governments and development agencies.

## Upcoming Movies 2023

## PABLO

Coming out in 2023 are:

Marvel is releasing “Antman and the wasp quantomania” (17 February), along with “Guardians of the galaxy 3” (5 March), “The marvels” and “Blade” (3 November). Marvel also has 4 Series that are exclusive to Disney+ planned out: “Secret Invasion” (no official release date), “Echo” (Summer), “Loki” season 2 (Towards the middle of the year) “Agatha covens of case” (winter) and “Ironheart” (fall/ autumn), but already have planned out MCU material for 2024 and 2025.

## ARTEMIS I MISSION

## RICCARDO

### What is the Artemis program?

The Artemis program is a series of space missions by NASA that aim to put humans on the surface of the moon once again. With these missions NASA will also land the first woman and first person of color on the Moon. To achieve this, they will be using innovative technologies to explore more of the lunar surface than ever before. These discoveries will then be used when humans will finally land on the Martian surface.

### What is Artemis I?

Artemis 1, officially Artemis I, is an uncrewed mission. As the first spaceflight of NASA's Artemis program, Artemis 1 is the return of NASA to lunar exploration after the apollo program in the 1960-70s. It is the first flight test of the Orion spacecraft and Space Launch System (SLS) rocket. Artemis 1 was successfully launched from Kennedy Space Center on November 16, 2022. Its main objective is to test the Orion spacecraft, especially its heat shield, in preparation for later Artemis missions. These missions aim to return a human presence on the Moon and demonstrate technologies needed for future scientific studies, including exploration of Mars.

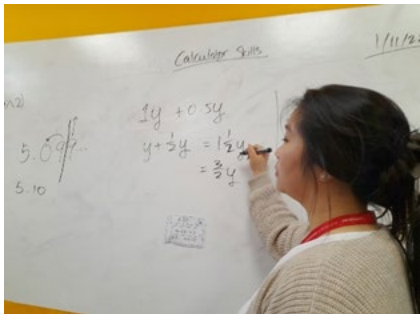

Education – What do we have, and what are we missing?

LEIA

We have an amazing education here at ISL. We have an opportunity to learn to understand each other and our differences/similarities.

The education we have in our eyes may seem normal, but it is truly a privilege that we take for granted. Not everyone has what we have.

We sit in a classroom and learn. Most of us complain about going to school, but some children around the world would give anything for a teacher who cares about their future.

Our education creates truth and possibility. Our education gives us a future; and a brighter one.

Education around the world

775 million adults (12% of the whole adult population) around the world are illiterate, because they did not get the right education when they were children. Studies show that ‘Crime is strongly linked to illiteracy’. If 12% of the country is illiterate, then it is most likely that 12% of the population (plus) will grow up to be criminals, because this part of the population never had the proper education for a real job.

Girls in Africa are most likely to stay out of school than the boys in Africa. Between the ages six and eleven, nine million girls in Africa will never go to school, compared to six million boys. This shows both gender discrimination and a lack of education.

All you need to know about Arsenal

ISHAYU

Have you ever wondered about the Premier league and its history, the cups and teams? Well, you’re in luck because today... you are going to learn about Arsenal, a famous team in the premier league. Arsenal is a team born in late 1886, where a group of workers created their team called their team Dial square. As every football team has a kit, they didn’t have or made one. So, they borrowed a kit from Nottingham Forest, which became their first official kit.

In the field of history

Dial Square’s first match was with Eastern Wanderers, which went on to a big win for Arsenal which was an absurd 6-0 win. This game was a great start. This earned their name ‘Royal Arsenal’ at Christmas time. This made some of Nottingham’s players join Arsenal. Then their following matches just after three years went outstanding when they won the London Charity Cup, the Kent Senior Cup and the Kent Junior Cup. During the start of this season, their motto was formed which said *Victoria Concordia Crescit*, Latin for "Victory Through Harmony".

The symbol of their people

The logo of Arsenal contains many histories in it, mostly in the cannon! Well, if you are a young arsenal fan, in 2002, the cannon faced westwards, now changed to the east! The logo itself was inspired by their factory itself.

World Cup 22

As you know, after a 4 years wait, the World Cup arrives, and Arsenal fans, 19 players from Arsenal have joined Brazil, England, Portugal, USA and many more! A famous World Cup participant, France has taken the player William Saliba, a known player in Arsenal!

## PABLO

Find out what the picture means, make the changes under it, put it all together and create a known quote from the cinematic universe.
