Iona University Artificial Intelligence Program Begins!

BTMS is excited to start our partnership after-school program with Iona University. 7th & 8th graders who scored 75 + in Science or Math for Marking Period 1 were selected for the program. They meet virtually with a professor from Iona in our tech room every first Tuesday & Thursday of the month. Our students are given the opportunity to learn about Artificial Intelligence (AI). They will be able to create their own AI and take trips to see how AI works in the real world! We are the first school in the district to start this program! GO BTMS!

Congrats to the 6th Grade Students for having the highest Attendance Rate for the month of November!
