

Student Learning Experienced Differently
Cumberland County Schools' Non-Traditional Instruction Program

GRADE LEVEL: 7

A TOTAL OF THREE ACTIVITIES SHOULD BE COMPLETED FOR EACH DAY.

SLED DAY #3

<p>ONLINE OPTION</p> <p>Students will log into IXL (www.ixl.com) and complete THREE new lessons to 85% in one of the following subjects of their choice:</p> <p>Lessons must be completed on Grade Level.</p> <p style="text-align: center;">Language Arts Math Science Social Studies</p>	<p>ENGLISH</p> <p>We have recently learned about informational text structures. Using chronological order/sequence text structure, create a guide instructing someone on how to complete a daily task. This could be something easy like making a sandwich or something difficult such as airing up a tire. Whatever it is, it should be something you are familiar with that you are teaching to a beginner. You need to include <u>at least</u> ten steps in your guide.</p>	<p>SOCIAL STUDIES</p> <p>Watch CNN10, a news channel, or read a news article in the newspaper or a magazine. Provide a summary about the current events you learned about. Will any of the current events affect you or not? Explain. (Write at least two paragraphs).</p>
<p>MATH</p> <p>Find the measures of central tendency (mean, median and mode) for the following set of data: 70, 75, 75, 80, 84, 90, 100</p>	<p>SCIENCE</p> <p style="text-align: center;">States of Matter</p> <div style="text-align: center;"> </div> <p>Scenario: Water is a unique substance. It can be observed naturally as a solid (ice), a liquid (water), or as a gas (water vapor). Prompt: Write a scientific explanation that describes the relationship between temperature, kinetic energy, and the state of matter. Use CER prompt.</p>	<p>RELATED ARTS</p> <p>Practice your coding skills with https://hourofcode.com/us/learn. Explore the games on this website for at least 30min. Each game will explain how it is played with a video or with written directions. It is very important that you read/listen to the directions for each stage of the program. The programs start out simple and get harder. Coding is all about persistence, it is supposed to be hard enough it takes a few tries. Each game has levels, try and beat them all!</p>
